# FED UP OF RUNNING OUT OF SOCKETS?

You need the revolutionary  
solution for USB Charging!

Upgrade using our USB charging plate in a few simple steps  
Instantly create 2 USB ports freeing up your UK mains sockets for use with other appliances.  
**...AN EASY SWAP & YOU'RE SET-UP FOR FAST USB CHARGING!**

**Compatible with all major devices including Samsung & Apple!**

Designed for items such as Smartphone's, Music Players, Cameras, Tablets  
and other devices that require charging via a USB port.

**IF NO DEVICE IS CONNECTED, THE TRANSFORMER SHUTS DOWN  
AND POWER IS NOT SUPPLIED TO THE USB PORTS**

Once a device is plugged in this activates the amplifier & power is supplied to the required USB ports

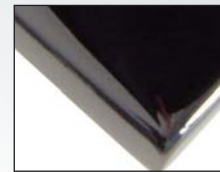

**SURGE & SPIKE PROTECTION!**

Protects your valuable equipment from damaging power surges & spikes

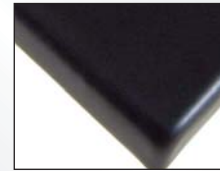

**White Bakelite**

CODE • 27-2000/SB

**Brushed Stainless**  
CODE • 27-2000/BS

**Satin Chrome**  
CODE • 27-2000/SC

## It's not any old faceplate!.....

**The 2 Amp Intelligent Split Power Supply gives a far superior  
charging rate over many Standard USB Charging Plates.**

Rather than limiting the individual ports to half the overall allowance per port  
resulting in much slower charging times, the Group Gear USB Charging Plate  
has the potential to power up to 2 Amp from one single port.

### Features

- The 2 Amp combined USB ports are powerful enough to quickly charge a single smartphone, it will swiftly charge two smartphones or similar devices together or charge a Tablet PC with ease.
- Fits any standard double backbox (minimum depth of 25mm) - Simple retro fit socket!
- The USB charging sockets are limited at 2 Amp, if the current exceeds this it will automatically trip off to protect your devices
- Conforms to European Stand-by Mode
