

## Work anywhere easier.

With a PC running Windows 7 Professional, you can work anywhere more easily and securely. It simplifies getting set-up and connected, so you can be productive anywhere faster. Encryption and advanced backup make it easier to keep your hard work secure and protected from loss. It's even easier to run older programs designed for Windows XP. When work's done, it gives you plenty of ways to relax. Whether you want to respond to a new opportunity, or simply run an old program, you'll be ready with Windows 7 Professional.

### Works the way you want

**Application/Device Compatibility:** Windows® 7 is built with compatibility in mind. The majority of software or devices working on Windows Vista® also work on Windows 7.

**Windows XP Mode\*:** With Windows XP Mode, you can run many Windows XP productivity applications right from the Windows 7 desktop.

**Networking (HomeGroup and Domain Join\*\*):** **With a server** – Easily and more securely add PCs to the network. **Without a server** – Easily share files and use a printer for multiple PCs running Windows 7 with HomeGroup.

**Action Center and Diagnostics:** Powerful diagnostics and troubleshooting tools makes it easier and inexpensive to resolve many IT issues.

### Get more done

**Remote Desktop Host\*\*:** You can access documents and programs on a computer remotely from another computer.

**Windows Desktop Search:** Just type a few letters in the search box to find files, applications, or even a menu in Control Panel in just seconds.

**Location-Aware Printing\*\*:** Windows 7 Professional detects whether you are at work or at home and automatically sends your documents to the right printer.

**Windows Desktop Search:** Type a few letters in the search box to find files, applications, or even a menu in Control Panel in seconds.

### Safeguard your work

**Windows Defender:** Helps protect you from spyware and other forms of malicious software.

**Encrypting File System\*\*:** Provides user-level file and folder encryption, ensuring strong data protection and control.

**Previous Versions:** Windows 7 helps you restore previous versions of files that you have accidentally deleted or changed.

**Advanced Backup and Restore\*\*:** You can backup your data to a network location and encrypt files on your PC.
