Notes

Snap on That's it! Assembling the WAGO screwless end stops is as simple and quick as snapping a WAGO railmounted terminal block onto the rail. Without any tools! This way railmounted terminal blocks are safely secured at low cost against any movement on all carrier rails DIN 35 acc. to DIN EN 50022 (35 x 7.5 mm; 35 x 15 mm). Entirely without screws! The „secret“ of the excellent tight fit lies in the two small clamping plates which keep the end stop in position, even if the rails are mounted vertically. Simply snap on and forget! In addition, costs are considerably reduced when using large numbers of end stops. A further advantage is that three marker receptacles for all WAGO marker systems for railmount terminal blocks and a snapin hole for WAGO adjustable height group marker carriers offer individual marking possibilities.
