

# BitScope CLP-03

Test wires & probe pins (Socket terminated)

## Product Information

CLP-03 is a set of 10 terminated test wires with detachable probe pins for use with [LP103X](#), [LP103W](#) or [Pocket Analyzer](#).

They plug into standard prototype bread-boards and onto test points or they can be used to connect from BitScopePOD pins to standard header pins.

When used with a LP103X or LP103W or Pocket Analyzer or they are suitable

### Product Summary

Order Code **CLP-03**

Description 10 x 8" colored leads with termination for use with a logic POD or BitScope.

Comment Socket terminated.

Mini-Probe test wire

CMOS and TTL logic and  $\pm 12V$  analog signals up to 100MHz.

If you need surface-mount or fine-pitch component connectivity we recommend [CLP-02](#). They may also be used to connect directly to the POD connector on other BitScope models.
