

BR851D -- Adapter, Mod 851Y, Splitting

Modular 851 "Y" adapters provide solutions for splitting and bridging within modular connectivity channels. The 851 "Y" adapters are specifically designed to convert an 8-position RJ45 plug into two 8-position RJ45 jacks.

Product Specifications	
Product Type	 Adapters
Adapter Type	Splitting/Bridging
Wiring Schematic	
Unit Package	Single
Order Quantity	Bag of 1

FEATURES

- Narrow profile designed to accommodate side-by-side positioning in high-density panel applications.
- Adapter's PCB design provides superior performance in applications requiring splitting or bridging of conductors.

SPECIFICATIONS

- Converts a T568B wired RJ45 jack to 2 10/100BASE-T wired RJ45 jacks. Pairs 2 and 3 are split to jack (1), and pairs 1 and 4 are split to jack (2).
