

# Atmel Debug Shield Adapter

Part Number: ATARD-DBGADPT

## Accessory Type

Debug Shield Adapter

## For Use With

Arduino boards and shields

## Description

Debug Adapter Shield is compatible with Arduino boards and shields, which is used to program and debug Arduino boards using IDE's like Atmel Studio. This board brings out the JTAG pins available in Arduino boards to the standard 2x5 AVR debug headers which is used in debuggers like Atmel-ICE or JTAGICE3.
