PROLINE G2 PAGODA TOPS

APPLICATION

Pagoda Tops can be used on the top of a modular enclosure for active cooling. The design features a drip-proof raised pagoda vent with a 115-volt integral axial exhaust fan, and includes gasket seals to maintain a NEMA 12 enclosure rating.

FEATURES

- Drip-protected, raised pagoda vent
- Integral axial exhaust fan for active cooling

SPECIFICATIONS

- 14-gauge (1.75 mm) steel
- Pagoda Tops 1200 mm and greater in width have one drip-protected, raised pagoda vent opening positioned over one side that can be oriented for right or left ventilation
- Maintains NEMA 12 Type rating on enclosure when installed; seamless polyeurethane gasket between top and frame (UL component recognized) provides a water-tight, dust-tight seal against moisture and contaminants
- Includes four M12 hex bolts for installation
- Lifting eyes (not included) can be used instead of bolts

FINISH

- Polyester powder paint; RAL 7035 textured light gray standard
- Custom colors available

ACCESSORIES

- Lifting eyes
- Pagoda exhaust vent

PROLINE G2 PAGODA EXHAUST VENTS

APPLICATION

PROLINE G2 Pagoda Exhaust Vents can be field-installed on any PROLINE G2 solid top to provide active enclosure cooling.

FEATURES

- Axial fan and finger guard mounted in housing
- Drip-protected raised cover is removable from the inside of the enclosure

SPECIFICATIONS

- 14-gauge (1.75 mm) steel
- 115V or 230V versions with lead wires
- 115V power cord option
- Rated UL Type 1; installing this component on an enclosure brings the enclosure rating to UL Type 1
- Includes gasket and mounting hardware

FINISH

- Polyester powder paint; RAL 7035 textured light gray standard
- Custom colors available
