

Accessories provide increased functionality

Well-chosen accessories optimize workstation functionality and increase usability. When a workstation is well-organized and well-equipped,

workflow becomes easier and more efficient, improving ergonomics and making it easier to keep tools in place.

Modular means adaptable

Our world keeps changing at an ever-increasing pace. Until recently, products could be manufactured the same way for decades, but now we must prepare to make changes to our work practices at a much faster rate. In order to revise the production process to meet new requirements, an extremely flexible and adaptable workstation system is essential. Our system is designed with this in mind. The same basic units, configured with accessories that meet your needs, offer a wide range of applications.

The module size is used to identify the right accessories

In line with the modular approach of Sovella furnishings, a large number of products are organized in multiple module sizes: M20, M30, M36, M48, M53, M60, and M72. The module size refers to the nominal distance in inches between two slotted uprights from the middle of the upright. Most of our accessories are organized by their module size.

Customized for your application and your operator

The purpose of a workstation determines its basic requirements and accessories. The needs and requirements may change considerably from one employee to another, but we understand that no two people are alike. When a workstation is equipped for and adjusted to an individual's needs, each phase of the production process can be completed on time with accuracy and with maximum comfort.

Casters

Casters may be installed to provide mobility for reconfiguration, cleaning, or repositioning. Concept™, Cornerstone-WS™ and TL

Advantage™ workstations can be equipped with casters using M12 attachment hardware. Casters not compatible with Workshop™ workstations.
