

## Safety Data Sheet according to Regulation (EC) No1907/2006

Page 1 of 13

LOCTITE 270

SDS No. : 346906

V004.4

Revision: 23.01.2014

printing date: 13.12.2014

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

LOCTITE 270

#### Contains:

3,3,5 Trimethylcyclohexyl methacrylate  
Cumene hydroperoxide  
Maleic acid

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use:

Adhesive

#### 1.3. Details of the supplier of the safety data sheet

Henkel Ltd  
Wood Lane End  
HP2 4RQ Hemel Hempstead

Great Britain

Phone: +44 1442 278000

Fax-no.: +44 1442 278071

ua-productsafety.uk@uk.henkel.com

#### 1.4. Emergency telephone number

24 Hours Emergency Tel: +44 (0)1442 278497

### SECTION 2: Hazards identification

#### 2.1. Classification of the substance or mixture

##### Classification (CLP):

|  |            |
|--|------------|
| Skin irritation                                  | Category 2 |
| H315 Causes skin irritation.                     |            |
| Serious eye irritation                           | Category 2 |
| H319 Causes serious eye irritation.              |            |
| Skin sensitizer                                  | Category 1 |
| H317 May cause an allergic skin reaction.        |            |
| Specific target organ toxicity - single exposure | Category 3 |
| H335 May cause respiratory irritation.           |            |
| Target organ: Respiratory tract irritation       |            |

**Classification (DPD):**

Sensitizing  
R43 May cause sensitisation by skin contact.  
Xi - Irritant  
R36/37/38 Irritating to eyes, respiratory system and skin.

**2.2. Label elements**

**Label elements (CLP):**

**Hazard pictogram:**

**Signal word:**

Warning

**Hazard statement:**

H315 Causes skin irritation.  
H317 May cause an allergic skin reaction.  
H319 Causes serious eye irritation.  
H335 May cause respiratory irritation.

**Precautionary statement:**

\*\*\*For consumer use only: P101 If medical advice is needed, have product container or label at hand. P102 Keep out of reach of children. P501 Dispose of waste and residues in accordance with local authority requirements\*\*\*

**Precautionary statement:  
Prevention**

P261 Avoid breathing vapors.  
P280 Wear protective gloves.

**Precautionary statement:  
Response**

P302+P352 IF ON SKIN: Wash with plenty of soap and water.  
P333+P313 If skin irritation or rash occurs: Get medical advice/attention.  
P337+P313 If eye irritation persists: Get medical advice/attention.

**Label elements (DPD):**

Xi - Irritant

**Risk phrases:**

R36/37/38 Irritating to eyes, respiratory system and skin.  
R43 May cause sensitisation by skin contact.

**Safety phrases:**

S23 Do not breathe vapour.  
S24/25 Avoid contact with skin and eyes.  
S26 In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.  
S37 Wear suitable gloves.

**Additional labeling:**

For consumer use only: S2 Keep out of the reach of children.  
S46 If swallowed, seek medical advice immediately and show this container or label.

Contains:  
Maleic acid

**2.3. Other hazards**

None if used properly.

|  |
|--|
| <b>SECTION 3: Composition/information on ingredients</b> |
|--|

**General chemical description:**

Anaerobic adhesive

**Declaration of the ingredients according to CLP (EC) No 1272/2008:**

| <b>Hazardous components<br/>CAS-No.</b>             | <b>EC Number<br/>REACH-Reg No.</b> | <b>content</b>  | <b>Classification</b>  |

For full text of the R-Phrases indicated by codes see section 16 'Other Information'.  
Substances without classification may have community workplace exposure limits available.

## SECTION 4: First aid measures

### 4.1. Description of first aid measures

**Inhalation:**

Move to fresh air. If symptoms persist, seek medical advice.

**Skin contact:**

Rinse with running water and soap.  
Seek medical advice.

**Eye contact:**

Rinse immediately with plenty of running water (for 10 minutes). Seek medical attention if necessary.

**Ingestion:**

Rinse out mouth, drink 1-2 glasses of water, do not induce vomiting.  
Seek medical advice.

### 4.2. Most important symptoms and effects, both acute and delayed

EYE: Irritation, conjunctivitis.

RESPIRATORY: Irritation, coughing, shortness of breath, chest tightness.

SKIN: Redness, inflammation.

SKIN: Rash, Urticaria.

### 4.3. Indication of any immediate medical attention and special treatment needed

See section: Description of first aid measures

## SECTION 5: Firefighting measures

### **5.1. Extinguishing media**

#### **Suitable extinguishing media:**

Carbon dioxide, foam, powder  
Fine water spray

#### **Extinguishing media which must not be used for safety reasons:**

None known

### **5.2. Special hazards arising from the substance or mixture**

In the event of a fire, carbon monoxide (CO), carbon dioxide (CO<sub>2</sub>) and nitrogen oxides (NO<sub>x</sub>) can be released.

### **5.3. Advice for firefighters**

Wear self-contained breathing apparatus and full protective clothing, such as turn-out gear.

#### **Additional information:**

In case of fire, keep containers cool with water spray.

## **SECTION 6: Accidental release measures**

### **6.1. Personal precautions, protective equipment and emergency procedures**

Avoid skin and eye contact.  
Ensure adequate ventilation.

### **6.2. Environmental precautions**

Do not let product enter drains.

### **6.3. Methods and material for containment and cleaning up**

For small spills wipe up with paper towel and place in container for disposal.  
For large spills absorb onto inert absorbent material and place in sealed container for disposal.

### **6.4. Reference to other sections**

See advice in section 8

## **SECTION 7: Handling and storage**

### **7.1. Precautions for safe handling**

Use only in well-ventilated areas.  
Prolonged or repeated skin contact should be avoided to minimise any risk of sensitisation.

#### **Hygiene measures:**

Good industrial hygiene practices should be observed.  
Do not eat, drink or smoke while working.  
Wash hands before work breaks and after finishing work.

### **7.2. Conditions for safe storage, including any incompatibilities**

Ensure good ventilation/extraction.  
Store in a cool, well-ventilated place.

### **7.3. Specific end use(s)**

Adhesive

**SECTION 8: Exposure controls/personal protection****8.1. Control parameters****Occupational Exposure Limits**

Valid for  
Great Britain

| Ingredient        | ppm | mg/m <sup>3</sup> | Type                                 | Category                             | Remarks  |
|-------------------|-----|-------------------|--------------------------------------|--------------------------------------|----------|

|-------------------------|---------------------|----------------------|--|------------------|------------------|---------|
| Maleic acid<br>110-16-7 | worker              | Dermal               | Acute/short term<br>exposure - local<br>effects    |                  | 0,55 mg/cm2      |         |
| Maleic acid<br>110-16-7 | worker              | Dermal               | Long term<br>exposure - local<br>effects           |                  | 0,04 mg/cm2      |         |
| Maleic acid<br>110-16-7 | worker              | Dermal               | Acute/short term<br>exposure -<br>systemic effects |                  | 58 mg/kg bw/day  |         |
| Maleic acid<br>110-16-7 | worker              | Dermal               | Long term<br>exposure -<br>systemic effects        |                  | 3,3 mg/kg bw/day |         |

**Biological Exposure Indices:**

None

**8.2. Exposure controls:****Respiratory protection:**

Ensure adequate ventilation.

An approved mask or respirator fitted with an organic vapour cartridge should be worn if the product is used in a poorly ventilated area

Filter type: A

**Hand protection:**

Chemical-resistant protective gloves (EN 374).

Suitable materials for short-term contact or splashes (recommended: at least protection index 2, corresponding to > 30

minutes permeation time as per EN 374):

nitrile rubber (NBR;  $\geq 0.4$  mm thickness)

Suitable materials for longer, direct contact (recommended: protection index 6, corresponding to > 480 minutes permeation time as per EN 374):

nitrile rubber (NBR;  $\geq 0.4$  mm thickness)

This information is based on literature references and on information provided by glove manufacturers, or is derived by analogy with similar substances. Please note that in practice the working life of chemical-resistant protective gloves may be considerably shorter than the permeation time determined in accordance with EN 374 as a result of the many influencing factors (e.g. temperature). If signs of wear and tear are noticed then the gloves should be replaced.

**Eye protection:**

Wear protective glasses.

**Skin protection:**

Wear suitable protective clothing.

**SECTION 9: Physical and chemical properties****9.1. Information on basic physical and chemical properties**

|  |                                    |

**9.2. Other information**

No data available / Not applicable

**SECTION 10: Stability and reactivity****10.1. Reactivity**

Peroxides.

**10.2. Chemical stability**

Stable under recommended storage conditions.

**10.3. Possibility of hazardous reactions**

See section reactivity

**10.4. Conditions to avoid**

No decomposition if used according to specifications.

**10.5. Incompatible materials**

See section reactivity

**10.6. Hazardous decomposition products**

carbon oxides.

**SECTION 11: Toxicological information****11.1. Information on toxicological effects****General toxicological information:**

The mixture is classified based on the available hazard information for the ingredients as defined in the classification criteria for mixtures for each hazard class or differentiation in Annex I to Regulation 1272/2008/EC. Relevant available health/ecological information for the substances listed under Section 3 is provided in the following.

**Oral toxicity:**

May cause irritation to the digestive tract.

**Inhalative toxicity:**

May cause respiratory irritation.

Due to the low volatility of the product there are no hazards associated with inhalation under normal conditions of use

**Skin irritation:**

Causes skin irritation.

**Eye irritation:**

Causes serious eye irritation.

**Sensitizing:**

May cause an allergic skin reaction.

**Acute oral toxicity:**

| Hazardous components<br>CAS-No. | Value<br>type | Value     | Route of<br>application | Exposure<br>time | Species | Method |
|---------------------------------|---------------|-----------|-------------------------|------------------|---------|--------|
| Cumene hydroperoxide<br>80-15-9 | LD50          | 550 mg/kg | oral                    |                  | rat     |        |

**Acute inhalative toxicity:**

| Hazardous components<br>CAS-No. | Value<br>type | Value | Route of<br>application | Exposure<br>time | Species | Method |
|---------------------------------|---------------|-------|-------------------------|------------------|---------|--------|
|---------------------------------|---------------|-------|-------------------------|------------------|---------|--------|

**Acute dermal toxicity:**

| Hazardous components<br>CAS-No. | Value<br>type | Value | Route of<br>application | Exposure<br>time | Species | Method |
|---------------------------------|---------------|-------|-------------------------|------------------|---------|--------|
|---------------------------------|---------------|-------|-------------------------|------------------|---------|--------|

**Skin corrosion/irritation:**

| Hazardous components<br>CAS-No. | Result    | Exposure<br>time | Species | Method |
|---------------------------------|-----------|------------------|---------|--------|
| Cumene hydroperoxide<br>80-15-9 | corrosive |                  | rabbit  |        |

**Germ cell mutagenicity:**

| Hazardous components<br>CAS-No. | Result   | Type of study /<br>Route of<br>administration          | Metabolic<br>activation /<br>Exposure time | Species | Method  |
|---------------------------------|----------|--|--|---------|---|
| Cumene hydroperoxide<br>80-15-9 | positive | bacterial reverse<br>mutation assay (e.g<br>Ames test) | without                                    |         | OECD Guideline 471<br>(Bacterial Reverse Mutation<br>Assay) |
| Cumene hydroperoxide<br>80-15-9 | negative | dermal   |  | mouse   |   |

**SECTION 12: Ecological information****General ecological information:**

The mixture is classified based on the available hazard information for the ingredients as defined in the classification criteria for mixtures for each hazard class or differentiation in Annex I to Regulation 1272/2008/EC. Relevant available health/ecological information for the substances listed under Section 3 is provided in the following.

**12.1. Toxicity****Ecotoxicity:**

Do not empty into drains / surface water / ground water.

| Hazardous components<br>CAS-No.  | Value<br>type | Value      | Acute<br>Toxicity<br>Study | Exposure<br>time | Species                        | Method   |
|----------------------------------|---------------|------------|----------------------------|------------------|--------------------------------|--|
| Cumene hydroperoxide<br>80-15-9  | LC50          | 3,9 mg/l   | Fish                       | 96 h             | Oncorhynchus mykiss            | OECD Guideline<br>203 (Fish, Acute<br>Toxicity Test)                   |
| Cumene hydroperoxide<br>80-15-9  | EC50          | 18 mg/l    | Daphnia                    | 48 h             | Daphnia magna                  | OECD Guideline<br>202 (Daphnia sp.<br>Acute<br>Immobilisation<br>Test) |
| Cumene hydroperoxide<br>80-15-9  | ErC50         | 3,1 mg/l   | Algae                      | 72 h             | Pseudokirchnerella subcapitata | OECD Guideline<br>201 (Alga, Growth<br>Inhibition Test)                |
| Maleic acid<br>110-16-7          | LC50          | > 245 mg/l | Fish                       | 48 h             | Leuciscus idus                 |  |
| Maleic acid<br>110-16-7          | EC50          | 245 mg/l   | Daphnia                    | 24 h             | Daphnia magna                  |  |
| 1,4-Naphthalenedione<br>130-15-4 | EC50          | 0,011 mg/l | Algae                      | 72 h             | Dunaliella bioculata           | OECD Guideline<br>201 (Alga, Growth<br>Inhibition Test)                |

**12.2. Persistence and degradability****Persistence and Biodegradability:**

No data available.

| Hazardous components<br>CAS-No.  | Result                | Route of<br>application | Degradability | Method  |
|----------------------------------|-----------------------|-------------------------|---------------|---|
| Cumene hydroperoxide<br>80-15-9  |                       | no data                 | 0 %           | OECD Guideline 301 B (Ready<br>Biodegradability: CO2 Evolution<br>Test)                     |
| Maleic acid<br>110-16-7          | readily biodegradable | aerobic                 | 87 - 88 %     | EU Method C.4-E (Determination<br>of the "Ready"<br>Biodegradability Closed Bottle<br>Test) |
| 1,4-Naphthalenedione<br>130-15-4 |                       | no data                 | 0 - 60 %      |   |

**12.3. Bioaccumulative potential / 12.4. Mobility in soil****Mobility:**

Cured adhesives are immobile.

**Bioaccumulative potential:**

No data available.

| Hazardous components<br>CAS-No.                | LogKow | Bioconcentration<br>factor (BCF) | Exposure<br>time | Species     | Temperature | Method   |
|--|--------|----------------------------------|------------------|-------------|-------------|--|
| Cumene hydroperoxide<br>80-15-9                |        | 9,1                              |                  | calculation |             | OECD Guideline 305<br>(Bioconcentration: Flow-<br>through Fish Test) |
| Cumene hydroperoxide<br>80-15-9                | 2,16   |                                  |                  |             |             |  |
| Maleic acid<br>110-16-7                        | -0,48  |                                  |                  |             |             |  |
| Acetic acid, 2-<br>phenylhydrazide<br>114-83-0 | 0,74   |                                  |                  |             |             |  |
| 1,4-Naphthalenedione<br>130-15-4               | 1,71   |                                  |                  |             |             |  |

**12.5. Results of PBT and vPvB assessment**

| Hazardous components<br>CAS-No. | PBT/vPvB  |
|---------------------------------|---|
| Maleic acid<br>110-16-7         | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very Bioaccumulative (vPvB) criteria. |

**12.6. Other adverse effects**

No data available.

**SECTION 13: Disposal considerations****13.1. Waste treatment methods****Product disposal:**

Dispose of in accordance with local and national regulations.

Contribution of this product to waste is very insignificant in comparison to article in which it is used

**Disposal of uncleaned packages:**

After use, tubes, cartons and bottles containing residual product should be disposed of as chemically contaminated waste in an authorised legal land fill site or incinerated.

Disposal must be made according to official regulations.

**Waste code**

08 04 09 waste adhesives and sealants containing organic solvents and other dangerous substances

#### SECTION 14: Transport information

**14.1. UN number**

Not hazardous according to RID, ADR, ADNR, IMDG, IATA-DGR.

**14.2. UN proper shipping name**

Not hazardous according to RID, ADR, ADNR, IMDG, IATA-DGR.

**14.3. Transport hazard class(es)**

Not hazardous according to RID, ADR, ADNR, IMDG, IATA-DGR.

**14.4. Packaging group**

Not hazardous according to RID, ADR, ADNR, IMDG, IATA-DGR.

**14.5. Environmental hazards**

Not hazardous according to RID, ADR, ADNR, IMDG, IATA-DGR.

**14.6. Special precautions for user**

Not hazardous according to RID, ADR, ADNR, IMDG, IATA-DGR.

**14.7. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code**

not applicable

#### SECTION 15: Regulatory information

**15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture**

VOC content < 3 %  
(1999/13/EC)

**15.2. Chemical safety assessment**

A chemical safety assessment has not been carried out.

## SECTION 16: Other information

The labelling of the product is indicated in Section 2. The full text of all abbreviations indicated by codes in this safety data sheet are as follows:

R10 Flammable.  
R21/22 Harmful in contact with skin and if swallowed.  
R23 Toxic by inhalation.  
R25 Toxic if swallowed.  
R26 Very toxic by inhalation.  
R34 Causes burns.  
R36/37/38 Irritating to eyes, respiratory system and skin.  
R37 Irritating to respiratory system.  
R43 May cause sensitisation by skin contact.  
R48/20/22 Harmful: danger of serious damage to health by prolonged exposure through inhalation and if swallowed.  
R50/53 Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.  
R51/53 Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.  
R65 Harmful: may cause lung damage if swallowed.  
R7 May cause fire.  
H242 Heating may cause a fire.  
H301 Toxic if swallowed.  
H302 Harmful if swallowed.  
H312 Harmful in contact with skin.  
H314 Causes severe skin burns and eye damage.  
H315 Causes skin irritation.  
H317 May cause an allergic skin reaction.  
H319 Causes serious eye irritation.  
H330 Fatal if inhaled.  
H331 Toxic if inhaled.  
H332 Harmful if inhaled.  
H335 May cause respiratory irritation.  
H351 Suspected of causing cancer.  
H373 May cause damage to organs through prolonged or repeated exposure.  
H400 Very toxic to aquatic life.  
H410 Very toxic to aquatic life with long lasting effects.  
H411 Toxic to aquatic life with long lasting effects.

### Further information:

This information is based on our current level of knowledge and relates to the product in the state in which it is delivered. It is intended to describe our products from the point of view of safety requirements and is not intended to guarantee any particular properties.
