iPhone/iPad(tm)

LG(tm)  
Series

Samsung(tm)  
Galaxy(tm) Series

Google(tm)  
Nexus(tm) Series

## HD Crystal Clarity with Nanotechnology for Optimal Viewing

Fed-up with your poor quality mobile screen protection? Noticed reduced viewing quality or a mass of fingerprints on your current protector?

The new LMS Data **Tempered Screen Protector** offers instant benefits to traditional screen protectors. Featuring the latest in nanotechnology manufacturing, enables the tempered screen protector to not only allow almost all transmission of light from the mobile devices screen, but our unique molecular bonding means integral finger-pint rejection across the surface, meaning you'll get the best possible clarity, in almost any conditions.

And hit and miss touch-sensitivity on other screen protector offerings is now a thing of the past. Assured touch-sensitivity across the whole mobile device is assured with ultra-fast response, just like it should be.

Easy to apply, with laser quality aperture cutouts for specific models including Apple(tm) iPhone(tm), iPad(tm), Samsung(tm) Galaxy(tm), LG(tm) and Google(tm) Nexus(tm) devices.

## specifications:

- Tempered, Nanotechnology High-Impact Polymer
- Fingerprint rejection with HD crystal viewing
- Excellent display projection, even at critical angles
- Scratch resistant with ballistic protection from drops
- Touch-sensitivity assured across the protectors' surface
- Tailored fit for specific models - Quick and easy to apply
- Made for Apple(tm) iPhone4S, 5, 5S, 6, 6 Plus
- Made for Apple(tm) iPad3, iPad5, iPad Mini
