

Electric Paint® 10ml / SKU-0018

Draw, paint and create with electronics

Bare Conductive's **Electric Paint** is just like any other water-based paint, except that it conducts electricity! This means that you can paint wires or sensors directly onto almost any material around you, including paper, wood, plastic and glass.

The **Electric Paint** 10ml Tube is perfect for small scale projects where detail is important, or for painting, soldering or repairing small breaks.

Get the most out of the Electric Paint Tube

Sits well next to: Tools, conductive materials, innovation, solder paste.

E-shop keywords/category: Conductive paint, electric paint, sensor, conductive material, solder paste, soldering tool, toolbox must-have.
