

HiFiBerry DAC+ Zero

The HiFiBerry DAC Zero is a high-quality digital-to-analog converter for the Raspberry Pi Zero (but works also on all newer models with 40 pin GPIO connector). It is designed as a cost-effective alternative to the HiFiBerry DAC+ for price sensitive users, that don't need all features of the HiFiBerry DAC+.

Facts

- Dedicated 192kHz/24bit high-quality DAC for improved sound quality (based on an a Burr-Brown analog-digital converter).
- Connects directly to the Raspberry Zero, no additional cables needed
- Comes as a pre-fabricated kit. You just plug it onto the Raspberry Pi. On the Raspberry Pi Zero, you have to solder the GPIO header onto it.
- Compatible with Raspberry Pi models Zero, A+,B+, 2B and 3B
- Directly powered from the Raspberry Pi, no additional power supply
- Low-noise voltage regulator for optimal audio performance
- Comes without any mounting material (spacer, 40-pin header for the Raspberry Pi Zero).
- Does not feature hardware volume control – however most programs feature software volume control.

Dimensions without package	3.0 x 6.5 x 2.5cm
Dimensions including package	4.0 x 8.0 x 2.5cm
Weight	0.01 kg
GTIN	4260439550378

Usage recommendations

- very small music playback devices
