USB Adapter

CSR 4.0

Nano-sized with Smart Ready support

Notebook & Desktop	Smartphone & Tablet	Home Automation	Wearable Technology

Enabling the next generation of Bluetooth(tm) connectivity

Are you looking to upgrade your existing computer to the latest *Smart Ready* Bluetooth(tm) version 4 technology?

Stylish and compact in design, the new **BT-USB-M5** is the next-generation of Bluetooth(tm) nano adapter allowing users to take advantage of the exciting development of Bluetooth(tm) wireless for both professional and personal users alike.

Featuring the new *Smart Ready* technologies, only found on the very latest Bluetooth(tm) adapters, means the BT-USB-M5 can connect, with ease, to a whole host of home automation devices using Bluetooth(tm) connectivity such as adjustable lighting and security together with the ability to use high-performance Bluetooth(tm) 4.0 and connect to classical Bluetooth(tm) devices, simultaneously via its integral dual radios.

Wearable technology is also making an impact on Bluetooth(tm) technologies and as such health monitors and wearable audio may all take advantage of the BT-USB-M5 and being Plug n' Play with almost all popular operating systems including Windows8(tm) and Mac(tm) OS X, means you'll never run out of options on connecting your favourite devices to multiple platforms.
