Notification	
Product Code	USB2-HDMILAN
Short Description	Extend HDMI via LAN or locally by USB
Full Description	The HDMI over LAN extender provides LAN connectivity via Cat5e cable (or locally by USB cable) to distribute a HDMI signal. The extender outputs HDMI from a single source to one or multiple screens (depending on quantity purchased) across the network with ease. The connected screens can be configured to either extend or clone the screen being output. Extending can be achieved in very simple steps: Step 1: Install the driver onto your networked PC Step 2: Plug the HDMI extender into the network and into the display Step 3: Search for the HDMI extender in the software on the PC and connect
Extra Information	**Specification:** Extend HDMI signal by using exsisting LAN Up to 4 units to be displayed at one time Supports both clone and extend mode Support high resolutions up to UXGA (1600 x 1200) & Full HD (1920 x 1080) Supports Windows XP SP2 or SP 3, Vista, 7 and 8* * Please note, software must be run in compatibility mode for it to install on Windows 8 Supports Inter-based Mac OS 10.4/10.5/10.6 for video extending via USB connection
