

PDU-12WS-V-SP-1U

SurgePro protected 12-Way Vertical PDU

The Power to Protect.

Are you looking to protect your valuable Networking, IT or Telco infrastructure from damaging voltage surges? Need a low cost but effective solution for wide scale deployment that prohibits the usage of full scale UPS systems?

The new LMS Data **SurgePro** range of Voltage Surge protected Power Distribution Units (PDU) allow just that sort of protection for your equipment. Featuring the latest in Metal Oxide Varistor (MOV) technology, the **SurgePro** will block any input voltage surges up to around 4 times the nominal input voltage, meaning your IT Networking Switches, Servers, NAS devices and PBX devices will run for longer and thus reduce system downtime.

Coupled with a high-visibility, robust Neon Rocker Switch for precise control, together with spaced UK-type electrical sockets means this new range of Surge protected PDUs are ideal for both Data and Telco applications and means an increase in MTBF of your attached equipment, 24/7.

Featuring...

Voltage Surge Protected Power Distribution

MOV (metal oxide varistor) Surge technology

TSD (transient suppression diode) Spike prevention

Surge system LED confirmation

Standard mounting brackets included

Standard UK type sockets; rated 13A; 12 Way

Protected Neon On/Off Switch

Generous 1.8 approx. metre high-load UK cable
