Performance Multi-Format Memory Card Access Solutions

Looking for a comprehensive, all in one multi-format card reader/ writer for your day to day use?

The **USB-CR-6P** is possibly one of the most popular, award wining multi-format card read/writers on the market today. Not only does it support the read/writing of today's (and yesterdays') most popular memory card formats such as SD,SDHC,SDXC,CompactFlash and xD* but it has the ability to support leading memory card technologies of tomorrow.

Featuring a stylish, compact and robust design, the USB-CR-6P has multiple card access slots which even allows multiple cards to be inserted at the same time and data transfer operations between the cards to be undertaken, its that simple.

Fully Plug n' Play with almost all operating systems and project computers, including Windows(tm), Mac OS X(tm), Linux(tm), Raspberry PI(tm) and even tablet computers (with the necessary adapter), the USB-CR-6P is your ideal partner for digital photography and a whole lot more.

specifications:

HighSpeed USB2.0 - up to 480Mbps data transfers

Super-compact design - Fits in your pocket or camera bag

Totally driverless - Works on all Operating Systems

Self-powered design with status activity LED

Ability to transfer data from two or more cards at once

Ideal for photography, smartphone and in-car cameras

Supports almost all memory card formats including:

SD, SDHC, SDXC, MiniSD, CompactFlash, Memory Stick

MicroSD-HC, MMC, xD..and many more*

CE FC RoHS COMPLIANT

* Please check with your memory card hardware vendor. Trademarks acknowledged
