

SUPER GLUE ALL PLASTICS

STEP-BY-STEP

1. Ensure surfaces to be joined are clean, completely dry and close fitting. Using the Surface Activator like a pen apply it to both surfaces and wait 60 seconds to dry.
2. Twist the glue cap clockwise until it locks, then unscrew in an anti-clockwise direction to open.
3. Carefully squeeze a small drop onto one surface. Press the surfaces together and hold until set.
4. Replace the cap immediately and store upright in a cool dry place.

Rapid dual-action adhesive system is specially designed to work on plastic to form resilient, invisible bonds in seconds.

Recommended on

Plastic, Porcelain, Metal, Rubber, Leather, Wood, Paper.

Properties

- Bonds even difficult to bond plastics such as polyethylene (PE) and polypropylene (PP)
- Bonds in seconds
- Dries transparent
- Easy to open, self-piercing and anti-clog cap
- Suitable for use on most surfaces*
- Solvent free

* Except Styropor®, car glass and synthetic fibres.
