

DESOLDERING TOOL

- Plug the power cord into a power source.
- Allow the nozzle to warm up for approx. 10 min
- Press the handle until a 'click' sound is heard.
- Place the tip of the nozzle against the solder you wish to remove.
- When the solder melts, press the button on the handle and the solder will be absorbed.

Cleaning and Nozzle Replacement

Note: Turn the power off and wait until the unit has completely cooled before removing the solder waste or replacing the nozzle.

[Cleaning]

- Lift the handle slightly in the direction of button and remove it from the grip.
- Remove the solder waste around the tip.
- Remove the solder waste inside the grip.

[Nozzle Replacement]

- Turn the nozzle counter-clock wise with pliers, etc., and remove it from the handle.
