

# UTILITY HOOKS 12 piece utility hook set STORAGE

UTILITY HOOKS 12 piece utility hook set STORAGE

Ideal for creating shelving space and hanging bicycles, lawnmowers, ladders and smaller items.

## Wall mounting/ safety instructions:

Required: Power drill, Phillips screwdriver and a spirit level.

### Important notes:

The utility hooks must be mounted on a stable brick, concrete wall or wooden stud which is strong enough to carry the weight of the utility hooks and the object hung on them.

When mounting into timber must use supportive stud and or backplate to ensure strength. Ensure that there are no hidden cables, cable conduits or gas or water pipes under the surface before drilling into the wall. If in doubt use a suitable detector or consult an expert

Step 1 Mark holes in the wall using the utility hook as a template. plan your work so that there is enough space for the utility hooks above and below each other.

Step 2 Drill holes using a power drill and an appropriately sized drill bit.

Step 3 Use the wall plugs if mounting the utility hooks onto a masonry wall.

Step 4 Fix the utility hook firmly to the wall using a screwdriver with the screws provided.

• Left / Right hook with sponge 42x30 cm (2pc)

• Single hook with sponge 23x15 cm (2pc)

• Square hook with sponge 24.5x21 cm (2pc)

• Single hook without sponge 15x11 cm (2pc)

• Single hook without sponge 22x15 cm (2pc)

• Square hook without sponge 24x16 cm (2pc)
