Date Issued

Reason For Change

Tooling / Equipment Transfer

Change Description

This is to inform you about a transfer plan of 4 mold dies and about a manufacturing site change of housing dyeing process for 53721/53728 series (6.5 WtB Header Assy). The mold dies are currently located in Japanese vendors, ""MIS"" and ""Wako Sangyou"", which produce housing parts that go to the dyeing process in "Murakami Inc" to ship them to Molex Vietnam, who is a final assembly manufacturer. The 4 molds will be moved from the Japanese vendors to "SHINSEI MOLDING" in Thailand where housing parts are produced, dyed, and shipped to Molex Vietnam of the same final assembly site. By doing so, Molex can build a more efficient manufacturing structure that will contribute to customer satisfaction by bringing a shorter lead-time of Molex's products supply. Mass production date in "SHINSEI MOLDING" is estimated to start in 20th January, 2015 (This schedule might change due to Molex's transfer arrangements). The affected finished products are as follows . . . 537210270, 537210470, 537210670, 537280219, 537280261, 537280262, 537280263, 537280264, 537280265, 537280266, 537280268, 537280269, 537280280, 537280281, 537280282, 537280283, 537280419, 537280461, 537280462, 537280464, 537280465, 537280469, 537280619, 537280661, 537280662, 537280664, 537280665, 537280669.
