Important Notice Product Phase-out M754

May 16, 2017

Newark Element 14
217 Wilcox Ave.
Gaffney, SC 29341

With a focus on innovative ideas and an eye towards future markets, SCHURTER continually strives to improve products throughout the various part series we offer. At the same time, some of the products SCHURTER offers have experienced a decline in demand and it is no longer cost effective to produce or maintain approvals for these parts. For these reasons, SCHURTER periodically looks to adjust our product range to maximize value for our partners and customers.

Attached is a complete list of all part numbers involved in this phase out. Last time buy and delivery dates are noted as well. Possible replacement parts are referenced where applicable. Also attached is a list of your customers who in the past three years have purchased parts that are involved in this phase out. The list includes the part number and quantity purchased.

On the SCHURTER website, the data sheets of the phased out parts are marked with a phase-out watermark as shown in Figure 1 and, where applicable, informs customers of the recommended replacement part as shown in Figure 2.

Thank you for your time and attention to this matter. Please inform your customers accordingly and feel free to contact me if you have any questions or if I can be of further assistance. Additional information is also available at the SCHURTER website: www.schurter.com.

Thanks and best regards,

Clif Emmons
