## DESCRIPTION AND PURPOSE OF CHANGE:

Due to advanced manufacturing processes Würth Elektronik is able to use silver or copper paste as inner metallization in disk varistors.

## DETAIL OF CHANGE:

Currently Würth Elektronik use only silver paste (Ag) for the inner electrode metallization of disk varistors. In the future Würth Elektronik will add copper paste (Cu) as possible material for the inner electrode.

This change has no impact on the quality, reliability, solderability and lead time of affected products

## RELIABILITY / QUALIFICATION SUMMARY:

Product approval is according to internal reliability requirements and is released by Quality and Product Management Departments.

DATA SHEET CHANGE:

Yes

No
