

New Metcal Concave Hoof Cartridges (SMTC, SxP 2mm & 3mm)

Metcal is pleased add new Concave Hoof geometries to our family of rework cartridges. The new cartridges consist of 2mm and 3mm geometrics in the SMTC and SxP series. The concave hoof cartridges improve the drag soldering techniques as the concave face of the tip provides a reservoir of solder. These are ideal for drag soldering multi-lead devices.

Part Number And Price	Geometry and Dimensions
