

KVM Tower Switch

With 4 port

pro-SIGNAL

Description

The product is a KVM switch that allows access four IBM compatible computers from one PS/2 Keyboard, one PS/2 Mouse and one VGA, SVGA or Multi-sync monitor.

Switching between connecting computers is as easy as pressing the push button (which is conveniently placed on the top of the switch) or entering hot-key commands from your keyboard. There is no interface card or software to install and the Tower KVM is completely independent from any operating system.

Specification

- 4 unique loose-free 1.8 mtrs cables included
- Supports both PS/2 keyboard and mouse(cable length 35cm)
- Keyboard and mouse emulation for error-free PC boot up.
- Keyboard and mouse are hot pluggable at any time without turning either the Tower Switch or PC's off
- Unique Space Saving design
- Auto-scan automatically selects computers sequentially
- Supports Microsoft IntelliMouse (Pro), Explorer, Optical
- Hot-key and push button allow easy computer access
- Keyboard states automatically saved and restored when switching computers
- Operating system independent, transparent to all applications
- High VGA resolution 1920 x 1440
- Supports DDC2B
- Power-free operation - the Tower KVM draws power
