DESCRIPTION AND PURPOSE OF CHANGE:

Due to our continuous product improvement process we designed a new isolation spacer. Parts with new spacer will be available beginning with date code 01.07.2015. After the above mentioned effective date shipments with both product revisions are possible.

DETAIL OF CHANGE:

The plastic raw material has been changed from FR4 to Ultramid A3X2G5. The new spacer is mechanical fixed by the design therefore no additional glue joint is needed. We also increased the spacer thickness from 2,5 mm to 3,0 mm. Electrical and mechanical specifications will not be affected. Further the new spacer material is RoHS, REACH compliant and free of Halogen.
