Handling of WAGO Connection Technologies*

CAGE CLAMP® S

Universal connection with "SPECIAL"

Handling:

Open the clamp, insert wire and release the clamp – done! Solid conductors and fine-stranded conductors with ferrules are connected by simply pushing them in – no operating tool needed.

CAGE CLAMP®

Universal connection of solid, stranded and fine-stranded conductors

Handling:

Open the clamp, insert wire and release the clamp – done!

POWER CAGE CLAMP®

Universal connection of conductors larger than 6 AWG (16 mm²)

Handling:

- To open the clamp with a standard hex wrench or operating tool, and turn approximately twice counter-clockwise.
- Latch holds clamp open.
- Insert conductor.
- A small counter-clockwise rotation releases the latch.

FIT CLAMP®

Insulation displacement connection (IDC)

Handling:

Push unstripped conductor into the IDC contact using an operating tool.

PUSH WIRE®

PUSH WIRE® connection for solid wires and stranded wires (depending on product used)

Handling:

Solid and stranded conductors that are rigid enough are connected by simply pushing them in – no operating tool needed.

* Please follow the product instructions for product-specific handling.

Sockets with Industrial Relay
858 Series

Nowadays when equipment is designed many scenarios need to be considered. Some of which are user and maintenance friendly, limited budgets, safety, availability, space requirements and simplicity in design and usage.

WAGO AUTOMATION offers interface modules in various shapes and sizes to overcome any of the restraints posed by space requirements.

This enables any demands and needs to be fulfilled using these different designs, such as pluggable function and interface modules, relay and optocoupler modules, etc.

788 Series Relay Sockets with Pluggable Miniature Switching Relay

The WAGO Series 788 relay socket forms an excellent basis for switching applications using pluggable miniature switching relays (1 or 2 changeover contacts) in industrial and process automation.

Relay socket with pluggable miniature switching relay

In addition to its compact design 15x53x86mm (W x H x D), the relay socket also stands out thanks to a number of user-oriented features, with the associated benefits for the user.

The lever facilitates relay replacement even when the relay sockets are placed close to each other.

The sockets can be ordered as complete components including relay and status indication or as a single component.

857 Series Transducers and Relay Modules

Transducers and relay modules

286 / 786 Series Pluggable Function Modules

Pluggable function modules

The new 6mm-wide WAGO isolation amplifiers and transducers not only share a common profile, but in addition one in line jumper can be used to connect the supply voltages, etc, to all modules, doing away with the need to wire each connection. The smaller relay modules also fit perfectly in this scenario. The pluggable relays can simply be replaced from the top.

The terminal blocks for pluggable modules offer the greatest degree of flexibility and maintenance-friendly service. The terminal block for pluggable modules is mounted on the carrier rail and wired like a normal terminal block. If service is required, this element can be replaced in one step, without having to deal with the system wiring. This saves space and additional wiring effort.

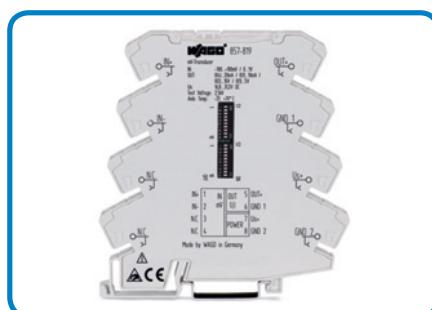

Relay module with pluggable miniature switching relay

Pluggable function modules

In order to cover all application areas with one product family, it is intended to offer five different groups for the transducers alone: these include fixed and configurable isolating amplifiers, passive isolators, power supply isolators (also for HART applications), signal duplicators and temperature transducers for Pt100 and thermocouples.

The optocoupler and relay modules are ideal additions to a comprehensive function module program, allowing any required functions to be implemented in a control cabinet by means of a pluggable module system. Large enclosures of the Series 786 are available for more complex functions, such as transducers.

Transducer

Pluggable signal conditioning modules

789 Series Relay Modules in DIN-Rail-Mountable Enclosure

The range of uses for the WAGO latching relays and switching relays of Series 789 spans from simple lighting controls in building services, such as in construction of apartments, hotels, office buildings or parking garages, etc., up to installations in industrial control cabinets.

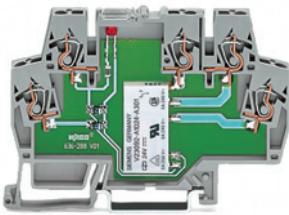

The 17.5mm-wide design in series bay enclosures is particularly well-suited for installation in distribution boards and meter mounting boards.

859 Series Relay Modules and Optocoupler Modules

The Series 859 is a complete product series that is ideal for the interface level in any industrial application, thanks to the wide range of relays and optocouplers.

287 / 288 Series DIN-Rail-Mountable Modules - Relay Modules and Sockets

The relay and PLC interface modules in the mounting socket that can be fitted on carrier rails ensure quick and easy linking of signals from periphery devices. The fully wired modules, with up to 16 high-performance relay outputs, provide for direct switching of actuators and other coupling elements in the field.

Relay module

These units excel in tight spaces, thanks to their narrow 6mm design. Simple commoning at the control and load side enables quick and easy looping through of common input and output potential.

DIN-rail-mountable modules - relay modules

The requisite free-wheeling and reverse voltage protection diodes are also integrated to ensure a long service life of the products.

Other interface modules available as:

Multiple modules with plugged relays

that are easy to replace, without affecting existing wiring.

Relay modules in DIN-rail-mountable enclosure

The series bay enclosures are used for installation of other electronics devices having a large scope of functions and higher switching capacities; these come in sizes of
2 module spaces (35mm) and
4 module spaces (70mm).

Optocoupler module

Its robust design and the shock-proof CAGE-CLAMP® connecting technology used ensures continuous and uninterrupted operation of any kind of system.

DIN-rail-mountable modules - relay modules

EnOcean radio receiver in DIN-rail-mountable enclosure

PCB terminal blocks and connectors from the extensive WAGO program can be installed in the enclosures to obtain customized development of interface components.

Installation is quick and reliable on the 35mm carrier rail.

Relay socket

WAGO Transducers and Relay Modules

JUMPFLEX®, 857 Series

The perfect match of housing and electronics is the key to a highly successful device. This is exactly what has been achieved by WAGO with the transducers and relay modules of the 857 Series.

Analog systems technology – Basics

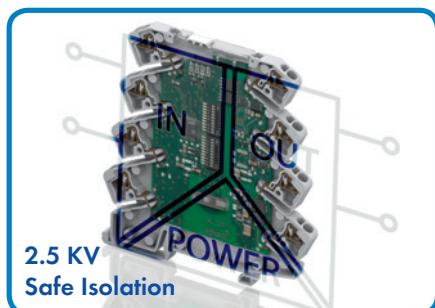

Problems can arise in signal processing in industrial systems of analog standard signals (such as 0-10V or 0-20mA) which can have an adverse effect on overall fault-free signal processing. Problems such as potential differentials arising from interlinked measuring circuits can be efficiently prevented using WAGO transducers, with their associated electrical isolation.

Decoupling (Isolation) methods

A basic distinction is made between active and passive isolation.

Active isolation

Depending on the design and model in use, devices are available that incorporate electrical 3-way isolation. 4-way isolation is provided in a signal duplicator. This means that all inputs, outputs and supply circuits are electrically isolated from one another with a 2.5 kV proof voltage.

This ensures that the greatest possible safety and reliability is achieved for the system and any devices connected to the system. For 3-way isolation provides for electrical isolation between the transducers and the control system and between the control system and the control elements.

At the input side the devices required active signals, i.e., the sensor signal is generated by a dedicated supply voltage.

These devices provide a filtered and amplified signal at the output side.

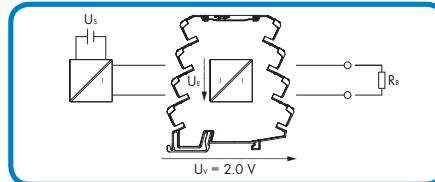

Passive isolation

A passive isolator draws power for signal transmission from the input circuit. In this case, the sensor must supply a power level adequate for the device and must also drive the working resistance.

As a result, it must be ensured that the current-driving power of the sensor is sufficient to drive the maximum current of 20mA via the passive isolator (with the device-specific voltage drop), as well as the working resistance.

This can be calculated using the following equation:

$$US \geq UE = UV + 20 \text{ mA} \times RB$$

Typical equation for a passive isolator (857-451) for a 20mA signal.

$$US \geq UE = 2.0 \text{ V} + 20 \text{ mA} \times 600 \Omega$$

$$US \geq UE = 14 \text{ V}$$

Temperature measuring techniques

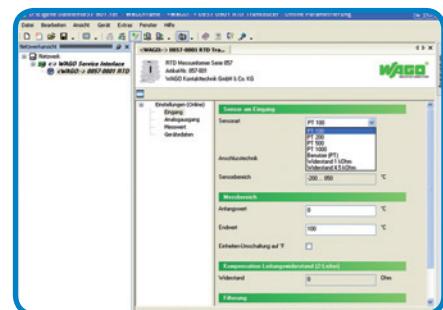

Resistance thermometers, such as Pt100 sensors, alter their resistance level as a function of temperature. For example, a rise in temperature will result in an increase in the resistance level. This resistance level is registered by the JUMPFLEX® devices (for example 857-800) and transformed into an analog output signal and simultaneously electrically isolated using a 2.5kV proof voltage.

The analog standard signal can be a current signal in the 0-20 mA, 4-20 mA, 0-10 mA or 2-10 mA range, or a voltage signal in the 0-10 V, 2-10 V, 0-5 V or 1-5 V range.

Parameterization, commissioning and diagnostics using WAGO-frame

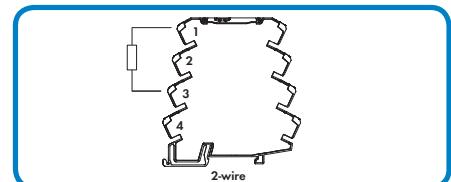

A portion of the JUMPFLEX® transducer can be configured for parameterization, commissioning and diagnostics of field devices using WAGOframe, a software based on the FDT/DTM standard.

The WAGOframe FDT frame application provides a wizard, which simplifies the operation of components, such as WAGO JUMPFLEX® DTM. This wizard guides the user through the different operating modes of DTM device drivers.

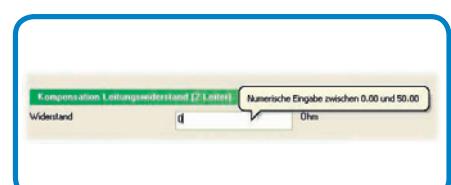

3 different connecting techniques are employed for acquisition of resistance thermometers:

2-wire connecting technique

The resistance thermometer is connected to the JUMPFLEX® transducer via a two-wire conductor. As the feed-in resistance can directly affect results, which would invalidate them, it must be ensured that the distance between the measuring point and the device is kept as small as possible. This distance should not exceed 10m in this case. If this distance can not be ensured, the 857-801 unit can be used to provide compensation for the incoming resistance using the configuration software.

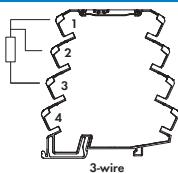

Compensation for line resistance (2-wire)

A resistance value can be input into this field for compensation of the line resistance for 2-wire sensors within a range of 0-50 Ω .

Adjusting the values for resistance compensation is only possible by setting the sensor wire connection to 2-wire. Otherwise the field is displayed in gray and no values can be entered. Using 3- and 4-wire sensors, the input cable resistance is compensated via the connection technology and does not enter into the measuring results.

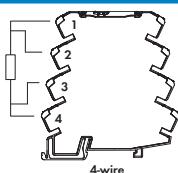

3-wire connecting technique

The 3-wire connecting technique minimizes the effect of line resistance. The resistance thermometer is gauged via two measuring circuits implemented in the JUMPFLEX® transducer. One measuring circuit serves as the reference circuit. Line resistance can be compensated for in this manner.

The measuring results can, however, nevertheless be affected by different line lengths or by different ambient temperatures. No further line adjustment is usually necessary, as the same line lengths and the same ambient temperatures exist in most cases.

4-wire connecting technique

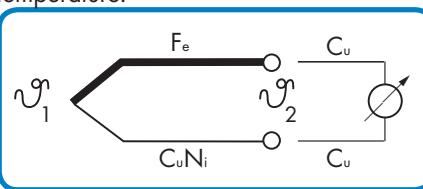

The most accurate measuring method employs the 4-wire connecting technique. This involves feeding in a low supply current via two fully isolated measuring circuits via two lines and measuring the voltage drop across the resistance thermometer via the other two lines. This method offers the advantage not being influenced by line resistance or temperature-induced fluctuations, as the voltage

drop for the incoming and outgoing lines can be measured separately and compensation provided for as required. Again, no line adjustment is required here.

Thermocouples

In contrast to resistance thermometers, thermocouples are active sources that generate output in the microvolts range. Thermocouples have very low resistance and are therefore noise-free. Preferred applications include tasks in environments with high temperatures, such as in ovens or machines in the plastics industry.

The joining of two different materials at the thermocouple results in different energy of formation of the metal atom electrons, yielding a thermoelectric voltage. The level of this thermoelectric voltage is a function of the material and of temperature.

If the temperature at measuring point θ_1 is the same as the temperature at reference point θ_2 , no current will flow, as the two component voltages cancel one another out. However, if the temperatures at the measuring point and at the reference point are different, differing voltage levels are produced which do not completely cancel one another out, resulting in a flow of current.

To summarize then, a thermocouple only measures a difference in temperature. This is yielded from the difference between the thermoelectric voltage levels at the measuring point and at the reference point. The voltage fluctuation produced by the thermoelectric effect is very low and is generally only a few microvolts per Kelvin. Therefore, only the difference between the thermoelectric voltages of the materials used is of significance, for example, thermocouple type J, iron (Fe) and constantan (CuNi).

Also of some significance in the connection point temperature. This temperature must be known in order to derive the ambient temperature from the thermoelectric voltage level. This is why the temperature at the connection point is measured by JUMPFLEX® transducers. This value, also referred to as the reference or cold junction, can then be compensated for. (cold junction compensation)

Cold-junction compensation can be acti-

vated and de-activated just by a click using the configuration software (default setting: ON (activated)).

Table for Thermocouples

Relay modules with mounted miniature switching relays

The JUMPFLEX® product family is rounded out by the relay modules that fit perfectly with the transducers.

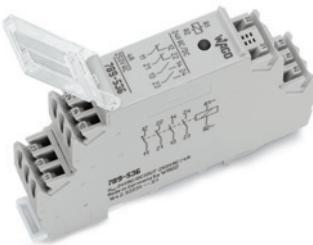

A logical enclosure concept with options for linking all levels offers a variety of synergy and cost-savings potential. This allows for efficient optimization of installation efforts.

The pluggable relays can be replaced quickly and easily when required.

For further information about the relays go to pages 10 - 12.

WAGO Relay Modules

WAGO Relay Modules. The professional interface between electronics and peripheral equipment.

Even in modern automation systems, electromechanical relays guarantee a safe connection between process control systems and process and signalling systems. They provide:

- a high isolation level between input and output circuit
- ability to match different signal levels
- signal amplification and/or signal multiplication, especially for different potentials in the input and output circuits.

Modernized relays also offer the following advantages:

- unaffected by electromagnetic fields and surges
- high short-term overload capacity for the input and output sides
- small switching power losses
- a module for switching of AC or DC

WAGO AUTOMATION offers a complete range of relay modules that provide these functions for a wide range of applications.

Depending on the function and operating conditions, the relay modules are available with different contacts, contact materials, housings and shapes.

The following relay types are also available: bistable switching relays, time-delay relays, current pulse switching and safety relays with force-guided contacts.

Definitions of several important technical terms

Coil-side information

The relays can be used within the stated temperature range with nominal voltage plus tolerance at 100% continuous duty rating.

According to the type and application, the relays are triggered with DC or AC signal.

The DC versions (residual ripple $\leq 6\%$) are, unless otherwise stated, equipped with LED function indicators, a recovery diode and a reverse voltage protection diode.

AC versions of select relays equipped with series connected rectifiers (refer to the wiring diagrams) can be triggered with AC and DC at the stated nominal voltage.

The free-wheel function is in this case actuated by the rectifier.

In order to guarantee a safe operation it has to be observed that "residual voltages" due to cable capacitance in case of long connecting lines or leakage currents of semi-conductor switches and their protection circuits are lower than the release voltage of the relay.

For DC relays, the release voltage is specified with a value of $\leq 5\%$ of the nominal voltage;

for AC relays it is 15% of the nominal voltage (acc. to VDE 0435).

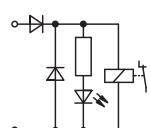

If a high residual voltage exists, it is possible that the relay will not reset.

Addition of a parallel connection of an RC element of:

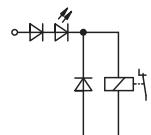

$$R = 100-220\Omega$$

$$C = 220-470\text{nF}$$

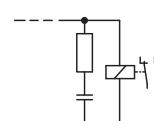

could remedy this situation.

For a nominal voltage of $\leq 12\text{VDC}$, the LED is connected in parallel to the coil.

For a nominal voltage $\geq 24\text{VDC}$, the LED is connected in series with the coil.

Alternatively, the 286-904 relay module is available.

This specially developed module features a defined release point at $110\text{VAC} \pm 10\%$ at an operating voltage (coil voltage) of 230 VAC.

Contact material

To ensure a long service life and low contact resistance, various materials may be used for relay contacts (depending on the load type, switching current, voltage and duty cycle).

Possible materials, their properties and advantages are shown in the table.

Contact material	Properties and use	Range of values
Ag Ni 0.15 + 5 µ Au	High corrosion resistance, low and constant contact resistance at small power ratings, for dry circuits	µV . . . 30 V µA . . . 0.2 A
Ag Ni plated with Au Ag + Au	Same properties as a 5 µ gold contact, however with five times greater resistance to wear, for all circuits from the µW range up to 100 W/1 kVA	100 mV/10 µA
Ag Cd 0 + 1 µ Au	Low tendency to contact weld, high resistance to contact burn-out at higher power rating, also suitable for lower power ratings	≥ 5 V ≥ 10 mA
Ag Cd 0, with gold flash	Low tendency to contact weld, high resistance to contact burn-out at higher power rating, with gold flash for additional protection during storage	≥ 12 V ≥ 100 mA
Ag Ni 0.15 + HV	High mechanical strength, low tendency to contact weld and low contact resistance, universal application at medium loads	≥ 12 V 5 mA - 10 A
Ag Sn O ₂	Small tendency to contact weld, high resistance to contact burn-out at higher power rating, small migration of material, for circuits with high input and output ratings, DC circuits	≥ 5 V/100 mA ≥ 10 V/10 mA ≥ 24 V/1 mA
Ag alloy, with gold flash	High mechanical strength, small tendency to contact weld, wide scope of application for low to medium ratings	10 ⁻³ W

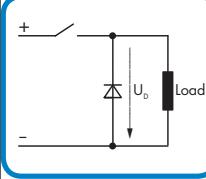

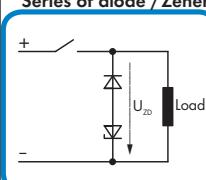

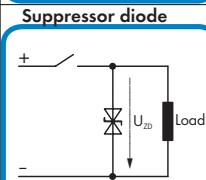

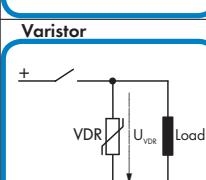

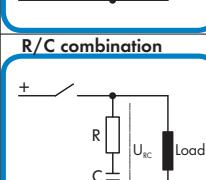

Contact switching protection

When switching inductive loads (e.g., for contractors or solenoid valves) transients with peak voltages up to thousands of volts will arise.

Suppression is necessary as these transients frequently exceed admissible EMC limits.

Moreover, they cause electric arcs at the switching contact that destroy the contact and significantly reduce the relay's service life and functional safety.

In practical use the following switching protections, which are connected directly at the source in parallel to the load, have proved to be efficient:

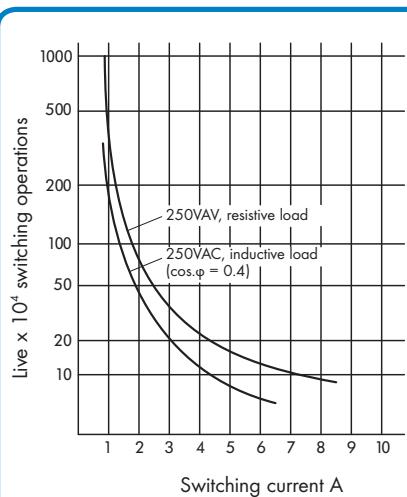

Switching of load	Additional off-delay	Defined limitation of inductive voltage	Attenuation when used with bipolar circuits	Advantages / disadvantages
Circulating diode 	large	yes (V_D)	no	Advantages: <ul style="list-style-type: none">simple devicecost-effective, reliablesizing not criticalsmall inductive voltages Disadvantages: <ul style="list-style-type: none">limit only via load resistancelonger turn-off time

WAGO Relay Modules

Service life

The difference between mechanical life and electrical life must be distinguished. Mechanical life consists the amount of switching operations without contact load; electrical life at maximum load refers to the amount of switching operations with maximum switching capacity and resistive load.

Smaller switching capacities increase the operation at maximum load. The following illustration shows the typical course between switching current and relay's operational life.

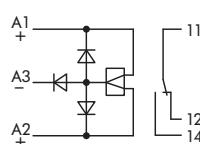

More details upon request.

Description of select relays

Bistable switching relays

Bistable switching relays have 3 coil contacts. According to the wiring scheme, the relay is switched into "working condition" (contacts 11–14 closed) by the common connection A 3 and the connection A 1 and into "rest position" (contacts 11–14 opened) by the connection A 2.

After removing the control signal, the relay returns to its respective position and can only be switched over by a control signal circuit. The bistable switching relays are only available for direct voltage with positive or negative triggering.

Current pulse switching relay

One current pulse is needed to change the relay from the rest position to the working position and vice versa.

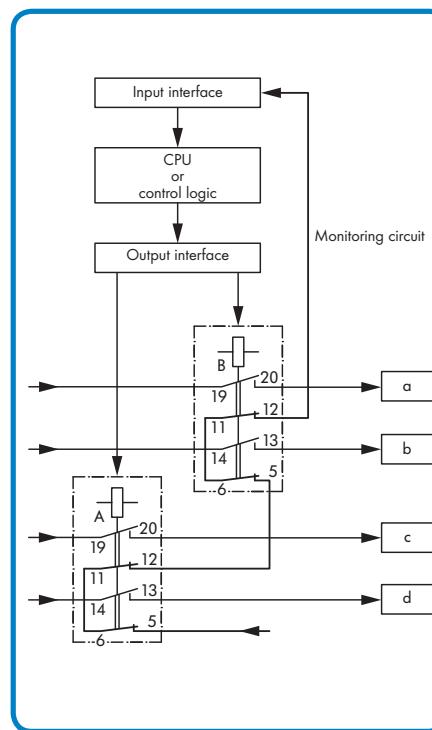

During the triggering process, one of two status indicators displays the actual contact position. The current pulse switching relay is available for direct and alternating voltage.

Safety relay

Force-guided safety relays have become increasingly recommended and specified for self-regulated systems as they provide protection for personnel, machines and installations. Relays with force-guided contacts are an essentially safety component for these circuits, particularly when defects occur. WAGO offers these functions in special relay modules with force-guided contacts as based on ZH1/457

(Specification of the employer's liability insurance association).

Example of circuit configuration:

Control of different peripheral equipment (a, b, c, d) with monitoring

As shown in the fig. "Example of Circuit Configuration," two SF relays are controlled by one output interface. The NO contacts 13–14/19–20 of relay A and B switch over the peripheral equipment. After switching off equipment a ... d the control circuit (NC contacts 5–6/11–12) verifies that all main circuits are interrupted.

When the control circuit is closed, the next operation cycle will be executed by the CPU or by the control logic. Depending on the safety requirements, an open control circuit prevents operation of either the entire machine or specified components.

If a partial or complete standstill is required in the event of a failure (for ex. in medical technology or chemical processes) each control contact can be polled and evaluated.

Independent of a single or complete control for the NO contact, the SF relay operates in such a way that the other equipment is switched off even if a NO contact is welded. The failure is recognized by the control contact while the other contacts are still able to open to interrupt circuits.

Time delay relays

WAGO time delay relay modules are electromechanical time relays with an integrated time response, e.g., acc. to VDE 0435, part 201/5.83.

The time ranges can be adjusted via potentiometer for either continuously variable or linear operation. A status LED indicates the switching condition of the relay.

WAGO Optocouplers

WAGO optocouplers: the modern and efficient alternative

As the connecting element between process interface and electronic control and signalling systems, the optocoupler modules offer the following advantages compared with mechanical relays:

- long service life, because there is no mechanical wear
- high switching frequency because of fast switching times
- unaffected by vibrationn
- no contacts
- "noiseless" switching
- low driving capacity.

For all interfaces between control and load circuits that rely on these advantages, WAGO AUTOMATION offers a complete optocoupler range for the following functions:

- electrical isolation between input and output circuit
- adaptation to different signal levels
- signal amplification.

The optocoupler modules are available in WAGO's component plug technology that is designed to plug directly into rail-mounted carrier terminal blocks.

The terminal blocks are fitted to the carrier rail and offer all advantages of CAGE CLAMP® technology, which provides safe and maintenance-free connection of the signal wires for cross sections ranging from 0.08 mm² to 2.5 mm²/ AWG 28-12.

In addition to optimizing space through the combination of terminal points and the "function module," maximum flexibility and ease of service are also achieved.

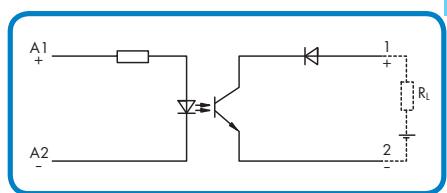

Input circuit

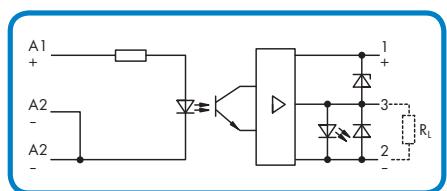

According to the type, triggering the optocoupler modules is performed via direct voltage (residual ripple RR <6%) or AC voltage (50–60 Hz).

In the DC type, a reverse voltage protection diode is always provided; in the AC type optocoupler element, a rectifier is included.

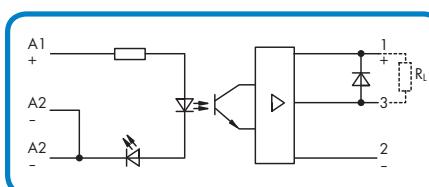

The optocoupler modules are equipped with a LED function indication at either the input side or at the load side, as shown in the wiring diagram.

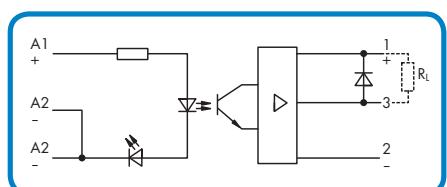

2-wire output

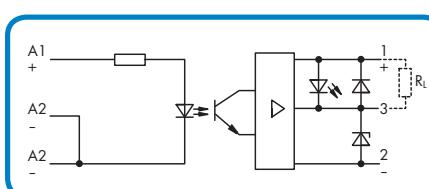

3-wire output positive switching

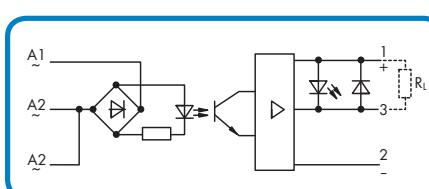

DC triggering with LED function indication in the triggering circuit

3-wire output negative switching

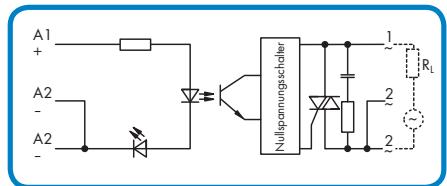

DC triggering with LED function indication in the load circuit

AC triggering with LED function indication in the load circuit

In addition to these different functional outputs, the output voltage range and the maximum switching current must be observed. Also note the correct polarity. In order to protect the output transistors, inductive loads must always be equipped with a protective circuit, e.g., a recovery diode. For other types of protective measures, the cut-off voltage peaks must be lower than the indicated cut-off voltage of the output transistors. For the AC outputs a Triac is used as the switching element.

In order to avoid high turn-on currents, the AC output is equipped with a zero-voltage switch which turns on the load at the zero-voltage point. In the current zero-crossing, the Triac will cut off the load, in case inductive loads do not exceed the maximum switching voltage and the maximum switching current.

Output circuit

Depending on the application, an optocoupler module for the AC or DC supply may be chosen. In the case of DC outputs, they can be:

- 2-wire output
- 3-wire output positive switching
- 3-wire output negative switching.

WAGO Analog Signal Conditioning Modules

Transducers for measurement technology

The Recording and processing of numbers of physical values, such as temperature, pressure, speed, humidity, etc., form the basis for modern process control. Special sensors supply these values as analog signals, which must be transmitted as standard analog signals to the processing instruments. These analog signals may be transmitted over long or short distances between sensors and controlling mechanisms, for example PLCs and computers, or in less sophisticated systems directly to relays or actuators. Various standards are used. Normally recognized signals are 0-10 V, 0-20 mA and 4-20 mA.

The transducer/transmitter may also linearize non-linear signals internally, before transmission. In order to prevent these relatively low power signals from distortion, WAGO AUTOMATION offers a complete range of modules for measurement and transmission of these signals, both with and without isolation between the module's input/output and the supply voltage (if necessary). Apart from the converters for various standardized signals, WAGO offers a complete selection of analog/digital and digital/analog converters with a resolution of 10 bits.

The electronics are protected by an enclosure which can be snapped on a DIN 35 rail. The CAGE CLAMP® connection ensures a secure, maintenance-free connection for conductors sized from 0.08 mm² to 2.5 mm²/AWG 28-12.

Temperature transducers

Temperature sensing in the process industry is traditionally performed via "Thermocouple" or "RTD" (Platinum Resistance) elements. A popular RTD is the Pt100 element. Having a nominal resistance of 100 ohm at 0°C, and a typical operating temperature range of -200°C to +650°C, its non-linear characteristics are compensated by the WAGO signal conditioning module, as the Pt100 element typically meets the IEC 60571 specification.

The WAGO Pt100 signal conditioning module is suitable for 2- or 3-wire RTD, with 3-wire RTDs offering greater accuracy over longer distances. Thermocouples consist of two different metals that are connected at the measuring point and utilize of the "Dissimilar Metal (EMF) effect", which can be measured at the open ends of an element.

WAGO analog signal conditioning modules are designed to work with common types of "J" (Iron/Constantan) and "K" (Chromel/Alumel) thermocouples, which comply with IEC standard 60584 Pt. 1, with cold junction compensation. WAGO temperature transducers are available with industry standard output signals of 0-10 V, 0-20 mA or 4-20 mA.

Additionally, they have an integral wire break/short circuit detection. Visual LED fault indication is standard, but the WAGO modules also include an error output signal that may be used to initiate a safe shutdown before serious damage occurs in the event of a wire break or short circuit of the measuring sensor.

For this purpose, a transistor switches the output as soon as the operating voltage is correct and no error is present in the measuring circuit on VB-2V. The transistor blocks the output in the case of an error.

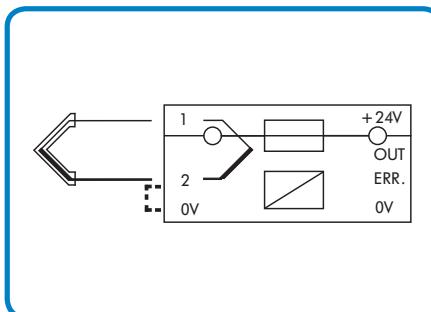

WAGO temperature transducers are available as follows:

- The "wire break" and "short circuit" error output is available on the Pt100 module.
- The "wire break" function is available on the J and K Thermocouple modules.

In the event of wire break, the outputs switch to the following values:

Output	Value
0(4)-20mA	≥20.5mA
0-10V	≥14V

With Pt100 modules, and in case of short circuit, the outputs switch to 0V or 0mA, respectively.

- When using insulated thermocouples, terminal "2" has to be connected to 0 V.
- In the case of grounded (earthed) thermocouples, the design is such that terminal 2 is already connected to 0 V inside the thermocouple element. Therefore, it is not necessary to jumper 2 → 0 V.
- For commoning 2 → 0 V, 4-wire base terminals are recommended.

The mechanical assembly of pluggable modules for rail-mounted terminal blocks on DIN 35 rails offers all the advantages of CAGE CLAMP® connectivity. Additionally, the separation of wiring and function levels offer maximum flexibility and ease of service.

WAGO Interface Modules

WAGO Interface Modules

Interface modules connect electronic to electromechanical functions at the control level.

They connect:

- signal transmission,
control system ↔ field
- signal distribution,
control system ↔ field.

They allow prefabricated plugs to interface to discrete field wiring.

WAGO AUTOMATION offers a wide range of interface modules for commonly used connector types. The use of these interface modules offers the following advantages in the system wiring:

- easy and time-saving planning and calculations
- rapid wiring, starting and fault elimination by clearly arranged wiring and clear pole marking, reduction of wiring faults
- safe and maintenance-free connection of the signal lines with the CAGE CLAMP® terminal strips
- high packing density creates space-saving modules

The interface modules are standard in a universal mounting carrier for DIN 35 carrier rails with the following connectors:

Subminiature-D connectors acc. to DIN 41 652 or MIL-C-24308

Interface modules for male and female connectors are available with 9, 15, 25, 37 or 50 contacts. Compared with the standard solder connection, the mating connector with IDC connection offers additional advantages.

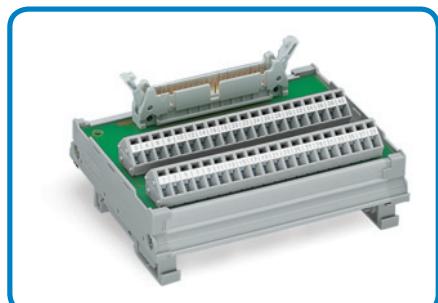

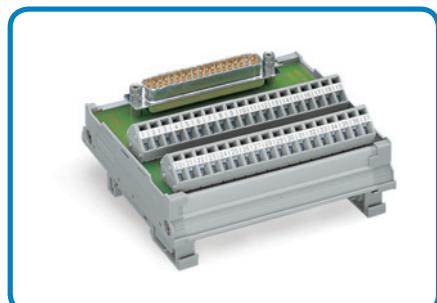

Connectors acc. to IEC 60603/DIN 41 612, types C, E and F

These connectors are frequently used for compact input and output component groups and are available for 32-, 48- and 64-pole pin and socket connectors, as well as for mating connectors with solder and IDC contacts.

Ribbon cable connectors acc. to IEC 60603-1 / DIN 41 651 or MIL-C-83503

Interface modules with 10-, 14-, 16-, 20-, 26-, 34-, 40-, 50- and 64-pole connectors are available for ribbon cable connectors.

WAGO EPSITRON – 787 Series

High-Performance and Efficient Advanced Power Supplies

PRO Power Supplies

Slimline, 1- and 3-phase, primary switch mode power supplies feature a wide input voltage range, stabilized, adjustable 24VDC output voltage and up to 93% high efficiency. An integrated Power-Boost (up to 200 % output power for 4 seconds) allows reliable starting of heavy loads with high inrush currents, eliminating expensive oversizing of the switch mode power supply. The TopBoost function, which provides a much higher output current of up to 60A for 50ms, permits use of standard circuit breakers for protection on the secondary side. This enables safe tripping within the time limits required by the EN 60204 standard.

CLASSIC Power Supplies

Single-phase, primary switch mode, industrial power supplies provide a wide input voltage range and robust metal housings. The CLASSIC Power Supplies have a stabilized, adjustable output voltage and provide short-circuit and overload protection. The devices achieve high efficiency and the integrated LED status indicator conveniently provides operational status at a glance. CAGE CLAMP® pluggable terminations permit efficient pre-wiring.

The CLASSIC Power Supplies are available in four nominal output voltages: 12VDC, 24VDC or 48VDC, as well as 30.5VDC for AS-Interface networks.

ECO Power Supplies

Single-phase, primary switch mode power supplies in sturdy metal housing offer a wide input voltage range from 90 to 264VAC, without manual switching. The stabilized, front-panel adjustable 24VDC output voltage is protected against open and short circuits, and constant current operation is provided in the overload range. LEDs quickly provide operational status at a glance. CAGE CLAMP® provides fast, vibration-proof and maintenance-free terminations.

Select devices utilize the LineMonitor feature for current and voltage monitoring, fault memory and parameterization options via LCD display, on-unit function keys, or free monitoring software and available RS-232 interface from a PC and PLC. This allows the power supply to replace additional devices, such as phase failure and phase sequence monitoring devices or operational hour meters.

Additionally, the single-phase power supplies have a stand-by mode to switch off the device output via remote input, while minimizing power consumption. CAGE CLAMP® pluggable terminations permit efficient pre-wiring.

Rail-Mounted Modules – Constant Voltage Sources

Constant voltage sources provide stabilized 24VDC voltage via integrated longitudinal voltage regulator. CAGE CLAMP® provides fast, vibration-proof and maintenance-free terminations. The modules are DIN-rail mountable.

Rail-Mounted Modules – Power Supplies

Conventional transformer power supply with bridge rectifier, smoothing capacitors and stabilized output voltage via longitudinal voltage regulator. This power supply is ideal for supplying small loads with nominal output voltages of 24VDC, 12VDC, ± 12 VDC and ± 15 VDC. The low residual ripple makes the units well suited to applications using analog technology. CAGE CLAMP® provides fast, vibration-proof and maintenance-free terminations. The modules are DIN-rail mountable.

Electronic Circuit Breakers

Configurable protection via 4-channel electronic circuit breakers, for shutting down faulty 24VDC current paths. Offering adjustable trip times, the Electronic Circuit Breakers can respond to short circuits/overloads quicker than traditional circuit breakers or melting fuses, or when unintended start-ups must be prevent in the event of a ground fault (see EN 60204). This is particularly advantageous when using long cables between a power supply and load where loop resistance may be very high. Integrated current and voltage monitoring, as well as parameter setting via display and on-unit function keys, or via free software from a PC or PLC, provides easy operation and diagnosis. Electronic circuit breakers with active current limitation (maximum 1.5 times rated current) are also available as an option. These advanced features enable the Electronic Circuit Breakers to reliably prevent voltage drops in the event of a short circuit.

DC/DC Converters

DC/DC converters available in 6.2mm-wide terminal block housing or DIN-rail mount carrier. These converters are ideal for applications where it is not necessary to use a separate power supply with special voltage due to low power requirements (e.g., when supplying sensors, actuators or DALI bus devices).

Uninterruptible Power Supplies (UPS)

The Uninterruptible Power Supply (UPS) provides reliable power applications impacted by long-term power outages. The UPS consists of a charger, controller and a connected battery (capacities ranging from 3.2 to 12 Ah are available). In battery operation, 24VDC can be provided for several hours depending on the load current and battery capacity. The charger and controller are supplied with 24VDC from an external power supply – capacity must be matched to the load. Operation, configuration and diagnosis are simplified by an integrated LCD with keypad, or free software using an RS-232 interface (for connection to a PC or PLC). The battery modules have a temperature sensor NTC 164 ($4k7\ \Omega$), allowing for temperature-controlled charging via charger and controller, which may extend the battery's service life.

Redundancy Module

The redundancy module has two integrated power diodes (2 x 20A) for parallel connection of power supplies, while improving power supply availability or increasing the total current (max. 40A) for the 24VDC loads. A signal contact reports the failure of one or both input voltages, which is also displayed via LED.

Capacitive Buffer Modules

Capacitive buffer modules ensure smooth operation and protect data during shorter 24VDC power interruptions. Depending on the output current and buffer capacity, buffer times up to several seconds can be achieved. Control units are particularly sensitive to short power interruptions. This is why an integrated signal contact reports buffer operation, offering the control unit sufficient time for preventive measures (e.g., saving valuable production data or program parameters).

Communication Cable

The communication cable connects the RS-232 interface for power supplies with integrated LineMonitor (787-85x) and electronic circuit breakers (787-86x), as well as UPS charger and controller units (787-87x) to the RS-232 interface of a PC or PLC. When combined with free software, the cable provides easy parameterization and diagnostics for these WAGO power supply solutions.

WAGO Overvoltage Protection

WAGO overvoltage protection for increased safety and longer on-line operation

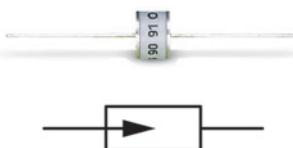

On-the-line overvoltages cause most operating failures for measuring, control, data and power lines. Failure of electronic and semiconductor components due to surges can cause operating interruptions. The overvoltage (also called transients) can be generated by switching electrical equipment on or off or by lightning discharges. Devices designed to protect electrical equipment from these voltages are called SPDs (Surge Protection Devices). SPDs may consist of either a single component or a combination of them. Various components may be subdivided in use by the protection type offered:

- Coarse protection
- Medium protection
- Fine protection.

The boundaries between these levels of protection may not be sharply defined, leading the devices chosen to vary accordingly. The following components have proven performance in these applications:

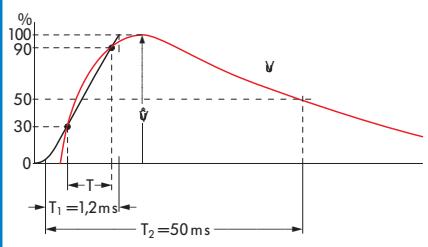

Gas-filled surge arresters and spark gaps

The gas filled surge arrester is comprised of two electrodes in a ceramic or glass tube filled with a pressurized inert gas. A spark gap is simply two electrodes in air, spaced a predetermined distance apart.

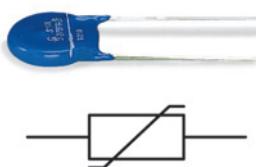

Varistors have a very high resistance until their threshold voltage is exceeded. Then they drop to a low resistance and are capable of carrying high currents for a short period of time. They have a fast response time, and have a current carrying capacity dependent on the surface area of metal oxide material. MOVs can be sized to handle currents exceeding of 100 kA.

Undersized varistors can age with continued

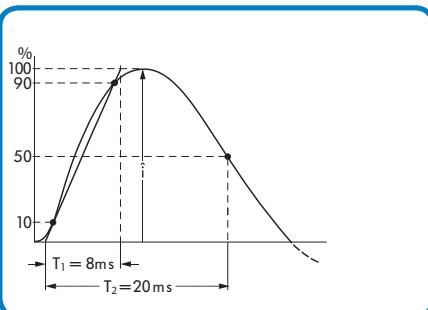

Voltage pulses 1.2 / 50
per IEC 60060-1 / DIN VDE 0432 P. 2

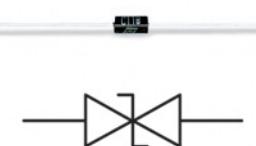

surge conduction, resulting in lower impedance and higher leakage.

When subjected to continuous (AC or DC) voltages in excess to the device rating, MOVs can overheat, and even explode, in certain circumstances. This is why a quality surge protection device is important, it will incorporate protective measures to disconnect faulty components before safety is compromised.

Current pulses 8 / 20
per IEC 60060-1 / DIN VDE 0432 P. 2

Suppression diode (or silicon avalanche diode)

Once the ignition voltage is reached, resistance drops due to ionization and current begins to flow. The resistance of the device drops from high to low as it conducts. The voltage across the device after the arc is struck is typically 10 V ... 30 V. Therefore, the current will continue to flow until the voltage drops below this level. As this is not a guaranteed occurrence in typical power situations, a fuse must precede the device to ensure disconnection from the supply.

The advantage of a gas-filled arrester: high current carrying capacity for its size. However, the key disadvantages: slow response speed and in AC applications, the crowbar action across the supply.

Varistor

A varistor is a voltage-dependent resistor. A common type of varistor is referred to as an MOV (Metal Oxide Varistor) due to its method of construction.

These devices have electrical characteristics similar to Zener diodes, but are rated for surge currents.

Once the rated breakdown voltage is exceeded (in the non-conductive direction), the diode becomes a conductor. The suppressor diode differs from a Zener in its higher current carrying capability and faster response time (in the picosecond range).

Test impulse

Surge arresters are subject to standardized test pulses in order to classify capabilities; the effectiveness of protection measures with reference to dissipation capacity and voltage arresting. The form and level of the test pulses are defined by IEC 60060-1/DIN VDE 0432, part 2. Preference is given to voltage pulses of 1.2/50 and current pulses of 8/20.

Application recommendations

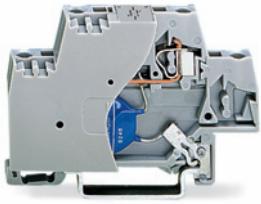

The advantages of gas-filled surge arresters lie in their high current carrying capacity, making them ideal for coarse protection. One disadvantage, particularly in the medium protection range, is the relatively long response time, as well as the power follow current.

Varistors have a considerably shorter response time; however they also have lower leakage currents. This makes them more suitable for medium protection, as they offer limited applications for coarse protection.

If the connection lines of electronic equipment are already "fine" protected, general coarse and medium protection measures are sufficient. If this is not the case, suppressor diodes with very short response time may be employed as fine protection.

WAGO AUTOMATION offers a complete range of modular terminal blocks with integrated surge arresters for coarse, medium and fine protection.

Depending on the application, one can choose the appropriate type from the previously mentioned surge arresters. These are electrically connected in the modular terminal blocks between the connection point and the mounting rail. Snapping the terminal block onto the grounded (earthed) mounting rail automatically ensures the required overvoltage protection.

Double-deck terminal block with varistor, direct connection to the DIN 35 rail

Frequently, only one surge arrester is fitted for cost reasons. However, due to the fact that one surge arrester alone cannot optimally ensure several protection functions, combinations are recommended. Care must be taken to ensure that the single-stage protection devices are decoupled sufficiently by inductors or resistors.

In addition to single-stage surge arresters, WAGO AUTOMATION also offers multi-stage surge arresters, combining components for different applications. These pluggable modules are snapped into "carrier" terminal blocks. These are DIN rail-mounted and offer secure and maintenance-free

CAGE CLAMP® terminations for conductors 0.08mm²/AWG 28 to 2.5mm²/AWG 14.

Pluggable surge suppression modules with on-unit warnings

Addition of interference suppression to surge suppression devices.

In addition to overvoltage protection, a high frequency interference filter can be added to the circuitry. This filter cannot only protect the equipment from high frequency energy transmitted by connecting wires, but also prevents a transmission of disturbances to the supply lines. The main component of a filter is an LC network, which produces a mismatch between the filter impedance and the impedance of the disturbance path. This reflects any disturbance back to its source.

Definition of several important technical terms

Nominal operating voltage (V_{BN})

The nominal operating voltage corresponds to the voltage which may be permanently connected to the appropriate connection terminals of the overvoltage protection module. Alternating voltages are quoted as effective values.

Max. operating voltage (V_{Bmax})

The maximum operating voltage corresponds to the voltage which may be permanently connected to the appropriate connection terminals without the operating properties changing or activating the individual module's protection elements.

Nominal current (I_N)

The nominal current corresponds to the current which may permanently flow through the connection terminals of the overvoltage protection device.

Nominal discharge current (I_{SN})

The nominal discharge current is the maximum value of a current having the 8/20 µs waveform (DIN VDE 0432/10.78 part 3), which can flow through the surge arrester five times within a time period of 30 seconds (VDE) without destroying it.

Max. surge current (I_{Smax})

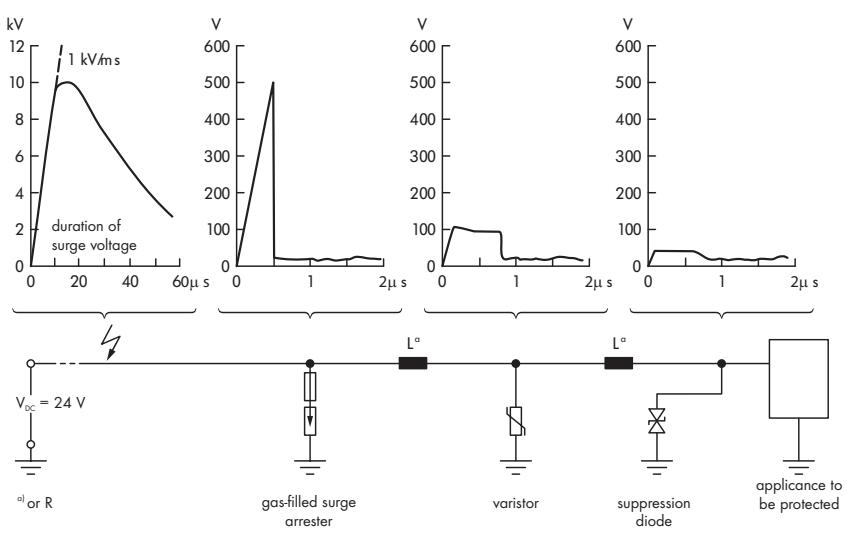

The maximum surge current I_{Smax} defines the maximum value of a current having the 8/20µs waveform, which can flow through the surge arrester once without destroying it.

Protection level

The protection level is the value of the residual voltage occurring on the "protected" side of the surge arrester when applying the rated discharge current.

Response time (t_{an})

The response time is primarily based on the physical properties of the surge arresters and is dependent upon the wave front duration of the surge voltage. WAGO's data refers to a voltage rise of 1kV/µs.

Overview: Transducers

857 Series

JUMPFLEX® – Transducers

Function	Input Signal (switchable in a calibrated way)	Output Signal (switchable in a calibrated way)	Configuration	Electrical Isolation	Supply Voltage V _N	Item No.	Page
Isolation Amplifier	0 ... 20 mA, 4 ... 20 mA, 0 ... 5 V, 0 ... 10 V, 2 ... 10 V, 1 ... 5 V	0 ... 20 mA, 4 ... 20 mA, 0 ... 5 V, 0 ... 10 V, 2 ... 10 V, 1 ... 5 V	DIP switch	3 ways, 2.5 kV	24 V DC	857-400	194
Isolation Amplifier, Configurable with Digital Output	-10...+10 V, -20...+20 mA, 0...+30 V (31.2 V (V _{IN}) 100 mA (I _{IN}))	0 ... 20 mA, 4 ... 20 mA, 0 ... 10 V, 2 ... 10 V, 0 ... 5 V, 1 ... 5 V, 0 ... 10 mA, 2 ... 10 mA	DIP switch or configuration software	3 ways, 2.5 kV	24 V DC	857-401	196
Bipolar Isolation Amplifier	± 5 V, 0 ... 5 V, 1 ... 5 V, ± 10 V, 0 ... 10 V, 2 ... 10 V, ± 10 mA, 0 ... 10 mA, 2 ... 10 mA, ± 20 mA, 0 ... 20 mA, 4 ... 20 mA	± 5 V, 0 ... 5 V, 1 ... 5 V, ± 10 V, 0 ... 10 V, 2 ... 10 V, ± 10 mA, 0 ... 10 mA, 2 ... 10 mA, ± 20 mA, 0 ... 20 mA, 4 ... 20 mA	DIP switch	3 ways, 2.5 kV	24 V DC	857-409	198
Isolation Amplifier Fixed (Current)	0(4) ... 20 mA	0(4) ... 20 mA	–	3 ways, 2.5 kV	24 V DC	857-411	200
Isolation Amplifier Fixed (Voltage)	0(2) ... 10 V	0(2) ... 10 V	–	3 ways, 2.5 kV	24 V DC	857-412	200
Passive Isolator 1-Channel	0(4) ... 20 mA	0(4) ... 20 mA	–	2 ways, 2.5 kV	24 V DC	857-451	201
Passive Isolator 2-Channel	0(4) ... 20 mA	0(4) ... 20 mA	–	2 ways, 2.5 kV	24 V DC	857-452	201
Repeater Power Supply	0 ... 20 mA, 4 ... 20 mA	0 ... 20 mA, 4 ... 20 mA, 0 ... 5 V, 0 ... 10 V, 2 ... 10 V, 1 ... 5 V	DIP switch	3 ways, 2.5 kV	24 V DC	857-420	202
Repeater Power Supply HART	4 ... 20 mA	4 ... 20 mA	–	3 ways, 2.5 kV	24 V DC	857-421	204
Signal Splitter	0 ... 20 mA, 4 ... 20 mA, 0 ... 5 V, 0 ... 10 V, 2 ... 10 V, 1 ... 5 V	2 × 0(4) ... 20 mA	DIP switch	4 ways, 2.5 kV	24 V DC	857-423	206
Millivolt Transducer	-100 mV ... +100 mV, 0 mV ... 200 mV bis 0 mV ... 1000 mV (in steps of 100)	0 ... 20 mA, 4 ... 20 mA, 0 ... 10 V, 2 ... 10 V, 0 ... 5 V, 1 ... 5 V, 0 ... 10 mA, 2 ... 10 mA	DIP switch or configuration software	3 ways, 2.5 kV	24 V DC	857-819	216
Threshold Value Switch	-10...+10 V, -20...+20 mA, 0...+30 V (31.2 V (V _{IN}) 100 mA (I _{IN}))	1 changeover contact (relay max. 6A) 1 digital switching output	DIP switch, teach-in, configuration software	4 ways, 2.5 kV	24 V DC	857-531	218

Installation Notes

859 Series

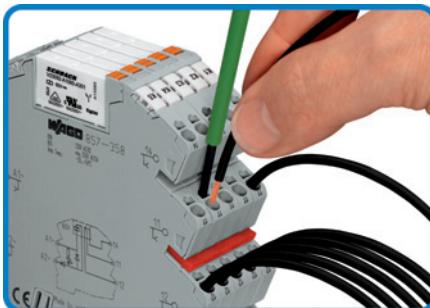

Relay Modules and
Optocoupler Modules

Connection of conductor

857 Series

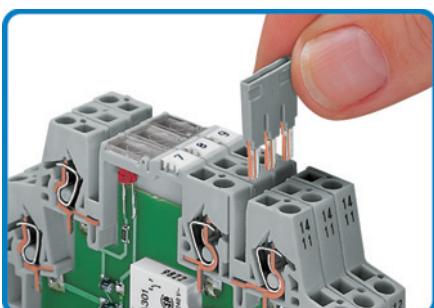

JUMPFLEX® - Transducers / Relay and
Optocoupler Modules

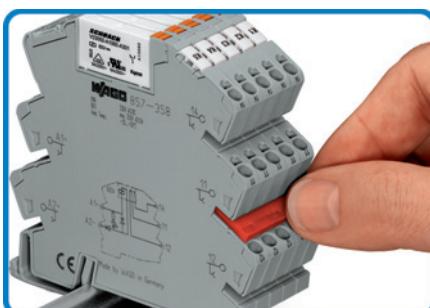

Connection of conductor

Operation of the relay ejector

Easy commoning using
adjacent jumpers

Easy commoning using
adjacent jumpers

Configuration of the Transducers with
WAGO-USB-Service-Cable 750-923

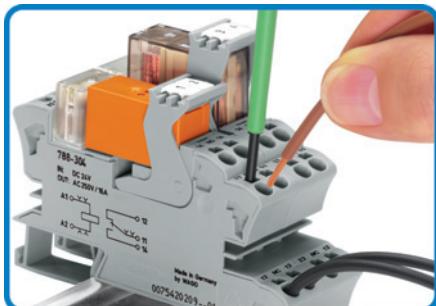

Marking using Miniature quick
marking card

Marking using WMB Multi markers

788 Series

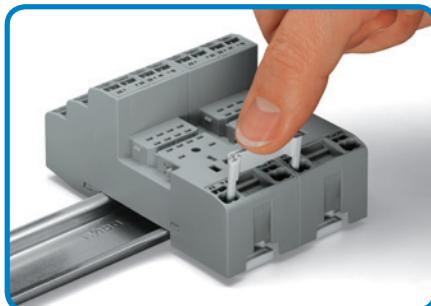

Sockets for Miniature Switching Relay / Optocoupler

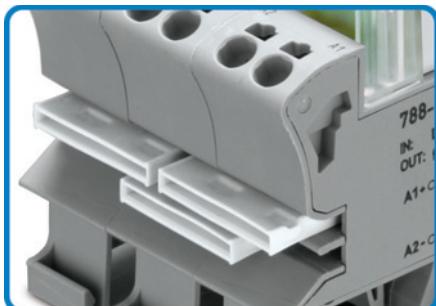

Connection of conductor

858 Series

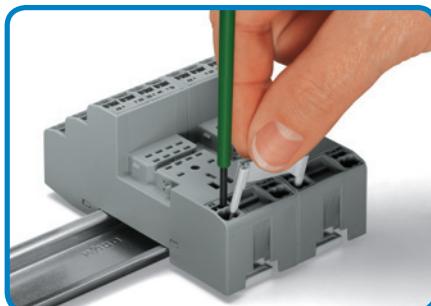

Sockets with Industrial Relay

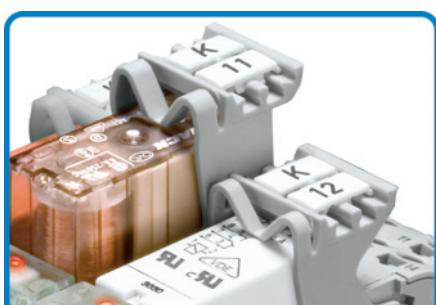

Easy commoning using adjacent jumpers

Easy commoning using adjacent jumpers

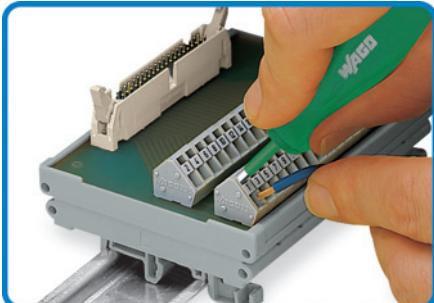

Remove jumper with screwdriver

Marking using WMB Multi markers and group marker carriers

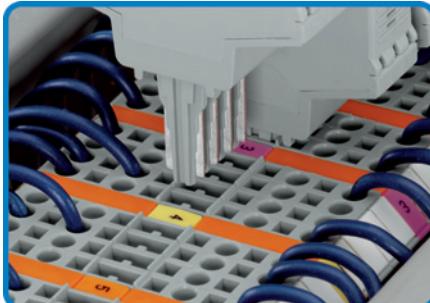

Installation Notes

287 / 288 Series Mounting Carriers with Miniature Switching Relay

Connection of conductor
"front-entry"

286 / 786 Series Pluggable Function Modules

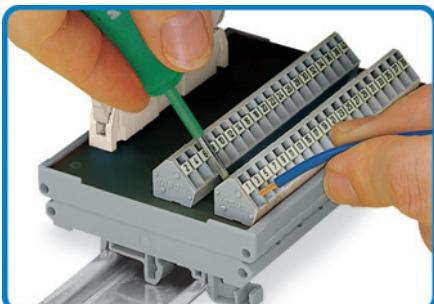

Coding ensures correct polarity

789 Series Relay Modules in DIN-Rail Mounted Enclosure

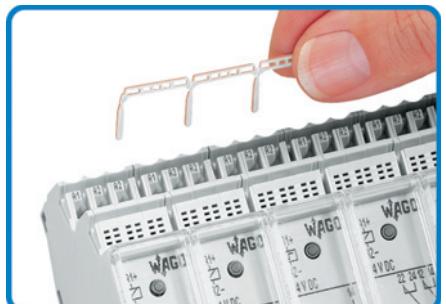

Connection of conductor

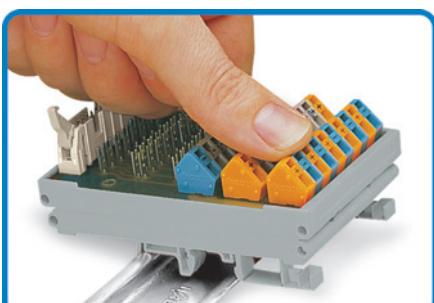

Connection of conductor
"side-entry"

Pluggable electronic modules, for application on 2- or 4-conductor carrier terminal blocks

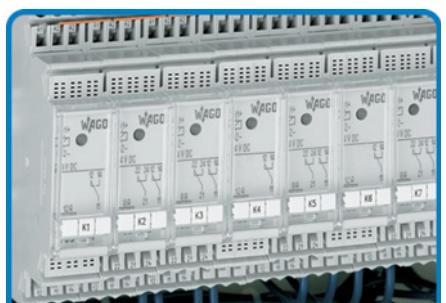

Easy commoning using adjacent jumpers

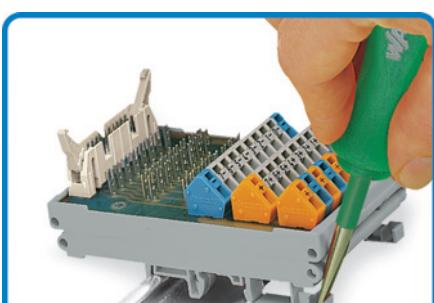

Assembly of a module on the carrier rail

Marking using WMB Multi markers

Marking using Miniature quick marking card

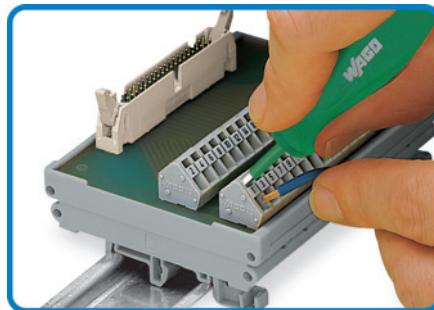

Removal of a module from the carrier rail

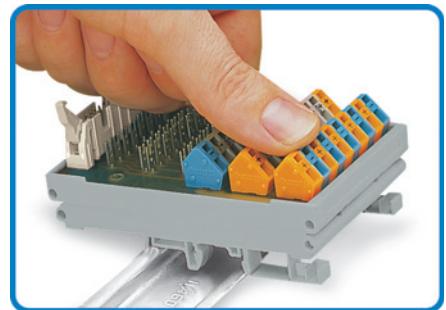

Easy testing at touchproof contacts

289 Series Interface Modules

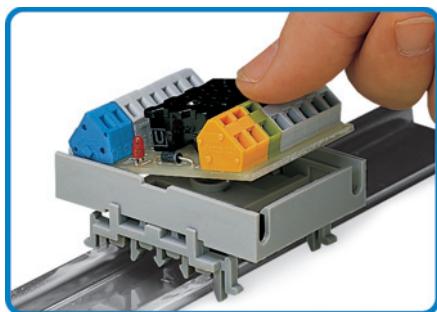

Mounting carrier, gray, snap-fit mounting of universal mounting feet

289 Series Interface Modules

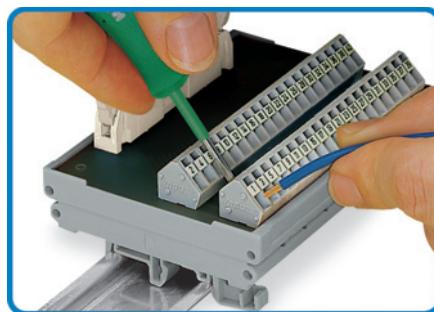

Connection of conductor "front-entry"

289 Series Interface Modules

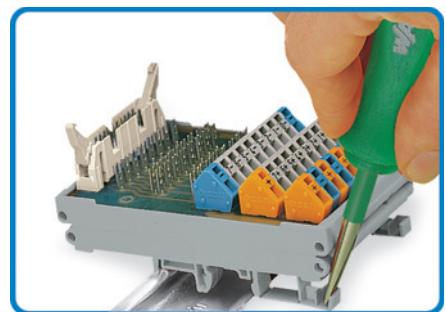

Assembly of a module on the carrier rail

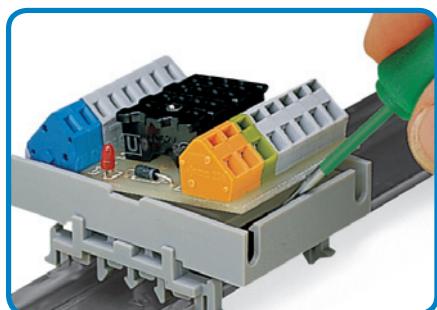

Fitting of an individual module to the mounting carrier

Connection of conductor "side-entry"

Removal of a module from the carrier rail

Removal of an individual module from the mounting carrier

**WAGO Application: Cerestar (Cargill GmbH),
Barby, Saxony-Anhalt, Germany**

Manufacturer of starches and starch derivatives.

WAGO Products:

Matrix Patchboards and Pluggable Electronic
Modules

Relays – Optocouplers – Special Functions

859 Series

Rail-Mounted Terminal Blocks with Miniature Switching Relay	32 – 38
Rail-Mounted Terminal Blocks with Optocoupler	39 – 47
Rail-Mounted Terminal Blocks with Miniature Switching Relays and Optocouplers with an Extended Input Voltage and Operating Temperature Range	48
Accessories, 859 Series	49

857 Series

JUMPFLEX® Relay Socket with Miniature Switching Relay	50 – 51
Miniature Switching Relays, Sockets, JUMPFLEX® 8-Channel Adapters for System Wiring	52 – 55

	Relay with 1 changeover contact (1u) Contacts 5 µm Au hard gold plated for normal switching power Nominal input voltage V_N 24 V DC	Relay with 1 changeover contact (1u) Contacts 5 µm Au hard gold plated with an extended Input voltage range: V_N -30 % ... +25 % Operating temperature range: -25 °C ... +70 °C for normal switching power Nominal input voltage V_N 115 V DC
--	---	--

* In order to prevent the gold layer from being damaged these values should not be exceeded. Higher switching power leads to evaporation of the gold layer. The resulting deposits in the enclosure may cause sparkovers between the coil and the contact.

Rail-Mounted Terminal Blocks with Miniature Switching Relay

Relay with 1 changeover contact (1u)
defined turn-on/turn-off threshold
for normal switching power
Nominal input voltage V_N 230 V AC

Relay with 1 changeover contact (1u)
with an extended
Input voltage range: V_N -30 % ... +25 %
Operating temperature range: -25 °C ... +70 °C
for normal switching power
Nominal input voltage V_N 24 V DC

Note: Inductive loads have to be attenuated by an appropriate protective circuit in order to protect relay coils and contacts.

	Relay with 1 changeover contact (1u) (gold contacts) for normal switching power Nominal input voltage V_N 24 V, 110 V, 220 V DC	Relay with 1 changeover contact (1u) (gold contacts) for normal switching power Nominal input voltage V_N 24 V, 115 V, 230 V AC/DC
--	---	--

* In order to prevent the gold layer from being damaged these values should not be exceeded. Higher switching power leads to evaporation of the gold layer. The resulting deposits in the enclosure may cause sparkovers between the coil and the contact.

The values in brackets are valid if the gold layer is damaged.

	Pluggable miniature switching relays 1 changeover contact	Pluggable miniature switching relays 1 changeover contact (gold contacts)
--	--	--

* In order to prevent the gold layer from being damaged these values should not be exceeded. Higher switching power leads to evaporation of the gold layer. The resulting deposits in the enclosure may cause sparkovers between the coil and the contact.

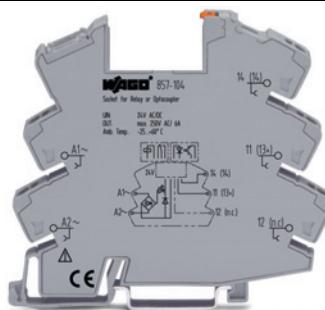

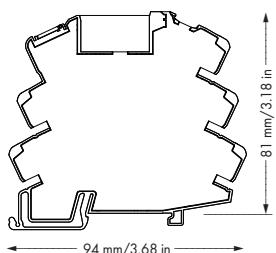

The values in brackets are valid if the gold layer is damaged.

Accessories see pages 80 ... 81

Control circuit:		
Nominal input voltage (V_N)	24 V DC	
Input voltage range	18 V ... 30 V DC	
Control current U_N (20 °C)	7 mA ±10 %	
Release voltage	4 V DC	
Control circuit resistance	3.2 kΩ	
Load circuit:		
Max. switching voltage	240 V AC	
Load switching voltage range	24 ... 240 V AC	
Peak reverse voltage	600 V	
Max. switching current	1 A AC	
Forward voltage at max. switching current	< 1 V AC	
Nominal operating mode	continuous duty	
Dielectric strength control/switching circuit	3.75 kV	
Nominal voltage acc. to VDE 0110 Part 1/4.97, IEC 60664-1	250 V / 2.5 kV / 2	
Degree of protection	IP 20	
Ambient operating temperature	-20 °C ... +60 °C	
Storage temperature	-40 °C ... +70 °C	
Dimensions (mm) W x H x L	15 x 53 x 86	
Wire connection	Height from upper-edge of DIN 35 rail	
Cross sections	CAGE CLAMP®S	
Stripped lengths	0.34 mm² ... 2.5 mm² / AWG 22 ... 12 9 ... 10 mm / 0.37 in	
Approvals	DIN VDE 0140 part 1, DIN EN 61140; DIN VDE 0160, EN 50178; degree of protection II	

Accessories, 788 Series

Status indication

Description	Power consumption at V_N	Item No.	Pack. Unit
Status indication 24 V DC (12 V ... 24 V)	2.4 mA	788-120	50 (2x25)
Status indication 48 V DC (48 V ... 60 V)	1.9 mA	788-121	50 (2x25)
Status indication 110 V DC	1.9 mA	788-122	50 (2x25)
Status indication 24 V AC	2.1 mA	788-123	50 (2x25)
Status indication 115 V AC	1.7 mA	788-124	50 (2x25)
Status indication 230 V AC	1.6 mA	788-125	50 (2x25)

Push-in type jumper bar

788-113

Commoning

Push-in type jumper bar

Description			Item No.	Pack. Unit
Push-in type jumper bar, I max. 18 A	2-way 3-way 4-way 6-way 8-way	(module/module)	788-113 788-114 788-115 788-116 788-117	200 (8x25) 100 (4x25) 100 (4x25) 100 (4x25) 100 (4x25)
Push-in type jumper bars, light gray, insulated, 18 A	2-way	(intern)	859-402	200 (8x25)

WMB Multi marking system

Marking

Group marker carrier

Description		Item No.	Pack. Unit
WMB Multi marking system	plain	793-501	5 cards
Marking software and printer/plotter see Section 8			
Marking	1 ... 10 (10x) 11 ... 20 (10x) 21 ... 30 (10x) 31 ... 40 (10x) 41 ... 50 (10x) 1 ... 50 (2x)	793-502 793-503 793-504 793-505 793-506 793-566	5 cards 5 cards 5 cards 5 cards 5 cards 5 cards
10 strips with 10 markers, white with black printing			
Group marker carrier		209-112	50 (1x50)

Operating tool**Wire connection**

Description	Item No.	Pack. Unit
Operating tool, with partially insulated shaft	210-720	1

Ferrule

Description	Sleeve for mm ² / AWG	Item No.	Pack. Unit
Ferrule, red insulated, 12 mm	2 x 1 mm² / 2 x 18	216-542	500

Sockets with Industrial Relay

	Socket with industrial relay Coil voltage: 24 V DC 4 changeover contacts	Socket with industrial relay Coil voltage: 24 V DC 4 changeover contacts (gold contacts)
--	---	---

Description	Item No.	Pack. Unit	Item No.	Pack. Unit
Relay socket with industrial relay, for DIN 35 rail	858-304	1	858-314	1

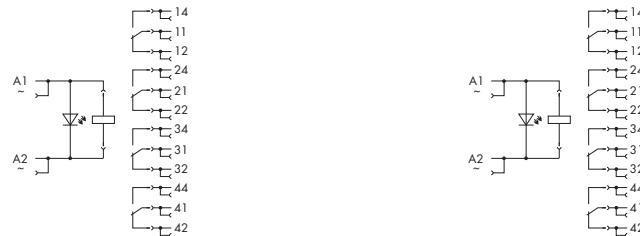

Technical Data

Accessories see page 84 ... 86

Accessories see page 84 ... 86

Coil			
Coil voltage	24 V DC		24 V DC
Rated power	0.9 W		0.9 W
Coil current	36.9 mA		36.9 mA
Operating range	0.8 ... 1.1 x V		0.8 ... 1.1 x V
Holding voltage	50 % of V _N		50 % of V _N
Release voltage	0.1 x V		0.1 x V
Contacts			
Contact material	AgCe	AgCe + 5 µm Au	
Continuous current	5 A	50 mA*	
Inrush current	15 A / 4 s	15 A / 4 s	
Max. switching voltage	250 V AC / 30 V DC	30 V DC*	
Switching power (max.) AC1 / AC15	1250 VA / 300 VA	1250 VA / 300 VA	
1-phase motor load AC3	0.12 kW	0.12 kW	
Switching current (max.) DC1	5 A at 30 V DC	5 A at 30 V DC	
Min. switching load	12 V / 100 mA	12 V / 100 mA	
Switching frequency under load	20 cycles/min.	20 cycles/min.	
General Specifications			
Mechanical life	20 x 10 ⁶ switching operations	20 x 10 ⁶ switching operations	
Electrical life	1 x 10 ⁵ switching operations	1 x 10 ⁵ switching operations	
Pull-in/drop-out/bounce time typ.	25 ms / 25 ms / 4 ms	25 ms / 25 ms / 4 ms	
Nominal voltage acc. to VDE 0110 Part 1/4.97, IEC 60664-1	250 V / 2.5 kV / 2	250 V / 2.5 kV / 2	
Dielectric strength contact-coil (1.2/50 µs)	4 kV	4 kV	
Dielectric strength contact-coil (AC, 1 min)	1.5 kV	1.5 kV	
Dielectric strength open contact	1 kV	1 kV	
Dielectric strength contact-contact	1.5 kV	1.5 kV	
Ambient operating temperature	-25 °C ... +70 °C (V _L + 50 °C)	-25 °C ... +70 °C (V _L + 50 °C)

Sockets with Industrial Relay

Socket for industrial relays 2 and 4 changeover contacts

Note: Inductive loads have to be attenuated by an appropriate protective circuit in order to protect relay coils and contacts.

Description	Item No.	Pack. Unit
Relay socket for industrial relays, for DIN 35 rail	858-100	1

Technical Data

Nominal input voltage (V_N)	depending on Relay; max. 250 V AC	
Max. switching voltage	250 V AC	
Max. continuous current	4 x 8 A (4 changeover contacts); 2 x 12 A (2 changeover contacts)	
Max. Switching power (resistive)	4000 VA AC	
Nominal operating mode	continuous duty	
Dielectric strength	4 kV (depending on relay)	
Nominal voltage acc. to VDE 0110 Part 1/4.97, IEC 60664-1	250 V / 4 kV / 3	
Degree of protection	IP 20	
Ambient operating temperature	-25 °C ... +70 °C (depending on relay)	
Storage temperature	-40 °C ... +80 °C	
Dimensions (mm) W x H x L	31 x 39 x 97	
Wire connection	Height from upper-edge of DIN 35 rail	
Stripped lengths	CAGE CLAMP®S	
Cross sections	9 ... 10 mm / 0.37 in	
	2 x 0.34 mm ² ... 2 x 1.5 mm ² /	
	1 x 2.5 mm ² /	
Approvals	AWG 22 ... 16	
	IEC60664 / IEC60664A / DIN VDE0110	
	Degree of pollution 2	
	Overvoltage category 2	

Accessories, 858 Series

Holding bracket

Description	Item No.	Pack. unit
Holding bracket for industrial relays (height 33.5 mm ... 35.5 mm)	858-110	1

Push-in type jumper bar

Description	Item No.	Pack. unit
Push-in type jumper bar	858-402	200

Status indication

Description	Power consumption at V_N	Item No.	Pack. Unit
Status indication 24 V DC (12 V ... 24 V)	2.4 mA	788-120	50 (2x25)
Status indication 48 V DC (48 V ... 60 V)	1.9 mA	788-121	50 (2x25)
Status indication 110 V DC	1.9 mA	788-122	50 (2x25)
Status indication 24 V AC	2.1 mA	788-123	50 (2x25)
Status indication 115 V AC	1.7 mA	788-124	50 (2x25)
Status indication 230 V AC	1.6 mA	788-125	50 (2x25)

NOTE:

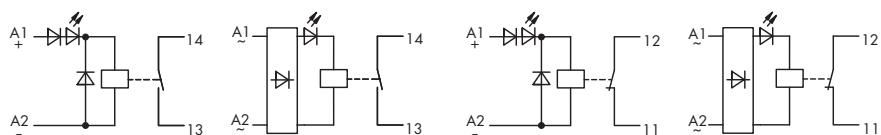

Only required when using relays without integrated operating indicator!

Operating tool

Description	Item No.	Pack. unit
Operating tool, with partially insulated shaft	Type 2, blade (3.5 x 0.5) mm	210-720

If required a breathing hole can be made in the cover. However be aware that the degree of waterproof protection will reduce from IP67 to IP30!	Safety relay type SDS SF 4 with 4 break contacts and 4 make contacts with 1 relay with universal mounting carrier	Safety relay type SDS SF 4 with 4 break contacts and 4 make contacts with 2 relays with universal mounting carrier
---	---	--

If an outer contact (20) should weld then the forced operated inner contact (12) driven by the actuator (d) remains open. The rotating armature (c) remains free to move. The unaffected contact pairs can operate normally, (i. e. their function to make or break remains unaffected).

If an inner contact should weld (12) then the movement of the rotating armature (c) is blocked via the operator (d). Open contacts of all four contact pairs remain open. This arrangement corresponds to conventional, forced contact operation.

--	---	---

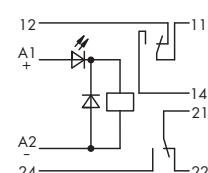

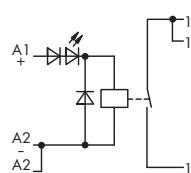

* In order to prevent the gold layer from being damaged these values should not be exceeded. Higher switching power leads to evaporation of the gold layer. The resulting deposits in the enclosure may cause sparkovers between the coil and the contact.

Technical Data

Accessories see pages 138 ... 139

Nominal input voltage (V_{Ni})	24 V DC	
Current input at rated voltage (coil 20 °C)	15.0 mA	
Contact material	AgCdO, with gold flash	
Max. switching voltage	250 V DC / 380 V AC	
Max. make / break current	1 s 15 A / 5 A	
Max. continuous current	5 A	
Max. switching power (resistive)	150 W / 2000 VA	
Operating power	360 mW	
Pull-in/drop-out/bounce time typ.	10 ms / 0 ms / 1 ms	
Trigger voltage	24 V DC	
Reset time	100 ms	
Repeat accuracy	±0.5 %	
Dielectric strength contact-coil (AC, 1 min)	3 kV	
Nominal voltage acc. to VDE 0110 Part 1/4.97, IEC 60664-1	250 V / 4 kV / 3	
Mechanical life	5 × 10 ⁷ switching operations	
Mechanical life at max. load (resistance)	1 × 10 ⁵ switching operations	
Ambient operating temperature	-25 °C ... +40 °C	
Dimensions (mm) L x H x W incl. terminal block	20 x 82.5 x 50

--	---	--

286-938:

Optocoupler module with short-circuit protected, positive switching output.

Two sockets with plug for programming the output

Independent of the input signal the output can be switched over to "H" (high) or "L" (low) by means of a bridge plug (supplied with the module).

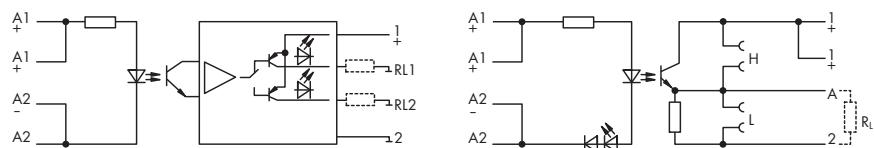

The short-circuit protected output is equipped with a current limiter which limits load currents above 800 mA to

200 mA.

The maximum operating time of the current limiter is 60 s.

Status indication:

- Input green LED
 - Output yellow LED
 - Short circuit red LED

	Power optocoupler for S0 current meter interface with AC output	Power optocoupler for S0 current meter interface with DC output
	Module width 20 mm / 0.787 in	Module width 20 mm / 0.787 in

The optocoupler for the SO current meter interface sends counter pulses from the supply lines.

From the supply lines. Via this interface the user has the possibility to access data which is created by pulse generating current meters with a SO current meter interface in accordance with DIN 43 864. The user can extract the data without affecting the SO circuit and use them for their own evaluations, for example, optimizing energy consumption by reducing peak demands. The optocoupler gets the input signal via a shunt resistance that is integrated in a terminal block for pluggable modules. Two parallel connected electrical contacts at the output allow reading of the SO counter pulses. The optocoupler can be replaced without having to open the current meter circuit. When using passive metering systems, SO power packs have to be added.

4-Channel EnOcean Radio Receivers in DIN-Rail Mount Enclosure

	4-channel EnOcean radio receiver with 4 changeover contacts, 8 A	4-channel EnOcean radio receiver with 4 make contacts, 16 A
--	--	---

The 4-channel radio receiver in DIN-rail mount enclosure is used to switch 4 independent electrical devices or loads. The radio receiver processes telegrams transmitted by sensors (binary information) using EnOcean radio technology (PTM + STM modules). The outputs are switched via relay contacts.

- Radio receiver for battery-less and wireless sensors
- LED indication of switch status
- External antenna for optimum transmission range (required)
- Frequency band 868 MHz
- Transmitter-to-receiver assignment via learn mode

Description	Item No.	Pack. unit	Item No.	Pack. unit

	Manual control module, digital, 4 outputs	Manual control module, analog, 4 outputs
--	--	---

The digital manual control module 789-810 controls the different outputs 0 ... 3 and indicates their status via green LEDs and the changeover contact of the power relay. Depending on both the manual/automatic switch and watchdog input, the states 0 or 1 are transmitted in an electrically isolated from to the output via a relay.

The analog manual control module 789-811 controls the different analog outputs 0 ... 3. Depending on both the manual/automatic switch and watchdog input, the voltages set between 0 ... 10 V are transmitted to the output.

16-Channel I/O Module with Interface Module

The new 750-14xx and 750-15xx Series I/O Modules with flat ribbon cable connection offer 16 digital channels in a module less than 1/2 inch (12mm) wide. Offering quick connections and a space-efficient design, the DIN-rail mount interface modules simplify installation in confined areas and relocate the termination point. When combined with WAGO interface modules (e.g., item no. 289-614, 289-611), a switch cabinet can be pre-wired before install to minimize wiring time and errors. This is beneficial as wiring can be performed independently of a plant's construction. Pre-wired electronics can be installed right before start-up,

saving valuable time during final stages of project completion. The modules are also ideal for connecting series machines or relay modules tasked with the higher loads common to buildings and industrial applications. The interface module also combines the advantages of relays (e.g., manual operation or rapid replacement with socket-mounted versions) with the benefits of a modern I/O system. Another ideal application would be the integration of pneumatic controllers into a fieldbus network. Most pneumatic modules have an appropriate connector and can be controlled by the WAGO-I/O-SYSTEM.

Five variants are available: two 16-channel input or output modules (one high-side and one low-side switching variant), as well as a version combining 8 inputs and 8 outputs.

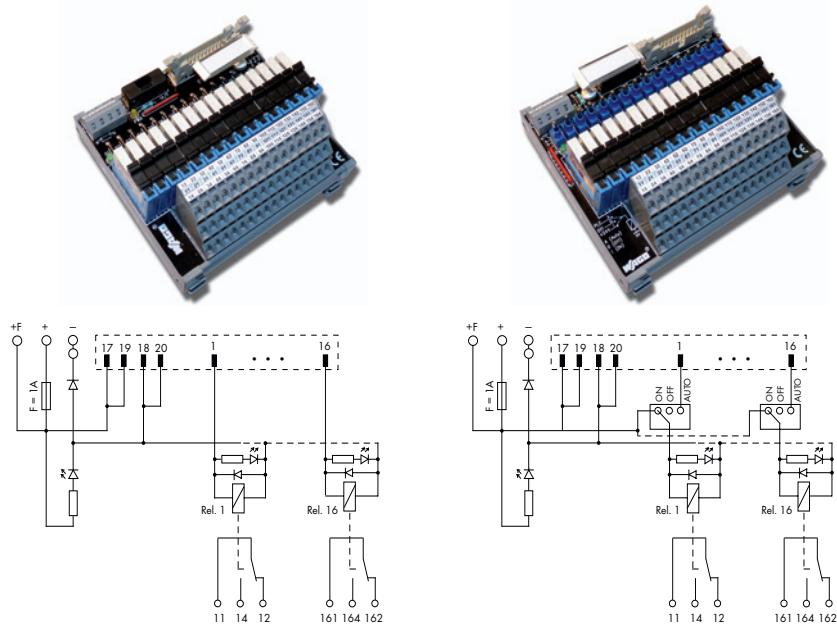

Application Examples

WAGO ribbon cables provide fast and easy connection of WAGO I/O modules equipped with a ribbon cable connector (750-1400, -1402, -1500, -1501, 1502) to appropriate interface or relay modules (16-channel) featuring a 20-pole female connector. The cables are available in 1-, 2- and 3-meter lengths; each has one 20-pole female connector at both ends.

WAGO ribbon cables provide fast and easy connection of WAGO I/O modules equipped with a ribbon cable connector (750-1400, -1402, -1500, -1501, 1502) to appropriate interface or relay modules featuring a 10-pole female connector. For example, this cable connects 2 relay modules (8-channel) to a WAGO I/O module. The cables are available in 1- and 2-meter lengths; each has one 20-pole and two 10-pole female connectors on the ends.

Description	Item No.	Pack. Unit
WAGO ribbon cable 20/20, lenght 1 m	706-3057/300-100	1

Isolation amplifier, with zero/span adjustment

**Short description:**

The configurable 857-400 Isolation Amplifier is used to convert, amplify, filter and electrically isolate analog standard signals. The device has a 3-way isolation with a 2.5kV test voltage. On the input and output side, the following signals can be configured via DIP switches that are accessible from the side of the housing:

0 - 10V, 2 - 10V, 0 - 20mA, 4 - 20mA, 0 - 5V and 1 - 5V.

Measurement range switching is calibrated.

The device is supplied with 24VDC, which can be commoned using lateral push-in type jumper bars in a quick and cost effective way. A green LED on the front panel indicates normal operation. The isolation amplifier meets the requirements for safe isolation of input, output and supply circuits with 2.5kV test voltage according to EN 61140.

JUMPFLEX® Transducers

Isolation amplifier, configurable with digital output

**Short description:**

The software-configurable 857-401 Isolation Amplifier is used to convert, amplify, filter and electrically isolate analog standard signals. The device has a 3-way isolation with a 2.5kV test voltage. DIP switches accessible from the side can be used to configure the signals in both input and output.

In addition to standard signals, bipolar ($\pm 10V, \pm 20mA$) and 0 to 30V signals can also be set on the input side. The analog output supports standard unipolar signals. In addition, the devices can be configured using FDT/DTM software. The software offers additional setting options such as special input and output signal combinations with intermediate values or inversion of the analog output. Measurement range switching is calibrated. A digital switching output is available that can also be configured using software.

The device is supplied with 24VDC, which can be commoned using lateral push-in type jumper bars in a quick and cost effective way. A green LED on the front panel indicates normal operation. The isolation amplifier meets the requirements for safe isolation of input, output and supply circuits with 2.5kV test voltage according to EN 61140.

JUMPFLEX® Transducers

Bipolar isolation amplifier

**Short description:**

The 857-409 Bipolar Isolation Amplifier records bipolar analog signals (e.g., $\pm 10V$ or $\pm 20mA$) and converts them into bipolar, analog standard signals. After conversion, the isolated signals are transmitted with high accuracy to the output where they are available in an amplified form and are electrically isolated. In addition, unipolar signals (e.g., 0 - 20mA or 0 - 10V) and live zero signals (e.g., 4 - 20mA or 2 - 10V) can be adjusted independently of one another at both input and output via DIP switches.

Adjusting the limiting frequency is also performed via DIP switches. Measured distance adjustment is carried out via zero/span potentiometers on the front of the device, while signal switching is performed in a calibrated way, which requires no additional adjustment when switching to another range. The device is supplied with 24VDC, which can be commoned using lateral push-in type jumper bars in a quick and cost effective way. A green LED on the front panel indicates normal operation.

The bipolar isolation amplifier meets the requirements for safe isolation of input, output and supply circuits with 2.5kV test voltage according to EN 61140.

Temperature coefficient	0.01 % /K
Ambient operating temperature	-25 °C ... +70 °C
Storage temperature	-40 °C ... +85 °C

JUMPFLEX® Transducers

Repeater power supply, configurable with current and voltage output

**Short description:**

The 857-420 Repeater Power Supply links 2- or 3-wire transmitters located in the field. It provides the power required and transmits the analog signals in an electrically isolated way. On the output side, the repeater power supply can be configured for the following analog signals: 0 - 20mA, 4 - 20mA, 0 - 10V, 2 - 10V, 0 - 5V, 1 - 15V. The device has a 3-way isolation with a 2.5kV test voltage. The devices can be configured via DIP switches that are accessible from the side of the housing. Measurement range switching is calibrated. In addition, the device can also be operated as a mere isolation amplifier. Terminal assignment: [IN+(2) and GND1(3)]. The device is supplied with 24VDC, which can be commoned using lateral push-in type jumper bars in a quick and cost effective way.

A green LED on the front panel indicates normal operation. The repeater power supply meets the requirements for safe isolation of input, output and supply circuits with 2.5kV test voltage according to EN 61140.

Repeater power supply, HART

**Short description:**

The 857-421 HART Repeater Power Supply links SMART transmitters located in the field. It provides the power required and transmits the analog signals in an electrically isolated way. Transmission of the data protocol (e.g., HART) is bi-directional for SMART transmitters. Digital signals for data communication between transmitter and process controller are superimposed on the analog current signal, and they are used for diagnosing and calibrating the field transmitters. The device has a 3-way isolation with a 2.5kV test voltage. The device is supplied with 24VDC, which can be commoned using lateral push-in type jumper bars in a quick and cost effective way.

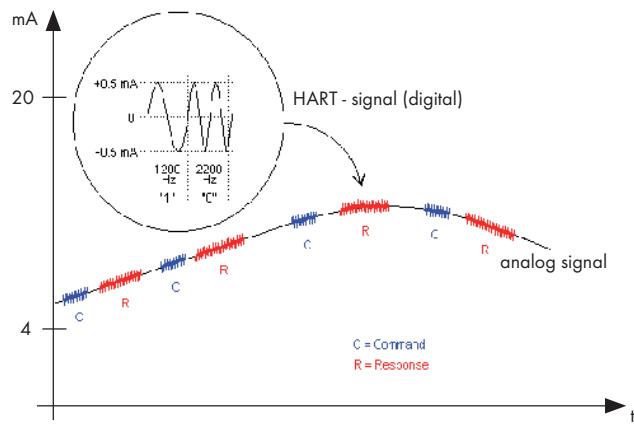

A green LED on the front panel indicates normal operation. The repeater power supply meets the requirements for safe isolation of input, output and supply circuits with 2.5kV test voltage according to EN 61140.

JUMPFLEX® Transducers

Signal splitter with 2 configurable current outputs

**Short description:**

The 857-423 Signal Splitter is used to convert, amplify, filter and electrically isolate analog standard signals. The device has a 3-way isolation with a 2.5kV test voltage. The signal splitter transmits the configurable input signal (0 - 10V, 2 - 10V, 0 - 20mA, 4 - 20mA, 0 - 5V or 1 - 5V) in two analog current outputs that can be set independently of one another between 0 - 20mA and 4 - 20mA. Measurement range switching is calibrated.

The device is supplied with 24VDC, which can be commoned using lateral push-in type jumper bars in a quick and cost effective way.

A green LED on the front panel indicates normal operation. The signal splitter meets the requirements for safe isolation of input, output and supply circuits with 2.5kV test voltage according to EN 61140.

JUMPFLEX® Transducers

Temperature transducer for Pt100, Pt200, Pt500 and Pt1000 as well as resistors 0 ... 1 kΩ; 0 ... 4.5 kΩ

**Short description:**

The 857-800 Temperature Transducer is suitable for the connection of Pt100, Pt200, Pt500 and Pt1000 sensors in 2-, 3- and 4-conductor connection technology. On the input side, 0 - 1kΩ or 0 - 4.5kΩ resistance values can be measured. On the output side, the Pt100 temperature transducer converts the temperature signal into an analog standard signal. The following signals are available: 0 - 20mA, 4 - 20mA, 0 - 10V, 2 - 10V, 0 - 5V, 1 - 5V, 0 - 10mA and 2 - 10mA. The device has a 3-way isolation with a 2.5kV test voltage. The devices can be configured via DIP switches that are accessible from the side of the housing.

Measurement range switching is calibrated.

The device is supplied with 24VDC, which can be commoned using lateral push-in type jumper bars in a quick and cost effective way.

A green LED on the front panel indicates normal operation. The temperature transducer meets the requirements for safe isolation of input, output and supply circuits with 2.5kV test voltage according to EN 61140.

JUMPFLEX® Transducers

Temperature transducer for Pt100, Pt200, Pt500 and Pt1000 * as well as resistors 0 ... 1 kΩ; 0 ... 4.5 kΩ

**Short description:**

The 857-801 Temperature Transducer is suitable for the connection of Pt100, Pt200, Pt500 and Pt1000 sensors in 2-, 3- and 4-conductor connection technology. On the input side, 0 - 1kΩ or 0 - 4.5kΩ resistance values can be measured. On the output side, the Pt100 temperature transducer converts the temperature signal into an analog standard signal. The following signals are available: 0 - 20mA, 4 - 20mA, 0 - 10V, 2 - 10V, 0 - 5V, 1 - 5V, 0 - 10mA and 2 - 10mA. The device has a 3-way isolation with a 2.5kV test voltage. The devices can be configured both via DIP switches that are accessible from the side of the housing and using a FDT/DTM software. The software offers additional setting options such as additional types of sensors at the input or inversion of the analog output. Measurement range switching is calibrated.

The device is supplied with 24VDC, which can be commoned using lateral push-in type jumper bars in a quick and cost effective way. A green LED on the front panel indicates normal operation. The temperature transducer meets the requirements for safe isolation of input, output and supply circuits with 2.5kV test voltage according to EN 61140.

The minimum distance from the start temperature to the end temperature may not fall short of 50K degrees on the Celsius (C) scale or 122K degrees on the Fahrenheit (F) scale.

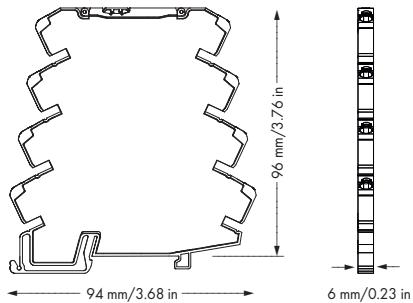

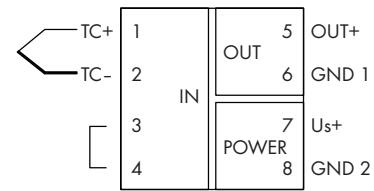

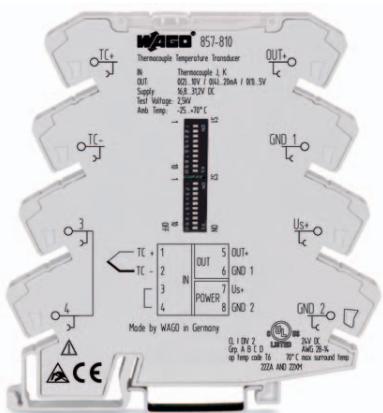

Default settings

In delivery status all DIP switches are in the position "OFF".

- 2-wire
- Pt100
- Start temperature 0 °C
- End temperature 100 °C
- 0 ... 20 mA
- Measuring range underflow 0 mA
- Measuring range overflow 20.5 mA
- Wire break 21 mA
- Short circuit 0 mA

JUMPFLEX® Transducers

Temperature transducer for thermocouples of types J and K

**Short description:**

The 857-810 Thermocouple Temperature Transducer is suitable for the connection of type J and K thermocouples. On the output side, the thermocouple temperature transducer converts the temperature signal into an analog standard signal. The following signals are available: 0 - 20mA, 4 - 20mA, 0 - 10V, 2 - 10V, 0 - 5V, 1 - 5V, 0 - 10mA and 2 - 10mA. The device has a 3-way isolation with a 2.5kV test voltage. It can be configured via DIP switches that are accessible from the side of the housing. Measurement range switching is calibrated. The device is supplied with 24VDC, which can be commoned using lateral push-in type jumper bars in a quick and cost effective way.

A green LED on the front panel indicates normal operation. The temperature transducer meets the requirements for safe isolation of input, output and supply circuits with 2.5kV test voltage according to EN 61140.

Description	Item No.	Pack. Unit
Temperature transducer for thermocouples of types J and K	857-810	1

Approvals		
Shipbuilding ANSI/ISA 12.12.01	@ (pending) Class I, Div. 2, Grp. ABCD, T4	
Conformity marking	CE	
General Specifications		
Dimensions (mm) W x H x L	6 x 96 x 94 Height from upper edge of DIN 35 rail	
Wire connection	CAGE CLAMP®S	
Cross sections	solid: 0.20 mm ² ... 2.5 mm ² / AWG 24 ... 12	
	fine-stranded: 0.34 mm ² ... 2.5 mm ² / AWG 22 ... 12	
Stripped lengths	9 ... 10 mm / 0.37 in	

Technical Data	
Configuration	DIP switch
Input signal	Thermocouples
Output signal	0 ... 20 mA, 4 ... 20 mA, 0 ... 10 V, 2 ... 10 V, 0 ... 5 V, 1 ... 5 V, 0 ... 10 mA, 2 ... 10 mA
Load impedance	≤ 600 Ω (Out = mA) ≥ 2 kΩ (Out = V)
Step response	60 ms / 120 ms with cold junction compensation
Voltage supply V _N	24 V DC
Supply voltage range	16.8 V ... 31.2 V
Current input at 24 V DC	< 40 mA
Sensor types	Thermocouples of types J and K
Temperature range	Type J: -150 °C ... +1200 °C Type K: -150 °C ... +1350 °C
Cold junction compensation	on / off (default: on)
Cold junction error	3 K (typ. 2 K)
Transmission error	≤ 0.1 % at max. measuring span (Typ J, K)
Transmission error of set measuring span	(150 K / set measuring span [K]) %
Temperature coefficient	0.04 % /K
Min. measuring span	100 K (configurable)
Test voltage (input/output/supply)	2.5 kV AC, 50 Hz, 1 min
Ambient operating temperature	-25 °C ... +70 °C
Storage temperature	-40 °C ... +85 °C

JUMPFLEX® Transducers

Threshold value switch with analog input and changeover relay output

**Short description:**

The threshold value switch for analog signals monitors analog standard signals and reports signals exceeding a preset threshold. It is equipped with an analog input and a changeover relay output. The device features a 24VDC nominal voltage supply. In addition, the device has a digital output (DO) to indicate other conditions, such as a range overflow or underflow. The threshold value switch can be configured via DIP switches and teach-in function via push-slider switch. Configuration via FDT/DTM software is also possible.

Description	Item No.	Pack. Unit
Threshold value switch with analog input, changeover relay output and digital output	857-531	1
Accessories		
Configuration software	- 759-370 FDT Frame Application - DTM (Device Tool Manager) Download: see www.wago.com	
WAGO USB Service Cable	750-923	
General accessories	see pages 222 - 223	
Approvals		
Shipbuilding	@(pending)	
ANSI/ISA 12.12.01	Class I, Div. 2, Grp. ABCD, T4	
Conformity marking	CE	
General Specifications		
Dimensions (mm) W x H x L	6 x 96 x 94	
	Height from upper edge of DIN 35 rail	
Wire connection	CAGE CLAMP®S	
Cross sections	solid: 0.08 mm ² ... 2.5 mm ² / AWG 28 ... 12	
	fine-stranded: 0.34 mm ² ... 2.5 mm ² / AWG 22 ... 12	
Stripped lengths	9 ... 10 mm / 0.37 in	

Technical Data	
Configuration	DIP switch, teach-in function, configuration software
Input signal	-10...+10 V, -20...+20 mA, 0...+30 V
Max. input signal	(31.2 V (U _N) 100 mA (I _N))
Input resistance	≤ 200 Ω (I input) > 100 kΩ (U input)
Output - Relay	
Contact type	1 changeover contact
Max. switching voltage	250 V AC
Max. continuous current (terminal)	max. 6 A (to 60 °C), 3 A (60 to 70 °C)
Max. Switching power (resistive)	1250 VA AC
Switching threshold	1 bzw. 2 (adjustable)
Configurable rise and fall delay time	10 s (via DIP switch),
Output - Digital	
Max. switching voltage	Supply voltage
Max. continuous current	500 mA (to 60 °C) 100 mA (60 to 70 °C)
Supply voltage range	16.8 V ... 31.2 V
Test voltage	
(input/output/supply)	2.5 kV AC, 50 Hz, 1 min
Ambient operating temperature	-25 °C ... +70 °C
Storage temperature	-40 °C ... +85 °C

"Teach-In" Switch Operation**Default settings**

In delivery status all DIP switches are in the position "OFF".

- Input range: ± 10 V
- Hysteresis: 5 mV
- Configurable rise/fall delay time: 0 s
- DO: not active

WAGOframe

FDT frame application for parameterization, commissioning and diagnostics of devices with DTM device driver

WAGOframe: Parameterizing a JUMPLEX® transducer

WAGOframe: Wizard function

WAGOframe is an FDT/DTM-based software used for parameterization, commissioning and diagnostics of field devices.

DTM device drivers for the devices employed are required to use the WAGOframe FDT frame application.

The WAGOframe FDT frame application provides a wizard, which simplifies the operation of components, such as WAGO JUMPFLEX® DTMs.

For example, this wizard guides the user through the different operating modes of DTM device drivers.

Depending on the PC communication interface used, an appropriate communication cable including DTM is required.

3

The WAGO USB Service Cable connects a PC (notebook) to either the service Interface of the 857 Series Signal Conditioners and Relay Modules (JUMPFLEX®) or to WAGO-I/O-SYSTEM buscoupplers/controllers.

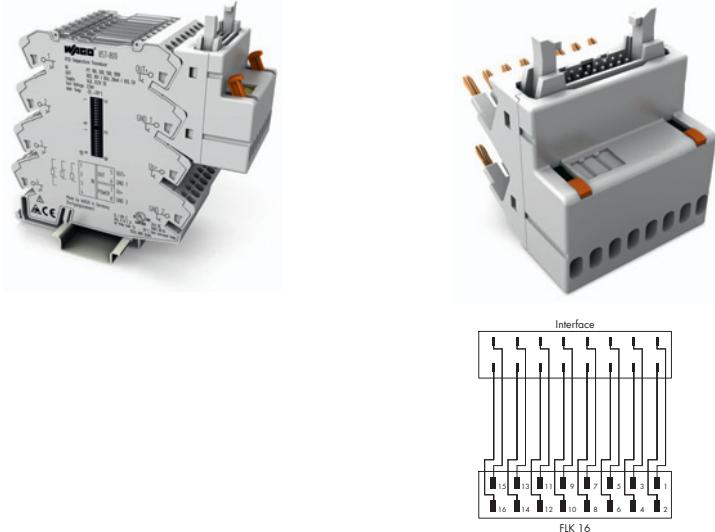

Notice:

Using the WAGO 759-923 USB Service Cable in combination with some of the programmable fieldbus controllers requires a certain firmware version or higher:

750-841 as from firmware version 12

750-872/0020-0000 as from firmware version 2

	8-channel adapter with 16-pin ribbon cable connector Analog

Primary Switch Mode Power Supplies

EPSITRON - PRO - Power

	Output voltage 24 V DC; 5 A, open circuit and short-circuit protected, adjustable output voltage, LED status indication, PowerBoost	Output voltage 24 V DC; 10 A, open circuit and short-circuit protected, adjustable output voltage, LED status indication, PowerBoost
--	--	---

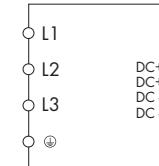

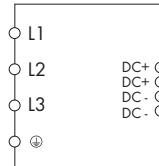

- Primary switch mode power supply with PowerBoost and TopBoost
- Stand-by input for switching off the output and minimizing power consumption
- Parallel operation, series connection possible
- Prepared for class I equipment
- Natural convection cooling when horizontally mounted
- Enclosed for use in switchgear cabinets

Description	Vo nom	Item No.	Pack. unit	Vo nom	Item No.	Pack. unit
Primary switch mode power supplies, for DIN 35 rail	24 V DC, SELV	787-822	1	24 V DC, SELV	787-832	1
Technical Data						
Nominal input voltage Vi nom	100 V ... 240 V AC			100 V ... 240 V AC		
Input voltage range	85 V ... 264 V AC (120 V ... 373 V DC)			85 V ... 264 V AC (120 V ... 373 V DC)		
Frequency	44 Hz ... 66 Hz			44 Hz ... 66 Hz		
Input current li	0.97 A at 230 V AC and 5 A DC			1.2 A at 230 V AC and 10 A DC		
Inrush current	< 15 A			≤ le (active inrush current limitation)		
Mains failure hold-up time	35 ms typ. at 230 V AC			24 ms typ. at 230 V AC		
Internal/external fuse	4 AT			6.3 AT		
Nominal output voltage Vo nom	24 V DC, SELV			24 V DC, SELV		
Output voltage range	22 V... 29.5 V DC adjustable			22 V... 29.5 V DC adjustable		
Output current Io	5 A at 24 V DC			10 A at 24 V DC		
PowerBoost	10 A DC (for 4 sec.); 7.5 A DC (for another 2 sec.)			20 A DC (for 4 sec.); 15 A DC (for another 2 sec.)		
TopBoost	23 A DC (for 25 ms)			60 A DC (for 25 ms)		
Residual ripple	< 70 mVpp			< 70 mVpp		
Derating	-2.5 % / K (> 55 °C)			-2.5 % / K (> 55 °C)		
Adjustment accuracy	1 %			1 %		
Current limitation	1.1 × Io typ.			1.1 × Io typ.		
Efficiency	87.8 % typ.			91.8 % typ.		
Test voltage pri.gr./pri.sec./sec.gr.	- / 4.2 kV / -			- / 4.2 kV / -		
Degree of protection	IP20			IP20		
Operational indication	LED green (Vo), LED red (error)			LED green (Vo), LED red (error)		
Power loss Pv	0.5 W (stand-by) / 5.0 W (no load) / 14.6 W (rated load)			0.8 W (stand-by) / 3.5 W (no load) / 19.7 W (rated load)		
Signaling	Relay contact DC O.K. (changeover contact)			Relay contact DC O.K. (changeover contact)		
Type of mounting	DIN-rail mounting (EN 60715) in 2 positions			DIN-rail mounting (EN 60715) in 2 positions		
Ambient operating temperature	-10 °C ... +70 °C			-10 °C ... +70 °C		
Storage temperature	-25 °C ... +85 °C			-25 °C ... +85 °C		
Dimensions (mm) W x H x L	57 x 163 x 163			57 x 163 x 179		
Wire connection	Height from upper-edge of DIN 35 rail			Height from upper-edge of DIN 35 rail		
Cross sections	Input: 0.08 mm² ... 2.5 mm² / AWG 28 ... 12 Output: 0.08 mm² ... 2.5 mm² / AWG 28 ... 12 Signalising: 0.08 mm² ... 0.5 mm² / AWG 28 ... 20			Input: 0.08 mm² ... 2.5 mm² / AWG 28 ... 12 Output: 0.08 mm² ... 2.5 mm² / AWG 28 ... 12 Signalising: 0.08 mm² ... 0.5 mm² / AWG 28 ... 20		
Stripped lengths	Input: 8 ... 9 mm / 0.33 in Output: 8 ... 9 mm / 0.33 in Signalising: 5 ... 6 mm / 0.22 in			Input: 8 ... 9 mm / 0.33 in Output: 8 ... 9 mm / 0.33 in Signalising: 5 ... 6 mm / 0.22 in

	<p>Back-up capacitor module smoothes unstable 24 V DC power supplies Mounting carrier for DIN 35 rail</p>	
--	--	--

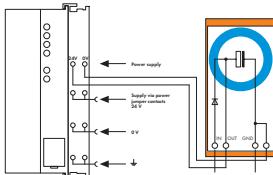

This module is equipped with a capacitor which smoothes unstable 24VDC power supplies in case the voltage tolerances mentioned in our data sheets cannot be ensured. Reasons for voltage transients could be:

- Voltage disconnections (switching transients) on primary side
 - Overloads on secondary side
 - Switching of inductive or capacitive loads

The back-up capacitor module is connected between the 24V power supply and the electronic device which has to be protected.

Notice:

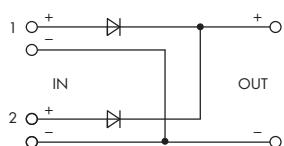

If using a non-filtered single-phase power supply, the capacitor causes a voltage increase.

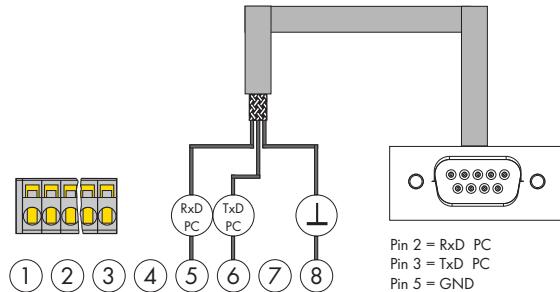

EPSITRON - Redundancy Module

	Redundancy module 24 V DC, 20 A	
--	--	--

- Redundancy module with 2 inputs for decoupling 2 power supplies
 - For redundant or uninterruptible power supply
 - With potential-free contact for input voltage monitoring

EPSITRON - RS-232 Communication Cable

The 787-890 Communication Cable is used for configuration and visualization via PC or controller.

It is suitable for all 787 Series devices equipped with an RS-232 serial interface.

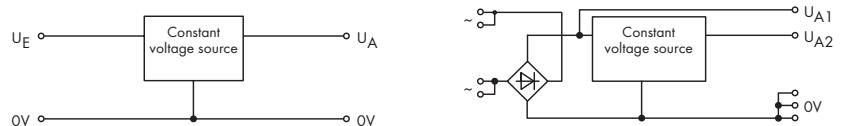

PC software for 787 Series devices can be downloaded at: www.wago.com/epsitron

Function blocks for communication with WAGO-I/O-SYSTEM 750 are also available.

NOTE:

NOTE: The 787-890 Communication Cable is not electrically isolated.

Description	V _N / V _O	Item No.	Pack. Unit	V _N / V _O	Item No.	Pack. Unit
DC/DC converter, for DIN 35 rail	24 V DC / 5 V DC ± 2 %	859-801	1	24 V DC / 10 V DC ± 2 %	859-802	1

Technical Data

Nominal input voltage (V _N)	24 V DC	24 V DC
Input voltage range	10 V ... 30 V DC	15 V ... 30 V DC
Output voltage	5 V DC ± 2 %	10 V DC ± 2 %
Output current (max.)	500 mA	500 mA
Line regulation, max. (full load, over input voltage range)	2 %	0.5 %
Max. load regulation (no load to full load, nominal input)	0.5 %	0.7 %
Efficiency at full load (24 V DC in)	70 %	85 %
Output noise peak-to-peak max. (20 MHz bandwidth)	150 mV	20 mV
Switching frequency	200 kHz (nominal)	200 kHz (nominal)
Isolation	non-isolated	non-isolated
Reverse voltage protection, input	yes	yes
Minimum load requirement	no	no
Max. transient recovery time (recovery time for load change from 25 % to 75% of full load)	40 µs	500 µs
Max. startup time (24 V DC in, full load)	3 ms	3 ms
Max. hold time (nominal input voltage, full load)	1 ms	500 µs
Input fuse	TVS diode	TVS diode
Output short circuit protection	temporary (short-circuit of the output for 1 minute without damage to the device)	temporary (short-circuit of the output for 1 minute without damage to the device)
Temperature coefficient	70 ppm/°C	100 ppm/°C
Ambient operating temperature	0 °C ... +40 °C	-25 °C ... +55 °C
Dimensions (mm) W x H x L	6 x 56 x 91	6 x 56 x 91
	Height from upper-edge of DIN 35 rail	Height from upper-edge of DIN 35 rail

WAGO Radio Receiver with EnOcean Technology

The Benefits for Electronic and Radio Technology

Item No. 750-642

Radio Receiver in DIN-Rail Mount Enclosure

The stand-alone solution for DIN-rail mounting:
4-channel radio receiver module in 70mm
DIN-rail mount enclosure.

Version 1: 4 make contacts,
up to 16 A load carrying capacity

Version 2: 4 changeover contacts,
up to 8 A load carrying capacity per channel.

Item No. 789-601 (make contacts)

Item No. 789-602 (changeover contacts)

Radio Receiver in WINSTA® Box

All integrated: e.g. a complete blinds control (2-way sunblind outputs for 230V/2A) or a 4-channel module for lighting control (4-way switch output 230V/16A) with receiver and all required switching relay.

The WINSTA® boxes are suitable for wall-, floor- and ceiling-mounting.

Item No. 770-629/102-000 (sunblinds control)

Item No. 770-629/101-000 (lighting control)

Radio Transmitter

Radio transmitter integrated in
universal switch insert.

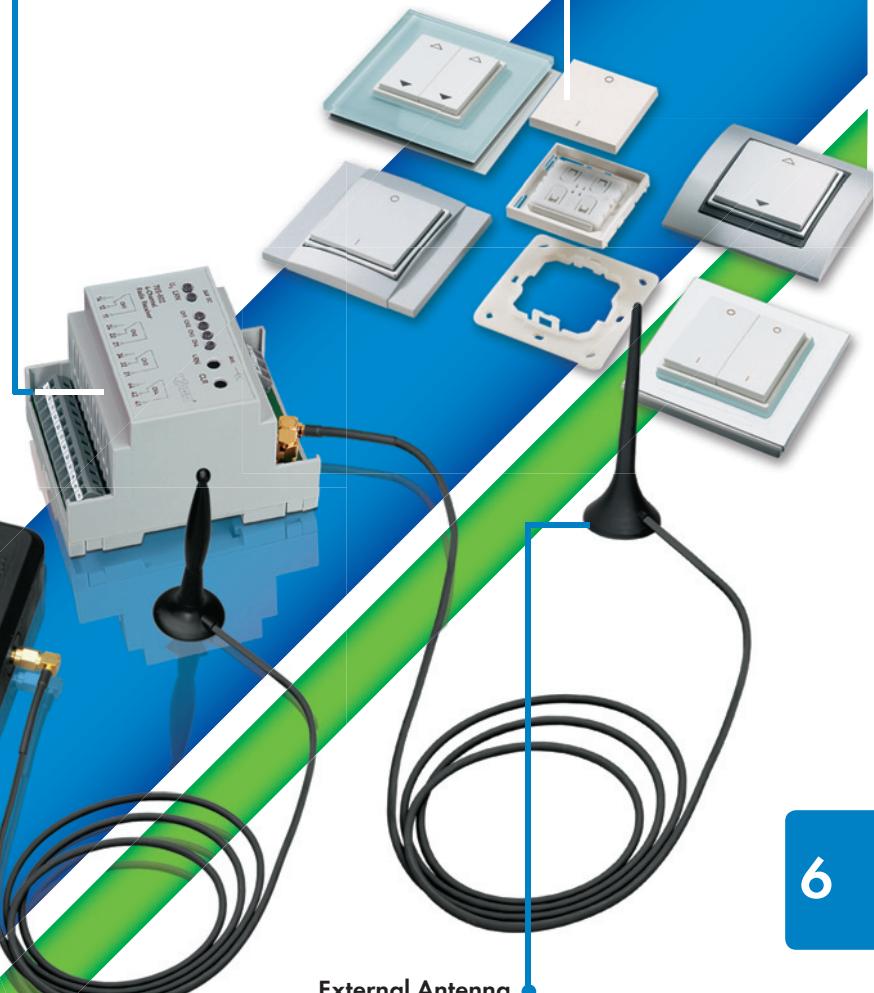

Item No.

758-940/001-000 (2-channel light)

758-940/003-000 (4-channel light)

758-940/002-000 (2-channel roller blinds)

758-940/004-000 (4-channel roller blinds)

External Antenna

The antenna fits to all WAGO
products shown here and is
connected using an SMA socket.
The antenna has a magnetic stand
and a 2.5m long coax cable.

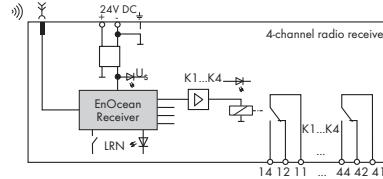

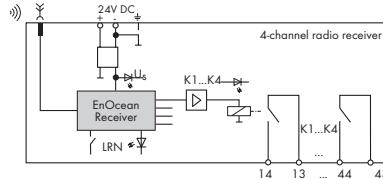

Item No. 758-910

4-Channel EnOcean Radio Receivers in DIN-Rail Mount Enclosure

	4-channel EnOcean radio receiver with 4 make contacts, 16 A	4-channel EnOcean radio receiver with 4 changeover contacts, 8 A
--	--	---

The 4-channel radio receiver in DIN-rail mount enclosure is used to switch 4 independent electrical devices or loads. The radio receiver processes telegrams transmitted by sensors (binary information) using EnOcean radio technology (PTM + STM modules). The outputs are switched via relay contacts.

- Radio receiver for battery-less and wireless sensors
- LED indication of switch status
- External antenna for optimum transmission range (required)
- Frequency band 868 MHz
- Transmitter-to-receiver assignment via learn mode

WINSTA® Radio Receiver

	4-channel radio receiver with 4 make contacts	2-channel radio receiver with sunblind outputs
--	--	---

The 4-channel radio receiver is used to switch 4 independent electrical devices. The 2-channel radio receiver has 2 sunblind outputs that can be controlled independently from each other. The radio receiver processes telegrams transmitted by switches using EnOcean radio technology (STM modules). The outputs are switched via relay contacts.

- Radio receiver for battery-less and wireless sensors
- LED indication of switch status
- External antenna for optimum transmission range (required)
- Frequency band 868 MHz
- Transmitter-to-receiver assignment via learn mode
- The state of outputs can be predefined for a power failure scenario
- Wire connection using WINSTA connectors

Radio Receiver and Transmitter

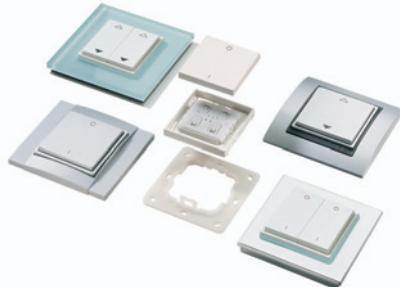

**External antenna, GSM
900/1800**

Description	Technical Data	Item No.	Pack. unit
External antenna	Frequency band: 870 MHz ... 960 MHz; 1710 MHz ... 1880 MHz VSWR: 870 MHz ... 960 MHz < 1.5; 1710 MHz ... 1880 MHz < 1.5 Gain: 870 MHz ... 960 MHz 0 dB; 1710 MHz ... 1880 MHz 0 dB Max. Power: 20 W Cable length: 250 cm Connector: SMA right angle plug + ferrite bead	758-910	1

Notes on operating the antenna with WAGO EnOcean radio receivers: The antenna is to be mounted on a plate measuring at least 9.8 x 9.8 inches (25 x 25 mm) The distance of interfering sources to the antenna and antenna line must be at least 11.8 inches (30 mm) and the free space between the antenna and the next wall must be at least 13.78 inches (35 mm). The antenna cable should, under no circumstances, be bent sharply, since irreversible damage may result to the antenna (RG 174 bend radius > 0.6 inches/15mm)

**Radio transmitter,
EnOcean easyfit PTM
250**

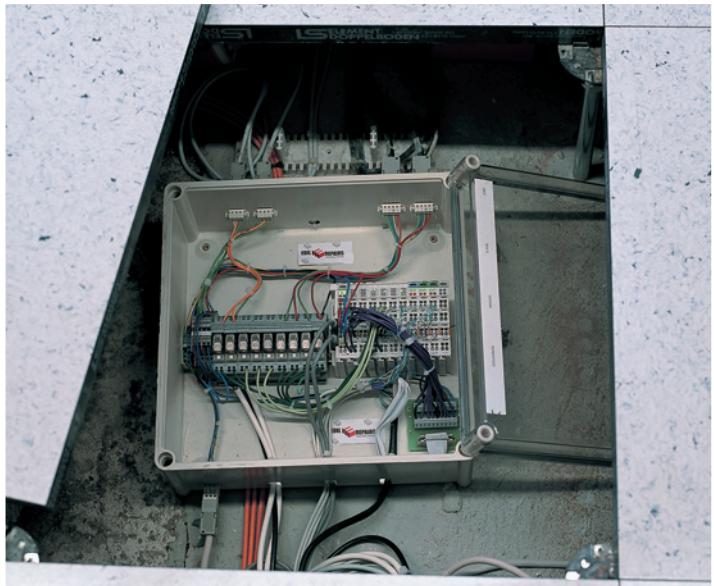

Description	Technical Data	Item No.	Pack. unit
2-channel light	Integrated radio transmitter: EnOcean PTM 200 Energy harvesting source: electrodynamic energy generator, maintenance free Radio technology / range: EnOcean 868 MHz, RPS Type 2; 300 m free field, typ. 30 m within buildings Total installation height: 14 mm (frame lies directly against the wall)	758-940/001-000	1
4-channel light		758-940/003-000	1
2-channel roller blind		758-940/002-000	10
4-channel roller blind	Dimensions of rocker /frame cut-out /central plate: 50 x 50 mm / 55 x 55 mm / 71 x 71 mm Color: white	758-940/004-000	1

The universal switch insert can be integrated into numerous control programmes by different manufacturers, e.g.: BERKER, GIRA, JUNG and MERTEN. Delivery is without frame. Frames of the desired control programm have been ordered separately.

WAGO Application: Bellinzona Business Center (Tessin), Switzerland

Accessories

Unlocking pliers for component plug housing

WSB-marker cards

Description	Item No.	Pack. Unit
Unlocking pliers for component plug housing	210-492	1
WSB Quick marking system for module width 5 - 17.5 mm	209-501	5 cards
Marking 1 ... 10 (10 x) 10 strips with 10 markers, white with black printing	209-702	5 cards

Adjust the pliers to the proper housing width

Insert the pliers into the locking slots . . .

. . . by compressing the pliers . . .

. . . the cover is removed.

2-conductor terminal block

4-conductor terminal block

Description	Item No.	Pack. Unit
Terminal block for pluggable modules, with 2-conductor terminal blocks, orange separator	280-618	1
with 4-conductor terminal blocks, orange separator	280-608	1
Terminal block for pluggable modules, with 2-conductor terminal blocks, orange separator	280-619	1
with 4-conductor terminal blocks, orange separator	280-609	1
Terminal block for pluggable modules, with 2-conductor terminal blocks, orange separator	280-638	1
with 4-conductor terminal blocks, orange separator	280-628	1
Terminal block for pluggable modules, with 2-conductor terminal blocks, orange separator	280-639	1
with 4-conductor terminal blocks, orange separator	280-629	1

Wire range 0.08 mm² ... 2.5 mm² / AWG 28 ... 14; Stripped lengths 8 ... 9 mm / 0.33 in

Other Terminal blocks see Full Line Catalog, Volume 1, Rail-Mounted Terminal Block Systems

Empty Component Plug Housings for Building Custom Circuits

280 Series, empty component plug housings for building custom circuits

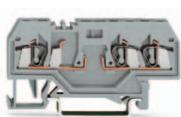

Description		Item No.	Pack. Unit
Empty component plug, type 1	2-pole, 5 mm / 0.197 in wide; Inside dimensions of plug W/H/D 3.2/15/15 mm (0.126/0.591/0.591 in)	280-801	100
Empty component plug, type 2	2-pole, 10 mm / 0.394 in wide; Inside dimensions of plug W/H/D 8.2/15/15 mm (0.323/0.591/0.591 in)	280-802	50
Empty component plug, type 3	4-pole, 10 mm / 0.394 in wide; Inside dimensions of plug W/H/D 8.2/15/15 mm (0.323/0.591/0.591 in)	280-804	50

250 V / 4 KV / 3 (rated voltage/ rated surge voltage/ pollution degree);

2-conductor terminal

3-conductor terminal

4-conductor terminal

Description		Item No.	Pack. Unit
2-conductor terminal block	gray, terminal block width 5 mm / 0.197 in, marking on both sides	280-616	100
2-conductor terminal block	gray, terminal block width 5 mm / 0.197 in, marking in center position	280-916	100
3-conductor terminal block	gray, terminal block width 5 mm / 0.197 in	280-610	100
4-conductor terminal block	gray, terminal block width 5 mm / 0.197 in, marking on both sides	280-606	100
4-conductor terminal block	gray, terminal block width 5 mm / 0.197 in, marking in center position	280-686	100

Wire range 0.08 mm² ... 2.5 mm² / AWG 28 ... 14; Stripped lengths 8 ... 9 mm / 0.33 in

Mounting Carrier for DIN-Rail Mounting PCBs

Mounting carrier size 1

Description	Item No.	Pack. Unit
Lateral cover, size 1, small, 6.35 mm /0.25 in thick	288-601	1
Fixing foot for mounting on DIN 35 rails	288-602	1
Track section, size 1, 1 m /3'3" long	288-600	1

In order to determine the length of a complete mounting carrier:

Length of PCB: L1

Length of track section: L2 = L1 – 11 mm /0.433 in

Length of mounting carrier: L3 = L1 + 1.7 mm/0.067 in

with lateral cover size 1, 6.35 mm/0.25 in thick.

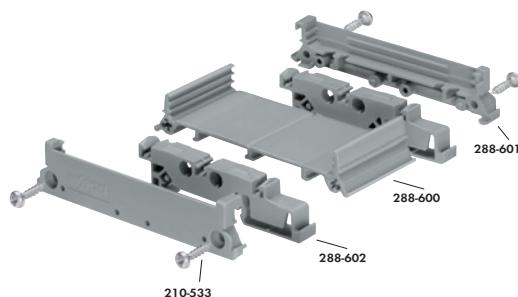

Distance between PCB and upper groove of track section is 5 mm/0.197 in PCB tolerances: thickness $1.5 \text{ mm} \pm 0.2 \text{ mm}$, length/width $\pm 0.2 \text{ mm}$; -0.1/+0.3 for milling contours

Marker strips

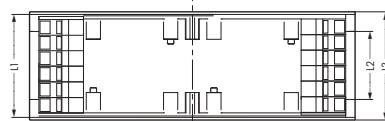

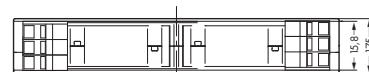

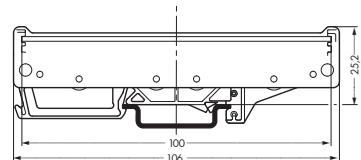

Description	Item No.	Pack. Unit
Phillips screw 2.9 x 13*	210-533	25
7.5x0.5mm on roll 5x1m, white	709-198	1
7.5x0.5mm on roll 5x1m, translucent	709-196	1

Mounting carrier size 1

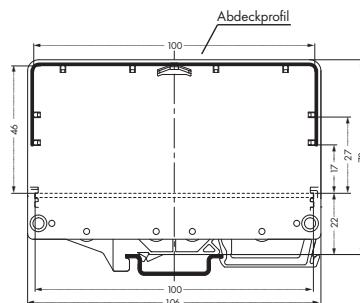

Mounting Carrier for DIN-Rail Mounting PCBs

Mounting carrier size 2

Description	Item No.	Pack. Unit
Lateral cover, size 2, small*, 8.75 mm /0.344 in thick	288-621	1
Fixing foot for mounting on DIN 35 rails	288-622	1
Track section, size 2, 1 m /3'3" long	288-620	1

Mounting carrier size 2, with covering section

Description	Item No.	Pack. Unit
Lateral cover, size 2, big* 8.75 mm /0.344 in thick	288-626	1
Covering section, size 2, 1 m /3'3" long	288-627	1

In order to determine the length of a complete mounting carrier:

Length of PCB: L1

Length of track section: L2 = L1 - 15,8 mm/0.622 in

Length of mounting carrier: L3 = L1 + 1.7 mm/0.067 in

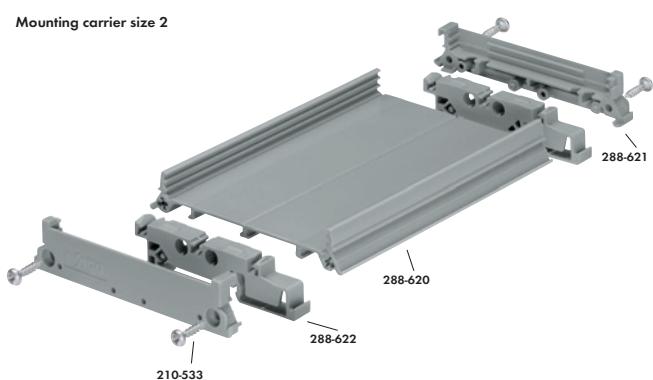

Length of covering section: L4 = L1

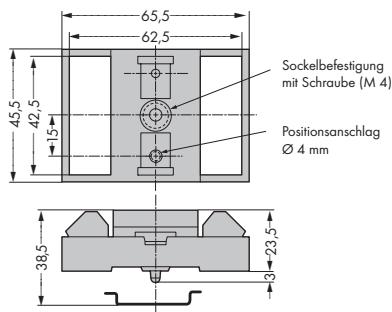

with lateral cover, size 2, 8.75 mm/0.344 in thick

Distance between PCB and upper groove of track section is 5 mm/0.197 in PCB

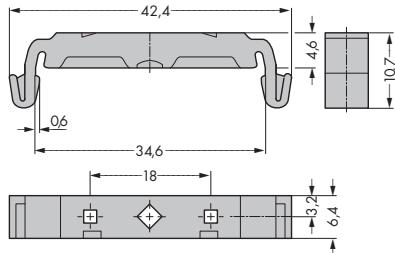

tolerances: thickness $1.5 \text{ mm} \pm 0.2 \text{ mm}$, length/width $\pm 0.2 \text{ mm}$; $-0.1/+0.3$ for milling contours

Mounting carrier size 2

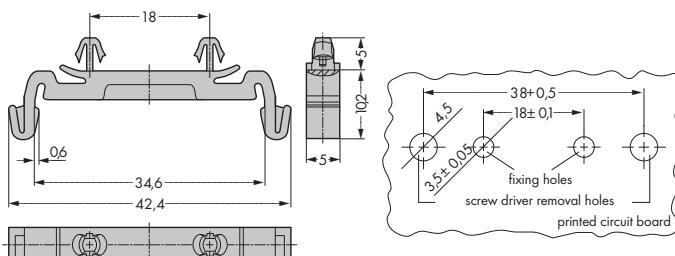

Description		Item No.	Pack. Unit
Mounting carrier	For screw-fixing or DIN-rail mounting with snap-fit type universal mounting feet (then needs 2 x mounting feet)	288-001	1
Universal mounting foot	Snap-fit type, suitable for DIN 15, 32 and 35 rails	288-002	10
Universal mounting foot	Suitable for Europa card (100 x 160) mm	288-003	1

Description		Item No.	Pack. Unit
Mounting foot	For screw-fixing to relay modules, holes for fixing screws 2 mm/0.079 in, PCB hole Ø 3.2 mm/0.126 in, distance 18 mm/0.709 in,	209-120	25
Fixing screw	For mounting foot 209-120	209-119	50

Description		Item No.	Pack. Unit
Mounting foot	For snap-fit mounting to relay modules, for fixing hole Ø 3.5 mm/0.138 in, distance 18 mm/0.709 in, for mounting on DIN 35 rail	209-188	25

Shield (Screen) Connecting System Description and Handling

Carrier with grounding foot
45 mm/1.772 in long, busbar 90° to the rail
Item No. 790-113

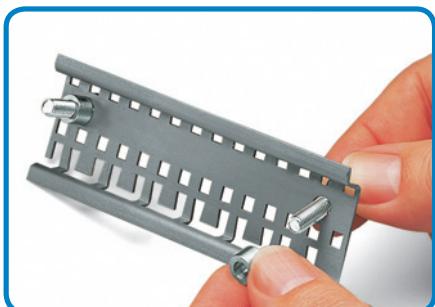

Carrier with grounding foot
45 mm/1.772 in long, busbar parallel to the rail
Item No. 790-114

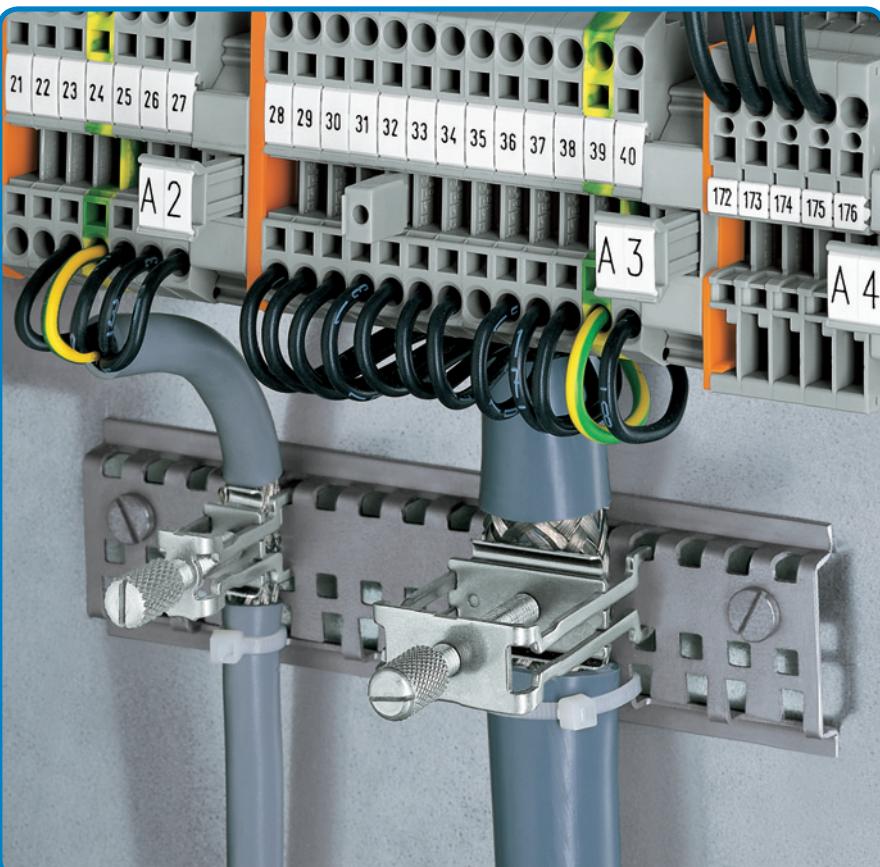

Carrier with 2 grounding feet
125 mm/4.921 in long, busbar parallel to the rail
Item No. 790-115

for all sizes of shield (screen) clamping saddles

Using a stand off
with a special slotted carrier rail

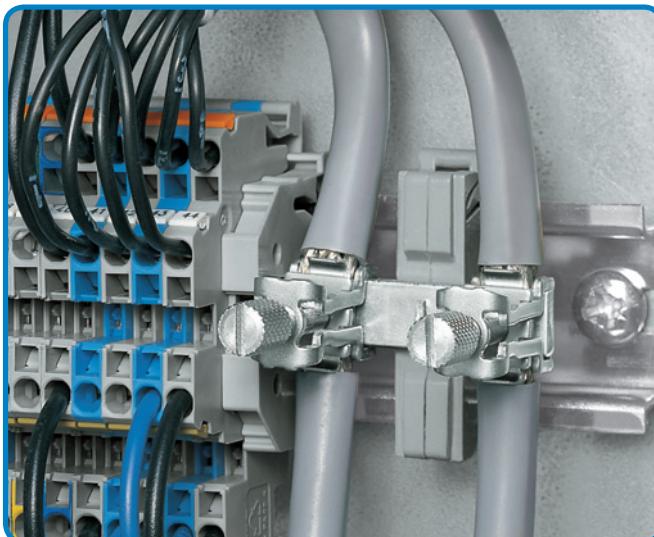

Addition of a shield (screen) clamping saddle.

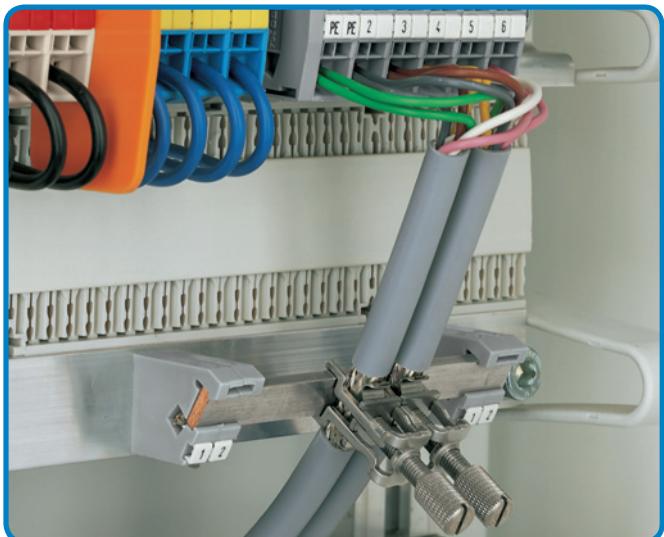

Tightening/releasing a shield (screen) clamping saddle. To attach the clamping saddle, tighten the knurled screw. To remove, unscrew until ratcheted mechanism is released, then slightly tip saddle and remove the clamping saddle.

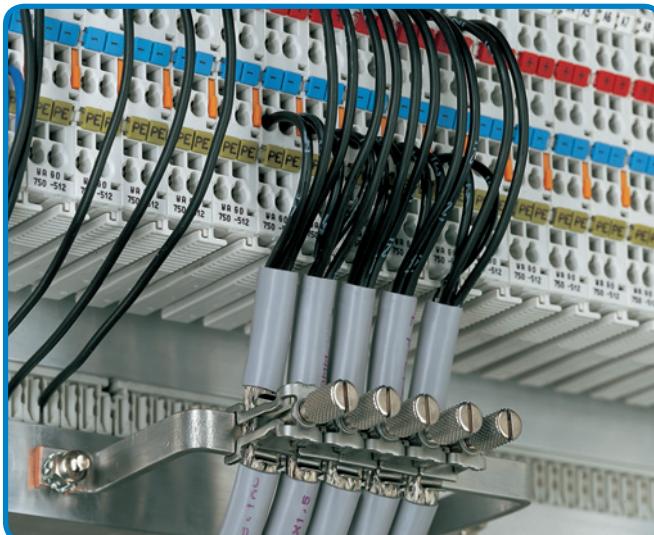

Mounting Options Based on Application

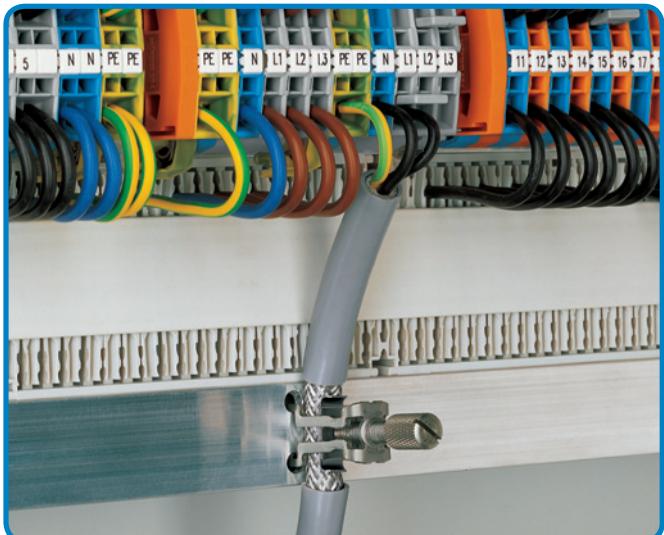

- carrier with grounding foot, busbar parallel to the rail

- isolated mounting carriers for a common shield (screen) reference potential, independent of the housing potential

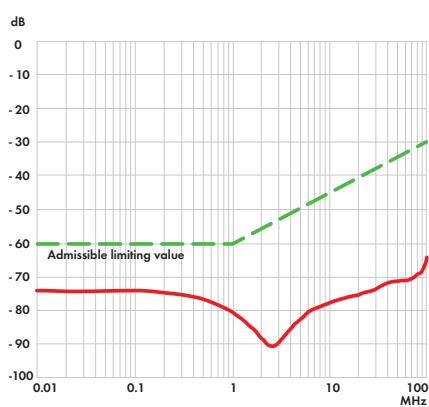

- U-shaped copper busbar 10 mm (0.394 in) x 3 mm (0.118 in)

- snap into any metal plate up to max. thickness 3 mm/0.118 in

Negative shield (screen) attenuation

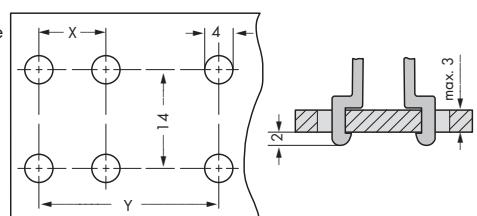

Shield (screen)
clamping saddle size

Distance X
11 mm 9.5 mm

Distance Y
19 mm 17.5 mm

27 mm 25.5 mm

43 mm 41.5 mm

Hole dimensions for panel mounting

The WAGO shield (screen) connecting system is highly effective because the clamping unit can be brought very close to the unshielded part of the cable. Additionally, the spring material is part of the clamping saddle, giving good electrical connection and compensating for any deformation in the braiding. The system also acts as a partial strain relief.

Shield (Screen) Clamping Saddles and Shield (Screen) Clamps

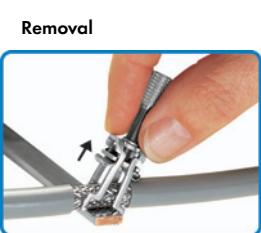

Shield (screen)
clamping saddles

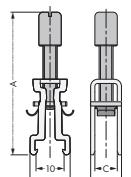

Description	Diameter of Connectable Conductor	Item No.	Pack. Unit	
Shield (screen) clamping saddle, incl. knurled screw	11 mm/0.433 in wide 19 mm/0.748 in wide 27 mm/1.063 in wide 43 mm/1.693 in wide	up to 8 mm/0.315 in 7 mm/0.276 in to 16 mm/0.63 in 6 mm/0.236 in to 24 m /0.944 in 22 mm/0.866 in to 40 mm/1.575 in	790-108 790-116 790-124 790-140	50 (5x10) 50 (5x10) 50 (5x10) 50 (5x10)

Note: Not for ground connections! **Recommended tightening torque: 0.5 Nm** **Assembly:** The shield (screen) clamping saddle is shipped ready for direct connection to the busbar 10 mm (0.394 in) x 3 mm (0.118 in) or to a drilled mounting plate. After connection, tighten the knurled screw to complete the installation.

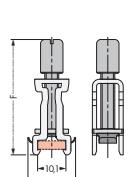

Removal: To remove a shield (screen) clamping saddle, unscrew until ratcheted mechanism is released, then slightly tip saddle and remove the clamping saddle.

ProServe Designing, Assembling and Marking

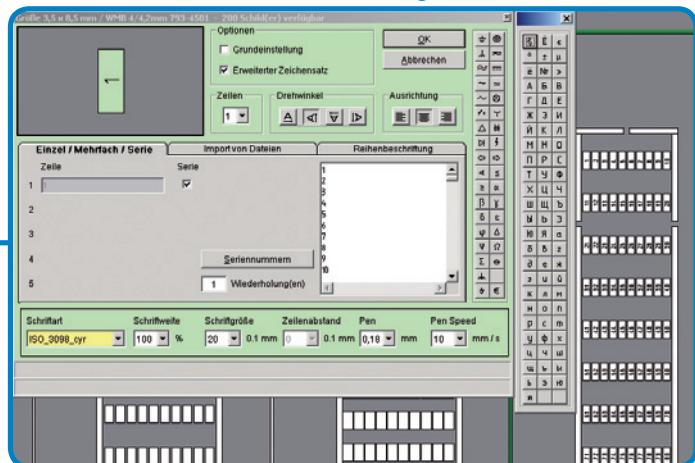

The benefits of ProServe are at your disposal every day. With unique features such as accuracy checking, ProServe does a lot of the work for you, therefore saving you time and money.

Immediate access to professional and sophisticated services allows for error-free applications, higher flexibility in your daily business and better customer service. With 50 years of WAGO expertise at your disposal, put ProServe to work for you in your next application.

ProServe Marking: Now Easier than Ever

Configuration and marking of rail assemblies and I/O nodes, stand-alone or in combination with CAE systems.

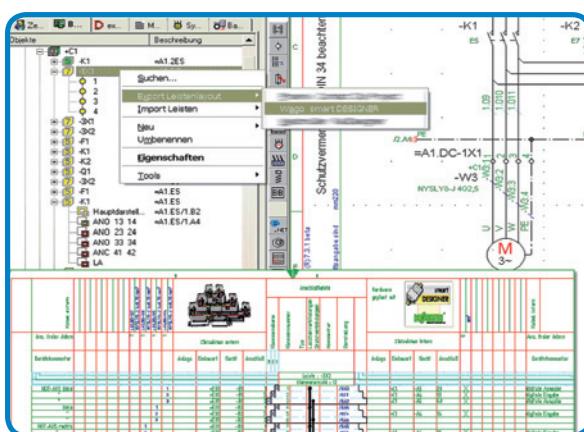

smartMARKING

- Extensive import functions from CAE systems, MS Office and WAGO smartDESIGNER
- WYSIWYG marking
- Automatic plotter calibration
- Extensive library including marker carriers
- Symbol library
- Text length checking
- Different languages available
- Output of East European characters
- Fully compatible with EG 450 engraving unit
- Direct output on thermal transfer printer
- Creation of custom markers for the engraver/plotter

smartMARKING

ProServe: Open for All

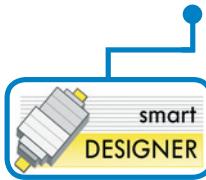

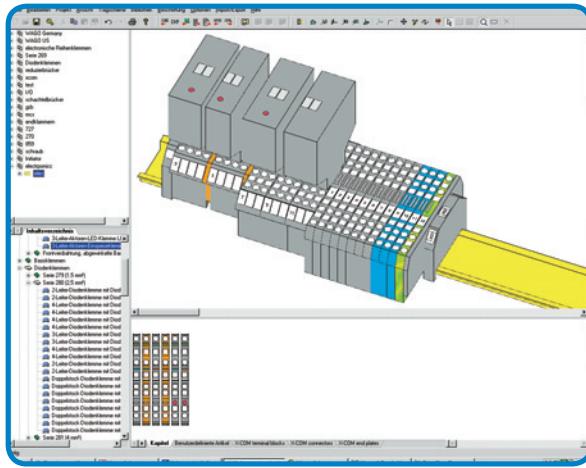

One for all: WAGO ProServe has an interface suitable for most of the standard CAD/CAE systems.

ProServe: Planning at a New Level

WAGO ProServe means finding instead of searching, drawing instead of scribbling. ProServe navigates safely through the WAGO range of products, generates parts lists and assembly drawings and even 3D views.

smart DESIGNER

product LOCATOR

smartDESIGNER and productLOCATOR

- XML interfaces to CAE and M CAD programs
- Output in PDF and HTML
- Different search functions allow for quick selection of products
- Creation of part lists including product pictures and custom part numbers
- Complex rail assemblies can be easily designed in 3D
- Facility to create custom part numbers
- Creation of custom articles to design third-party products
- Default parts (favourites) can be defined individually for time saving design
- Intelligent, user-optimized accuracy check features
- 15 languages available
- 16,000 items

Marking:

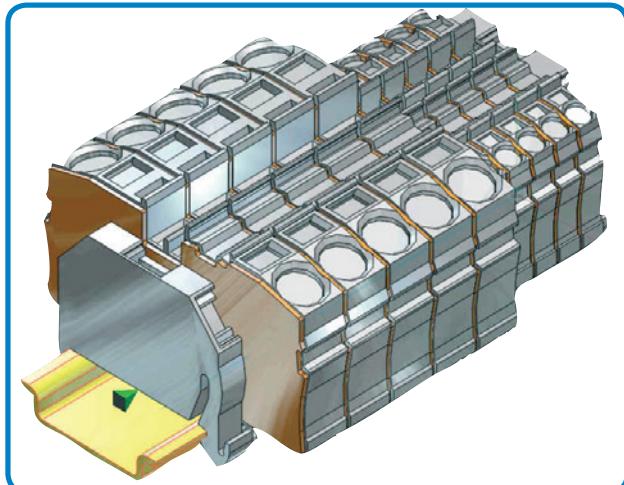

- Direct creation and output of marking data to plotter or thermal transfer printer

ProServe: Thinking in All Dimensions

Rail-mounted terminal blocks are becoming even more efficient and more complex: Multilevel as well as base receptacle terminal blocks with different conductor entry angles can no longer be represented by a simple view. The 3D view provides a clear representation during planning and assembly. Use our data in your system – now also online.

DXF - Step - IGS - DWG

CAD

Benefits in overview:

- Quick design
- Quick ordering
- User-friendly
- Extensive and user-specific documentation
- Network compatibility
- Several software products on a single CD (smartDESIGNER, productLOCATOR, smartMARKING, WAGO SCRIPT)
- A price list is included

...all for free!

- Create your 2D or 3D CAD files from WAGO ProServe. Now also online!

Thermal Transfer Printers

WAGO TP 343 and TP 298

Description	Item No.	Pack. Unit
	258-343	1
Thermal Transfer Printer TP 343		
Resolution 300 dpi, incl. ProServe Software; for 2009 and 709 Series marking strips		
Technical Data		
Printing method	Thermal/thermal transfer	
Printhead system	Thin-film transfer head	
Print resolution	300 dpi	
Print speed	up to 76 mm/sec.	
Print width	6 - 104 mm (0.25" - 4.09")	
Print length	up to 990 mm (39")	
RAM memory	2 MB DRAM, 1 MB Flash	
Interfaces	Parallel Centronics (LPT), RS-232 (COM), USB, ETHERNET 10/100 Base T	
Sensors	Label sensor (material end, foil end, bottom reflective sensor)	
Other	2 cardboard cores (104 mm) for ink ribbon rewinder Operating instructions in German and Englisch	
Voltage supply	Universal power supply unit	
Operating voltage	100 V ... 240 V AC / 50 Hz ... 60 Hz	
Dimensions (mm) W x H x L	230 x 200 x 290 (Dimension with winder ca. 450 mm)	
Enclosure	Double-walled plastic	
Weight	1000 g	
Safety Approvals	CE, FCC Class A, UL, CUL, TUV	
Accessories	1 x USB cable; 1 x ETHERNET cable; unwinder set; marking strips (1 x 2009-110); ink ribbon (1 x 258-145)	

Description	Item No.	Pack. Unit
	258-298	1
Thermal Transfer Printer TP 298		
Resolution 300 dpi, incl. ProServe Software and Print Roller (258-178) for WMB Inline and 2009 and 709 Series marking strips		
Technical Data		
Printing method	Thermal/thermal transfer	
Printhead system	Thick-film	
Print resolution	300 dpi	
Print speed	100 mm/sec.	
Print width	108.4 mm	
See-through/reflective sensor	standard	
Processor 32 Bit ColdFire/clock rate	64 MHz	
RAM memory	8 MB RAM	
Program memory	4 MB Flash	
Slot for memory card	CompactFlash Type 1	
Interfaces	ETHERNET 10/100 Base T, RS-232 (COM), USB	
Accessories (optional)	Cutter, external unwinder, external rewinder, memory card Compact Flash Type 16-512 MB	
Operating voltage	100 V ... 240 V AC / 50 Hz ... 60 Hz, PFC	
Dimensions (mm) W x H x L	242 x 274 x 446	
Weight	10000 g	
Operating temperature	10 °C ... 35 °C	
rel. humidity	30 % ... 85 %	
Safety Approvals	CE, FCC class 1	
Accessories	1 x USB cable; 1 x serial cable; marking strips (1 x 2009-110); ink ribbon (1 x 258-149)	

Application table for ink ribbon/marketing accessories/prинтер

Item No.	Width	Ink Ribbon	Marking Accessories	Printer
258-143	60 mm	resin/wax	Labels (paper)	all types
258-144	100 mm	resin/wax	Labels (paper) Wire Marking 211-155 / 211-156	all types
258-145	38 mm	resin	Marking Strip Series 2009 2009-xxx Marking Strip Series 709 709-xxx WMB Inline [not printable with TP 343]	TP 298 & TP 343
258-149	50 mm	resin	Marking Strip Series 2009 2009-xxx Marking Strip Series 709 709-xxx WMB Inline [not printable with TP 343]	TP 298+
258-150	76 mm	resin	Cable Marking 211-111 and 211-121 Labels (polyester) up to 76 mm	all types
258-157	100 mm	resin	Labels (polyester) up to 100 mm	all types

Accessories

Ink ribbon for labels

Ink ribbon for marker strips

Description		Item No.
Ink ribbon for labels	resin/wax, width 60 mm x 300 m resin/wax, width 100 mm x 300 m	258-143 258-144
Ink ribbon for marker strips and WMB Inline	resin, 38 mm x 300 m resin, 50 mm x 300 m	258-145 258-149
Ink ribbon for cable marking	76 mm wide x 300 m 100 mm wide x 300 m	258-150 258-157

All ink ribbons are suitable for TP 298 and TP 343 printers. For detailed ordering information, please refer to the "Application table for ink ribbon/marketing accessories/printer"

External coil mounting system

Cutter TP 298

Spare roller TP 298

Description		Item No.
External coil mounting system	for WMB Inline 8,000 markers (2009-135)	258-169
Cutter TP 298		258-161
Spare roller TP 298 for labels	(up to item no. 40.000)	258-162
Spare roller TP 298 for labels	(up to item no. 40.000)	258-177
Spare roller TP 298 for WMB Inline	(up to item no. 40.000)	258-166
Spare roller TP 298 for WMB Inline	(up to item no. 40.000)	258-178
Carrying case for TP 298		258-171
Carrying case for TP 343		258-342
Retractable handle for carrying case TP 298 / TP 343		258-173

WMB Inline

Marking strips

Description		Item No.
WMB Inline, pitch 4 mm, stretchable, 4 mm ... 4.2 mm, on reel	white, 2000 pieces	2009-114
WMB Inline, pitch 5 mm, stretchable, 5 mm ... 5.2 mm, on reel	white, 1500 pieces	2009-115
WMB Inline, pitch 5 mm, stretchable, 5 mm ... 5.2 mm, on reel	white, 8000 pieces	2009-135
Marking strips for TOPJOB®S Series, white, plain, 11 mm wide	50 m coil	2009-110
Marking strips for 870, 869, 862, 270 Series white, plain, 7.5 mm wide	50 m coil	709-178
Marking strips for 870, 869, 862, 270 Series transparent, plain, 7.5 mm wide	50 m coil	709-177

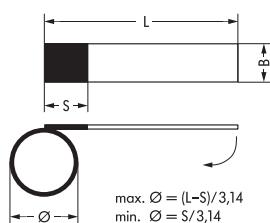

Marker card

Marker card (12 mm)
for Plotter

Labels on roll

Labels on DIN A4
sheets

Dimensions of self-laminating label

Description		Item No.
Marker card for TT Printer	12 mm 23 mm 12 mm (258-370 Carrier Plates are required for plotting)	211-121 211-111 211-120
Marker card for Plotter	23 mm (258-370 Carrier Plates are required for plotting)	211-110
Labels on roll for thermal transfer printer	Marker surface "S"=8 mm, "B"=18 mm, "L"=35 mm for max. cable \varnothing 9 mm, 9.000 labels per roll Marker surface "S"=13 mm, "B"=23 mm, "L"=51 mm for max. cable \varnothing 12 mm, 5.000 labels per roll	211-155 211-156
Labels on DIN A4 sheets for laser printer (258-383 Carrier Plates are required for plotting)	Marker surface "S"=9 mm, "B"=17 mm, "L"=35 mm for max. cable \varnothing 8 mm, 70 labels per roll Marker surface "S"=13 mm, "B"=21 mm, "L"=56 mm for max. cable \varnothing 14 mm, 32 labels per roll	211-150 211-151

Marking sleeve for cable tie	23 mm, for wires from 10 mm 2	211-129
Cable tie (2.5 x 100) mm		807-090/101-100
Label for I/O marking	Plotter, 12 x 7 mm (258-371 Carrier Plates are required for plotting)	211-211
Marking strips	15 mm, white 50 m roll	210-701
Receptacle for marking strips	transp. 1 m long	709-120
Continuous label	3 mm, white 12 lengths at 25 m	210-732
Label roll	70 x 100 mm, white 500 pieces/reel	210-703
Label roll	70 x 100 mm, silver 500 pieces/reel	210-704
Label roll	6 x 15 mm, white 3000 pieces/reel	210-705
Label roll	6 x 15 mm, yellow 3000 pieces/reel	210-705/000-002
Label roll	9 x 15 mm, white 3000 pieces/reel	210-706
Label roll	9 x 15 mm, yellow 3000 pieces/reel	210-706/000-002
Label roll	8 x 20 mm, white 3000 pieces/reel	210-707
Label roll	8 x 20 mm, yellow 3000 pieces/reel	210-707/000-002
Label roll	9.5 x 25 mm, white 3000 pieces/reel	210-708

Engraving Plotters with Engraver EG 450

Plotter IP 350 A3 / Plotter IP 350 A4

Description	Item No.	Pack. Unit
Plotter IP 350 A3	258-350	1
incl. ProServe Software		
Plotter IP 350 A4		
incl. ProServe Software	258-451	1
Technical Data		
Plot area	440 mm x 305 mm (258-350) 220 mm x 305 mm (258-451)	
Interfaces	parallel (centronics); USB 1.1	
Language	based on HP-GL 7475A	
Data buffer	16 MB	
Speed	max. 400 mm/sec.	
Drive system	two phase stepper motor	
Pen storage unit	max. 4 pens with best possible sealing	
Plotter pen	Special plotter pens with HP receptacle	
Addressable resolution	0.01 mm	
Repeatability (accuracy)	0.05 mm	
Repeatability when changing the pen	0.05 mm using pens of best quality	
Voltage supply	via separate desktop power supply unit equipped with exchangeable supply line	
Operating voltage	120 V ... 240 V AC / 50 Hz ... 60 Hz	
Voltage range	90 V ... 264 V AC	
Current consumption (internal)	0.3 A max. at 220 V AC	
Dimensions (mm) W x H x L	125 x 660 x 440	
Weight	11069 g	
Operating temperature	10 °C ... 35 °C	
rel. humidity	35 % ... 75 %	
Safety Approvals	acc. to UL-UL1950 CSA-950/VDE EN60950	
Immunity to interference	acc. to FCC Class B FCC Part 15 and VDE Class B EN 55022	

Description	Item No.	Pack. Unit
EG 450 Engraver	258-450	1
as an extension of IP 350 Flat Plotter. Consisting of "EC 450" Control Unit and "VC 450" Vacuum Cleaner, including graver 0.3 mm + 0.4 mm		
Technical Data		
1. Engraving spindle		
Speed	min. 5000 rpm, max. 50000 rpm	
Torque	6 Ncm	
Frequency	83 Hz ... 830 Hz	
Energy consumption max.	60 W	
Collets	Diameter of mandrel 3 mm	
Tensioning mechanism	Head tension	
Run-out with collet	0.03 mm	
Motor type	three-phase, asynchronous, brushless	
Enclosure	Aluminium	
Clamping diameter	25 mm	
Type of ball bearing	Steel, permanent lubrication	
Cooling system	integrated fan	
Field of application	exclusively engraving	
Operating time of bearing	min. 1000 hrs if handled properly	
Notice: Never clean engraving spindle using compressed air, do not use lubricants when engraving.		
2. Control unit VEB 500		
Operating voltage	100 V ... 240 V AC / 50 Hz ... 60 Hz	
3. Vacuum cleaner VC 500		
Vacuum cleaner bag	Typ Y98	
General Specifications		
Dimensions (mm) W x H x L	240 x 290 x 315 Control unit + Vacuum cleaner (an top of each other)	
Weight	Engraving spindle + Control unit + Vacuum cleaner + Accessories 8000 g	

Accessories

Full plotter package

Description	Item No.
Version 1 1 plotter incl. power supply and centronics cable; 1 ProServe Software; 4 WMB carrier plates 5 mm/0.197 in; 20 WMB marker cards 5 mm/0.197 in;	258-350/000-001
1 plotter pen, line width 0.25 mm disposable; 1 plotter pen, line width 0.35 mm disposable	
Version 2 1 plotter incl. power supply and centronics cable; 1 ProServe Software; 4 WSB carrier plates; 20 WSB marker cards;	258-350/000-002
1 plotter pen, line width 0.25 mm disposable; 1 plotter pen, line width 0.35 mm disposable	
Version 3 1 plotter incl. power supply and centronics cable; 1 ProServe Software; 2 WMB (5 mm/0.197 in) carrier plates; 10 WMB (5 mm/0.197 in) marker cards; 10 miniature WSB marker	258-350/000-003
cards; 1 plotter pen, line width 0.25 mm disposable; 1 plotter pen, line width 0.35 mm disposable	
Version 4 1 plotter incl. power supply and centronics cable; 1 ProServe Software; 1 WMB carrier plate 5 mm/0.197 in; 1 WSB carrier plate 5 mm/0.197 in; 1 miniature WSB carrier plate; 1 WSB carrier plate 4 mm/0.157 in;	258-350/000-004
5 WMB marker cards 5 mm/0.197 in; 5 WSB marker cards 5 mm/0.197 in; 5 miniature WSB marker cards; 5 WMB marker cards 4 mm/0.157 in; 1 plotter pen, line width 0.25 mm disposable; 1 plotter pen, line width 0.35 mm disposable	

Plotter is suitable for marking any type of WAGO marker card or competitor's markers. Includes the ProServe DVD-ROM and WAGO smartMARKING software.

**WAGO plotter pen
(disposable)**
0.18 mm line width

**WAGO plotter pen
(disposable)**
0.25 mm line width

**WAGO plotter pen
(disposable)**
0.35 mm line width

Service kit

Description

Item No.

WAGO plotter pen	line width 0.18 mm/0.007 in	258-226
	line width 0.25 mm/0.010 in	258-227
	line width 0.35 mm/0.014 in	258-228
WAGO ink cartridges	line width 0.50 mm/0.020 in	258-229
	black, for permanent marking, not refillable (5 x 1 ml)	258-141
WAGO plotter pen (disposable)	line width 0.18 mm/0.007 in	258-326
	line width 0.25 mm/0.010 in	258-327
	line width 0.35 mm/0.014 in	258-328
Cover		258-146
Service kit	(4 alternative pen storage units)	258-147
WAGO cleaning set	suitable for cleaning all EKS Pens	258-139
WAGO pen cleaner		258-140
Graver set	line width 0.2/0.3/0.4/0.5/0.7/1.0 mm	258-452
Graver	line width of graver 0.2 mm	258-452/000-002
	line width of graver 0.3 mm	258-452/000-003
	line width of graver 0.4 mm	258-452/000-004
	line width of graver 0.5 mm	258-452/000-005
	line width of graver 0.7 mm	258-452/000-007
	line width of graver 1.0 mm	258-452/000-010
Vacuum cleaner bag for Engraver EG 450		258-457

WAGO plotter pens are suitable for any kind of smooth surfaces. No additional adapter is required.

Marker card carrier plates for plotter IP 350

Description	Item No.
Carrier plates for marker cards	
WSB 5 mm/0.197 in (209-501)	258-361

WAGO Wire and Cable Marking

Wire marking

The following marker cards are available:
Marker cards for plotter marking ...

... or marker cards on roll
for thermal transfer printing

Slide the marker card into the marking sleeve
receptacle.
Changing the marking is also
possible after the wire has been connected

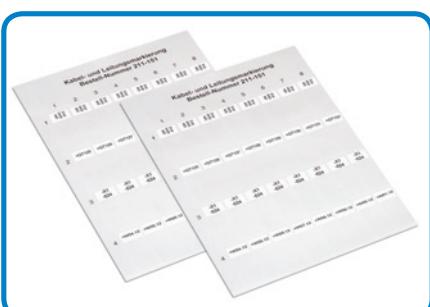

Remove the rest of the card by twisting it off

Fix the 211-129 marking sleeve using cable ties to
individual wire or cable

Cable marking

Self-laminating labels are available on A4 sheets
for the laser printer (plotter) ...

... or are supplied on roll for the thermal transfer
printer

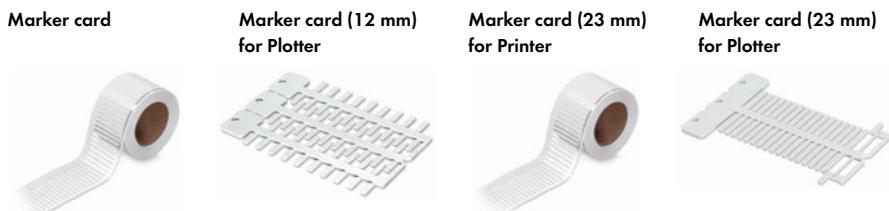

Remove the printed label from the sheet or roll and
wrap it around the wire or cable.
The transparent laminate protects the marking

Screwless End Stops and Rail End Cap for DIN 35 Rail

End stop for DIN 35 rail End stop width 6 mm / 0.236 in	End stop for DIN 35 rail End stop width 10 mm / 0.394 in	Rail end cap, for DIN 35 rail (7.5 mm/0.29 in high)
---	--	---

Item No.	Pack. Unit	Item No.	Pack. Unit	Item No.	Pack. Unit
End stop, for DIN 35 rail 6 mm/0.236 in wide	249-116 100 (4 x 25)	End stop, for DIN 35 rail 10 mm/0.394 in wide	249-117 50 (2 x 25)	Rail end cap, for DIN 35 rail (7.5 mm/0.29 in high)	209-109 50

Snap on - That's it!

Assembling the WAGO screwless end stops is as simple and quick as snapping a WAGO railmounted terminal block onto the rail.

Without any tools!

This way rail-mounted terminal blocks are safely secured at low cost against any movement on all carrier rails DIN 35 acc. to DIN EN 50022 (35 x 7.5 mm; 35 x 15 mm).

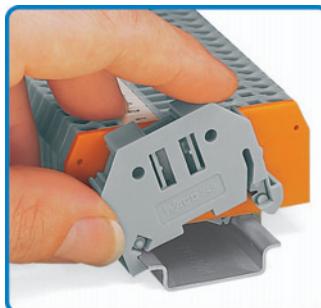

Entirely without screws!

The „secret“ of the excellent tight fit lies in the two small clamping plates which keep the end stop in position, even if the rails are mounted vertically.

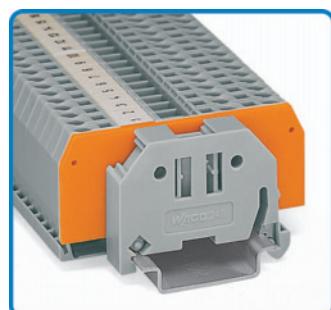

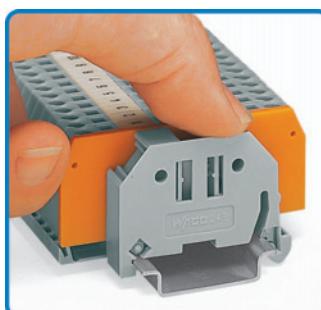

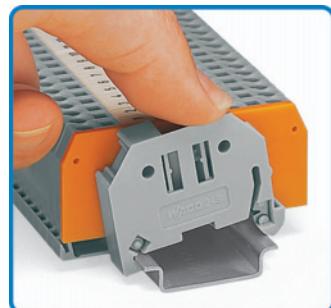

Simply snap on - and forget!

In addition, costs are considerably reduced when using large numbers of end stops.

A further advantage is that three marker receptacles for all WAGO marker systems for rail-mount terminal blocks and a snap-in hole for WAGO adjustable height group marker carriers offer individual marking possibilities.

Snap on ...

... that's it!!

Microstrip wire stripper 0.14 mm ² ... 1.5 mm ² /AWG 24 ... 16 "solid" and "stranded" Wire cutter up to 1.5 mm ² /AWG 16 "solid" and "stranded"	Quickstrip 10 wire stripper 0.02 mm ² ... 10 mm ² /AWG 28 ... 8 "stranded" (6 mm ² /AWG 10 "solid") Wire cutter up to 10 mm ² /AWG 8 "stranded" (1.5 mm ² /AWG 16 "solid")	Quickstrip 16 wire stripper 4 mm ² ... 16 mm ² Wire cutter up to 10 mm ² /AWG 12 ... 6 "stranded" (1.5 mm ² /AWG 16 "solid")

- Automatic adjustment to wire size.
- No damage to wire strands.
- Gripping pressure of jaws adjusts automatically to wire insulation diameter.
- Full cycle strip - jaws open after stripping, ensures no nicked strands.
- Exact strip length may be set by sliding of red setting stop.
- Replaceable stripping jaw assembly.
- Self-sharpening, fully protected wire cutter, also replaceable.*
- Glass fiber reinforced polyamide tool body.

		206-802	1		

Cutting of cable

Voltage testing at the
WAGO-I/O-SYSTEM 750

A device that will reliably detect AC voltages in
cables, sockets, fuses, switches, connector boxes,
etc.

- LED band provides clear voltage range readings
(white scale = AC voltage
red scale = DC voltage)
- LED indication of polarity
- double-pole voltage testing
- IP65 type of protection
- switching is not necessary
- 85 cm long highly flexible and nonskid test cable

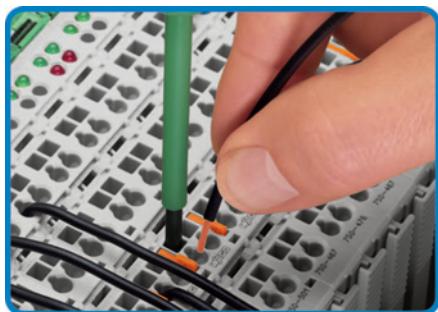

The following can be detected by the WAGO Testboy:

- Live conductors
- Line breaks
- Blown fuses (in cartridges or holders)
- Defective switches
- Defective lamps in strings of lights

CE Marking and EC Directives

CE conformity marking:

The CE conformity marking consists of the characters "CE", with the following script:

Communauté Européenne (European Community)

The CE marking shall be affixed to the electrical equipment, or if that is not possible, to the smallest packing unit. With the CE marking, manufacturers attest conformity of their products to the relevant directives.

In addition to the CE marking, the manufacturer provides an EC "Declaration of Conformity" for the product. This EC "Declaration of Conformity" must be retained and submitted to a national surveillance authority upon request. EC directives are binding legal regulations of the European Community. Their goal is the harmonization of legal and administrative regulations in the various EC member states, in order to prevent trade obstructions due to different national regulations.

In order to "market" a product, it must comply with the relevant directives. The product may be subject to several directives, e.g. the EMC and the low voltage directives.

The **EC directives** are legally binding specifications of the European Union. Their aim is the alignment of legal and administrative specifications in the various EC member states, in order to prevent trading hindrances arising from different national specifications.

In order to launch a product on the market it has to comply with the relevant directives. Several directives may apply to a product, for example the EMC and the low voltage directives.

2006/95/EC

- Low Voltage Directive

The safety of electrical equipment is guaranteed by the Low Voltage Directive. This directive covers 'complete' electrical equipment designed for use with a voltage rating of between 50 and 1000V for alternating current and between 75 and 1500V for direct current. Products falling within the scope of the Low Voltage Directive that are designed in such a way that they can be used in other electrical devices and whose safety, for the most part, is dependant on how these components were built into the end product and what features the end product has are defined as basic components in accordance with the Low Voltage Directive.* The Low Voltage Directive doesn't apply to basic components.

2004/108/EC

- EMC Directive

The EMC Directive implies that a product must meet the limits of the radiated electromagnetic disturbance and also requires that a product must be immune to electromagnetic interference. Electromagnetic passive components or components with no direct function, like resistors, diodes, capacitors, switching relays or cables (in the form of passive printed circuit boards) are not considered as apparatus within the meaning of the EMC Directive.

Machinery Directive

The Machinery Directive does not apply to WAGO products.

94/9/EC Ex Protection Directive,

ATEX 100a

General technical information for electrical equipment in hazardous environments.

General Technical Information for Electrical Equipment in Hazardous Environments

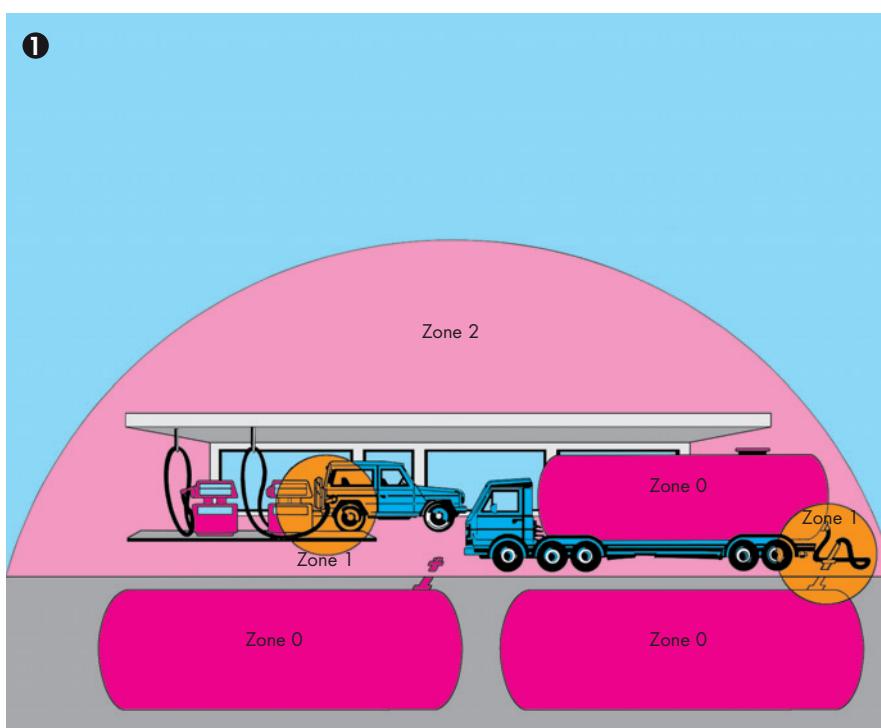

Hazardous Environments

Hazardous environments are areas in which the atmosphere may become explosive. Explosive atmosphere is defined as a mixture of ignitable substances in the form of gases,

vapors or mixtures with air under atmospheric conditions in critically mixed ratios such that excessive high temperature, arcs or sparks may cause an explosion.

DIN EN 1127-1 and all other related standards that are commonly known divide up hazardous areas according to the likelihood of the occurrence of an explosive atmosphere into the following zones:

1

① Hazardous environments as a result of combustible gases, vapors or mist.

Zone 0:

Area in which an explosive gas/air mixture is continuously present or present for long periods.

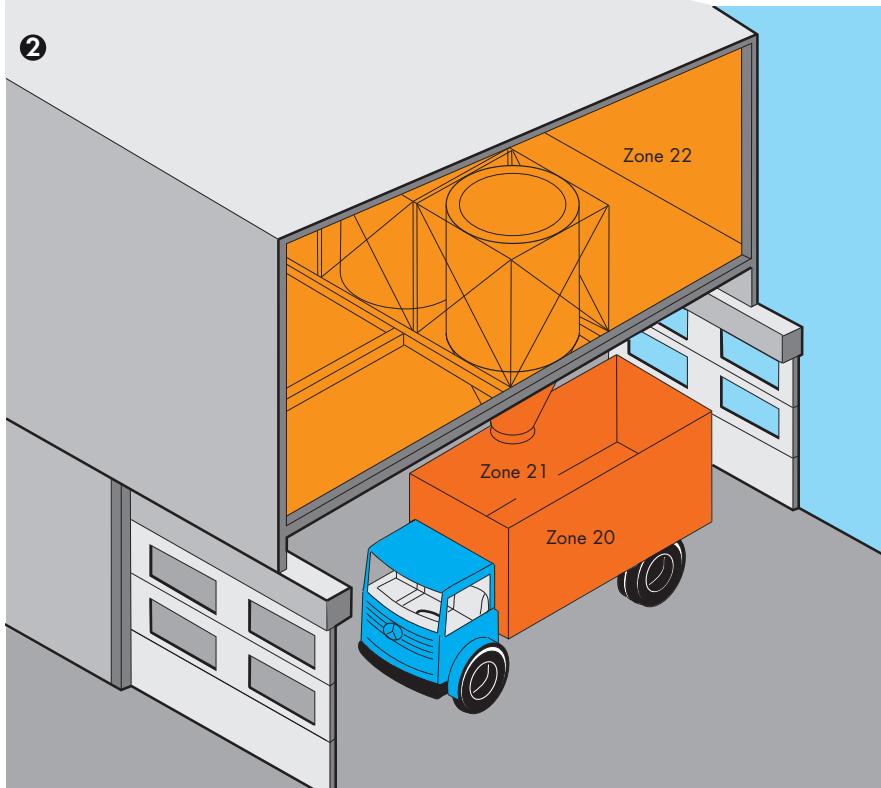

Zone 1:

Area in which an explosive atmosphere can occur during normal operation.

Zone 2:

Area in which an explosive atmosphere is unlikely to occur under normal operation and if it does it will be for a short period.

2

② Hazardous areas caused by combustible dust

Zone 20:

Area in which an explosive dusty atmosphere is present "permanently", for "long periods" or "frequently" and in which deposits of combustible dust of unknown or excessive thickness may be formed. Dust deposits alone are not grounds for classification as Zone 20.

Zone 21:

Area in which an explosive dusty atmosphere is present "occasionally" under normal operating conditions and in which deposits or layers of combustible dust can generally be present.

Zone 22:

Area in which an explosive dusty atmosphere is not likely to occur during normal operation and, if it occurs, will only exist for a "short period", or in which accumulations or layers of combustible dust are present.

Please refer to the manuals for more information on explosion protection.

Electromagnetic Compatibility and Mechanical Strength (Industrial and Residential Areas)

Immunity to interference for industrial areas acc. to EN 61000-6-2 (2005)

Test Specification		Test Values	Evaluation Criteria *)

Specifications and Test Results (continued)

Environmental Testing

IEC 60068-2-6:2007
 EN 60068-2-6:2008
 VDE 0468-2-6:2008-10
 Environmental testing - Part 2-6: Tests -
 Test Fc: Vibration (sinusoidal)
 IEC 60068-2-27:1987
 EN 60068-2-27:1993
 Basic environmental testing procedures -
 Part 2: Tests; test Ea and guidance: Shock
 IEC 60068-2-42:2003
 EN 60068-2-42:2003
 Environmental testing - Part 2-42: Tests -
 Test Kc: Sulphur dioxide test for contacts
 and connections
 IEC 60068-2-43:2003
 EN 60068-2-43:2003
 Environmental testing - Part 2-43: Tests -
 Test Kd: Hydrogen sulphide test for contacts
 and connections

EMC Requirements

IEC 61000-6-1:2005
 EN 61000-6-1:2007
 VDE 0839-6-1:2007-10
 Electromagnetic compatibility (EMC) -
 Part 6-1: Generic standards - Immunity for
 residential, commercial and light-industrial
 environments
 IEC 61000-6-2:2005
 EN 61000-6-2:2005
 VDE 0839-6-2:2006-03
 Electromagnetic compatibility (EMC) -
 Part 6-2: Generic standards - Immunity for
 industrial environments
 IEC 61000-6-3:2006
 EN 61000-6-3:2007
 VDE 0839-6-3:2007-09
 Electromagnetic compatibility (EMC) -
 Part 6-3: Generic standards - Emission
 standard for residential, commercial and
 light-industrial environments
 IEC 61000-6-4:2006
 EN 61000-6-4:2007
 VDE 0839-6-4:2007-09
 Electromagnetic compatibility (EMC) -
 Part 6-4: Generic standards - Emission
 standard for industrial environments
 IEC 61000-3-2:2005
 EN 61000-3-2:2006
 VDE 0838-2:2006-10
 Electromagnetic compatibility (EMC) -
 Part 3-2: Limits - Limits for harmonic current
 emissions (equipment input current \leq 16 A
 per phase)
 IEC/CISPR 11:2003 + A1:2004,
 modified + A2:2006
 EN 55011:2007 + A2:2007
 VDE 0875-11:2007-11
 Industrial scientific and medical (ISM) radio-
 frequency equipment -
 Electromagnetic disturbance characteristics -
 Limits and methods of measurement
 IEC/CISPR 22:2005, modified + A1:2005
 EN 55022:2006 + A1:2007
 VDE 0878-22:2008-05
 Information technology equipment - Radio
 disturbance characteristics - Limits and
 methods of measurement

PLC

IEC 61131-1:2003

WAGO online

**Keep up-to-date.
Visit us online!**

You want to get informed on our products quickly and conveniently?

You want more information on our company? No problem!

At www.wago.com you will find a wealth of information on WAGO:

- Information on our company
- The latest product news
- The newest manuals, data sheets, brochures and flyers in different formats
- Dates for the next seminars, information events, roadshows, trade fairs and much more...

The screenshot shows the WAGO website's main page. At the top, there's a navigation bar with links for Home, Unternehmen, Produkte, Anwendungen, Service, Aktuelles, Karriere, and Kontakt. A green banner at the top right says "Land Please select" with a small map icon. Below the banner, there's a section for the "Steppercontroller Systemfamilie für das WAGO I/O-SYSTEM 750". To the left, there's a sidebar with "Online Katalog" and "NEU WAGO Produktkatalog als ebook". The main content area has several product cards: "Steppercontroller Bewegung auf engstem Raum", "WAGO I/O-IPC", "Linux-Controller von WAGO", "TO-PASS®", and "KNX IP-Controller von WAGO". On the right side, there's a "Quicklinks" sidebar with links to Online Katalog, Dokumentation, Downloads, Informationsmaterial, Presse und Kundenztschriften, Seminare und Training, Motek, and WAGO weltweit.

www.wago.com

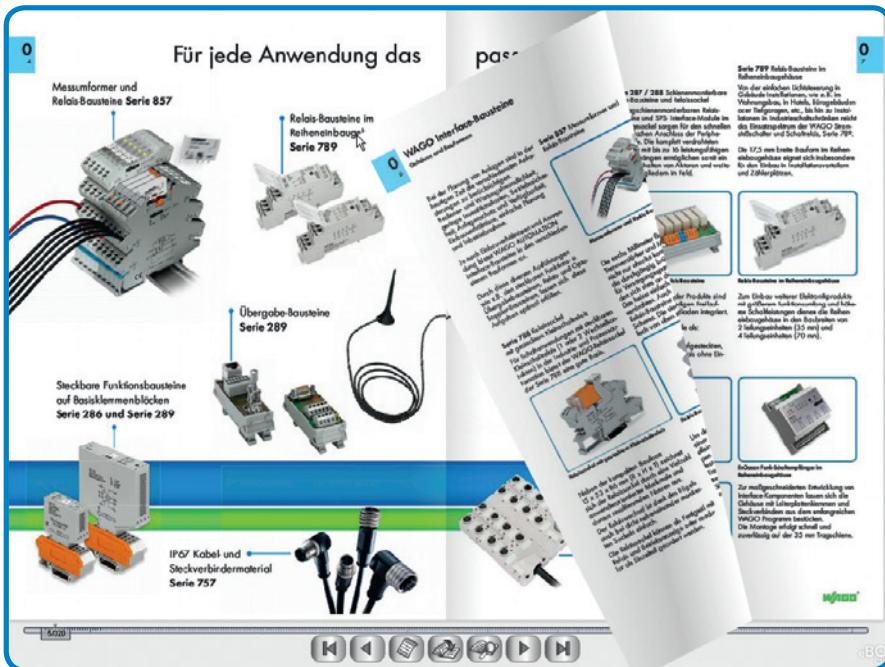

The screenshot shows the "Anwendungen" section of the WAGO website. It includes a sidebar with "Kataloge" and "Broschüren" sections. The main content area lists various application areas like "Interface Bausteine 2008/09", "Neuheiten Frühjahr 09, Automation", and "KNX IP für Gebäudeautomation". Each item has a thumbnail, a brief description, and download links for "PDF" and "eBook...".

We are continuously working on improving the service section of our website. In addition to product documentation and information resources (in both PDF and ebook format), software downloads are also available from this section.

If you have any questions on a particular topic, please use our call-back service and we will call you back whenever it is convenient for you.

Keep up-to-date. Visit us online!

eBooks

In the service section of our website, you will find the latest product catalogs and brochures as interactive eBooks. A search and zoom function allows you to quickly find exactly what you are looking for. The dynamic content makes "leafing" through the pages much easier; and if you prefer a hardcopy, simply print out the pages you want to read.

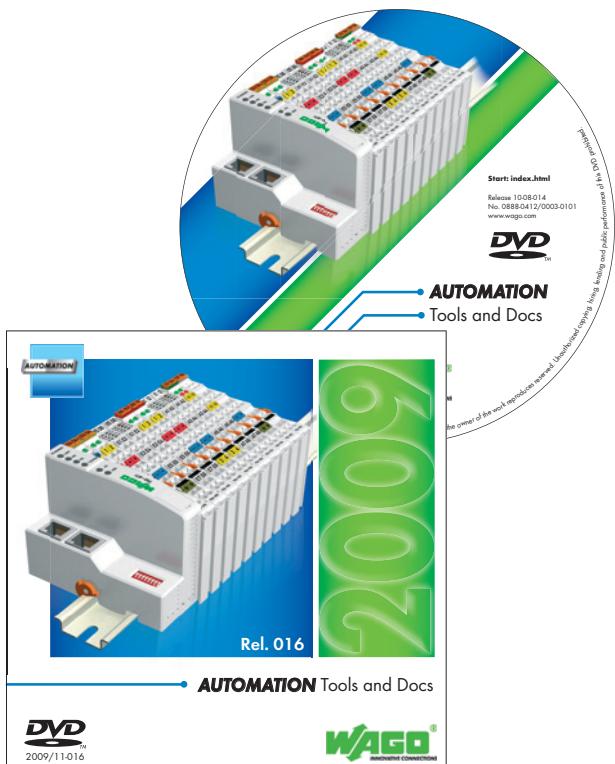

DVD AUTOMATION Tools and Docs

In addition to the latest technical documentation, this DVD-ROM also contains our AUTOMATION product catalogs and brochures as interactive eBooks.

The technical documentation includes short descriptions, application notes, data sheets and manuals for all our AUTOMATION products.

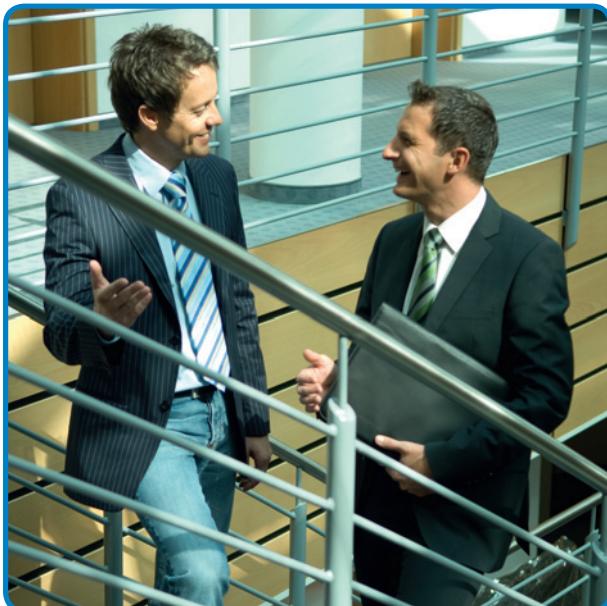

Specific information resources on our electronic components can be viewed in PDF format. If you are reluctant to leaf through massive catalogs, you can also browse all AUTOMATION catalogs and brochures as eBooks, of course, with search or keyword function.

In addition, all WAGO-I/O-SYSTEM software products (which can also be found on our website) can be directly installed from the DVD-ROM.

WAGO Seminars

Knowledge directly from the source

WAGO develops and produces products while keeping in mind innovative ideas and advanced technology.

The most efficient use of our products is achieved through optimal application knowledge. For this reason, WAGO conveys this knowledge in effective and user-oriented seminars. These seminars can save you time and will help you use our products to their fullest capacities.

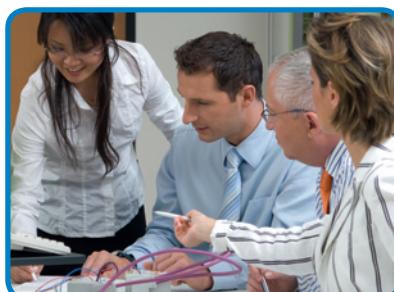

Your Goals are Used as the Gauge of Our Success.

Product-related and customer-specific training courses

Small groups

No question goes unanswered and no-one is overlooked in WAGO training courses made up of small groups.

Team work

Learning is effective in small groups. Ideas can be discussed, exchanged, and experiences can be shared - all for the benefit of the attendees.

Practical

Experience tells us: Practice makes perfect! Hands-on applications are highly emphasized in WAGO seminars.

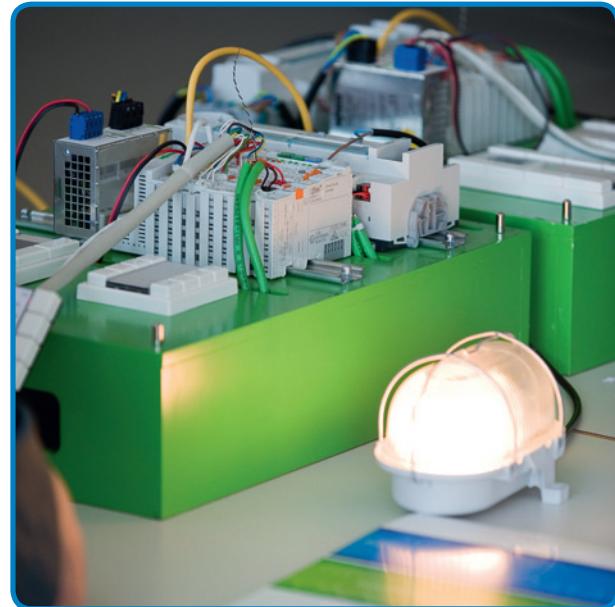

WAGO Seminars - this means:
information from the source. It doesn't get more direct.

Your instructor is trained 100% on each subject. They have learned from their own experience. Your time will not be wasted. Each minute at a WAGO seminar is an investment in your knowledge.

Request your registration form by e-mail:
training@wago.com

Contact us so that our seminars can be adapted to your requirements.

++49 (0) 571 /887-327

Product-related courses

We offer product-related training courses on the following topics at regular intervals:

- Building and industrial automation
- Programming of automation components
- Fieldbus systems

For current course dates go to:
www.wago.com/seminare

Customer-specific training courses

In addition to these "open" training courses, we also offer customer-specific courses as company courses to address your company's particular needs.

On request, we can also conduct these courses at your company.

Special company courses

	Catalog Catalog (Page)	Catalog Catalog (Page)	Catalog Catalog (Page)
A		C	D
Actuator and actuator LED terminal blocks rail-mounted terminal blocks	1	Cables, pre-assembled WINSTA® RD	DALI/DSI master module
Actuator cables	3	WINSTA® KNX	3
Additional modules for matrix patchboards	1	CAGE CLAMP® connection	Data exchange coupler
Addressing tool	3	CAGE CLAMP®S connection	3
Analog input modules	3	CAL® fieldbus components	Data exchange module
Analog input modules	3	CANopen® fieldbus components	DC drive controller
Analog output modules	3	Carrier rails	DC/DC converter
Analog output modules	3	CC-Link fieldbus connector	- Rail-mounted terminal block
Analog signal conditioning modules		CC-Link fieldbus coupler	- DIN-rail-mountable
- pluggable	4 (230 - 232)	CE marking	4 (264 - 265)
Analog signal conditioning modules	4 (230 - 232)	Changeover rocker switch	4 (266)
AND gate modules		Coding keys	Decade marker carrier
- pluggable	4 (134)	Coding pin, WINSTA®	1
Angled female connectors		Coding, WINSTA®	Decentralized building automation
see "MULTI CONNECTION SYSTEM", 100% protected against mismatching, classic/standard version	2	Collective carrier for jumper	Derating curves
Angled support brackets	1, 3	Combi PCB terminal blocks	see current-carrying capacity curves
Antenna (SMA plug)	4 (290)	Combi strips	MULTI CONNECTION SYSTEM
Approvals	4 (340 - 343), 1, 2, 3	Comb-style jumper bars	2
Approvals for WAGO-I/O-SYSTEM	3	Commissioning software	Device connectors
AS-Interface master module	3	Common potential matrix patchboards	- WINSTA® MINI
AS-Interface switch mode power supply	4 (245), 3	Commoning strips for PCB terminal blocks	- WINSTA® MIDI
		Compact block terminal blocks	DeviceNet® fieldbus components
		Compact connector for flexible conductors	3 (Section 1, 6, 7)
		Compact terminal blocks	Differential inputs and differential measurement
		Compact terminal blocks see "Miniature (rail-mounted) terminal blocks"	inputs
		Companies and representations WAGO worldwide	see "Analog input modules"
		4 (362 - 363), 1, 2, 3, 5	3
Back-up capacitor module	4 (254), 3	Computer marking	Digital impulse interface
BACnet configurator	3	Condition monitoring	Digital input modules
BACnet controller	3	Configuration cable	Digital input modules
Banana plugs	1	Configuration files	Digital output modules
Base terminal blocks, f.-e.		Connecting cable	Digital output modules
- double-deck, triple-deck terminal blocks	1	Connecting system, 10- or 20-pole	DIN-rail mount enclosures
X-COM®-SYSTEM	1	Connection cable	Diode gate modules
X-COM®S-SYSTEM	1	Connection modules	- DIN-rail-mountable
Binary spacer module	3	sensors	4 (186 - 187)
Bipolar isolation amplifier	4 (198)	actuators	4 (133)
Bistable relays		Connection of aluminum wires	Diode modules, for carrier or through terminal
- DIN-rail-mountable	4 (95)	Connectors	blocks, pluggable
- pluggable	4 (109)	- wire-tap branch; 3- and 6-pole (elevator shaft technology)	1
Block I/O SYSTEM	3	- for EIB applications	Diode terminal blocks, f.-e.
Bluetooth I/O module	3	- 10- or 20-pole connectors for racks	TOPJOB®S
Bridge rectifiers	4 (130 - 131)	- for PCBs	Diode terminal blocks, f.-e. – double-deck terminal
Building automation	3	- High-current	blocks
Bus coupler units for EIB applications	2	- MULTI CONNECTION SYSTEM	TOPJOB®S
Busbar terminal blocks	1	TOPJOB®S	Diode terminal blocks, f.-e. – triple-deck terminal
Busbar terminal blocks	1	- WINSTA®	blocks
		- X-COM®-SYSTEM	TOPJOB®S
		Connectors for junction boxes	Direct printing
		Connectors, 10- or 20-pole, e.g. for racks	- MICRO
		Constant voltage sources	- MINI
		- DIN-rail-mountable	- MIDI
Cable assemblies		Contact paste "Alu Plus"	- MAXI
- WINSTA® MINI	5	Control panel	Disconnect terminal blocks, f.-e., angled type
- WINSTA® MIDI	5	Cover for rail-mounted terminal blocks	with disconnect link, pivotable fuse holder
- WINSTA® RD	5	Crimping tools for ferrules	horizontal type
- WINSTA® KNX	5	CT/VT terminal blocks	Double-deck terminal blocks
Cable assemblies	5	see "Disconnect/Test terminal blocks"	with disconnecting tab
Cable assembly	3	Current flow monitoring modules	Disconnect/Test terminal blocks, f.-e.
Cable marking	4 (324 - 325), 3	- pluggable	angled type
Cable stripper	4 (331), 3, 5	Current flow monitoring modules – pluggable	(for use with voltage transformer circuits or current transformer circuits) horizontal type
Cables and connectors	3	Current-carrying capacity curves	with knife disconnect
Cables and connectors for fieldbus systems		- PCB terminal blocks	TOPJOB®S
	3	- X-COM®-SYSTEM	with pivotable disconnect link
Cables, pre-assembled		- MULTI CONNECTION SYSTEM	Disconnect/Test terminal blocks, s.-e.
