Date Issued

Reason For Change

New, Modified, Or Replacement Tooling

Change Description

This is to inform you that Molex is taking a proactive measure to change QSFP top backshell by adding an additional feature for smooth module extraction for larger diversity of cages available in the industry today. This design improvement will allow more variation in the mating cage while still remaining in the SFF guidelines. This will impact all QSFP top backshell tooling and includes all AWG's, but will not impact form, fit, or function. The design update will be changed on current tooling and rolled into all QSFP production. This is a running change and sample availability will be 4/15/2015. Backshell PN's impacted are: 747560124, 747560126, 747560128, 747560130, 747560100, 747560101, 747560102, 747560103
