Visit www.hd265.com to download client software for both Windows and MAC!

Insert Micro SD Card

Insert any brand new 2-32GB Micro SD card to the device.

Install App

In the Apple Store or Google Play search and install the "BSTCAM" application.

Smartlink(Wi-Fi setup)

Notice: Please finish it in 5 minute when it was power

1. Open the "Wi-Fi" menu from your iPhone settings. Then tap your own Wi-Fi Router Network, Then the Wi-Fi signal will be selected from your iPhone's Wi-Fi network, See PIC#1, Next open the "BSTCAM" applications(PIC#2)

▲ PIC#7

▲ PIC#8

If the above Smartlink was not worked properly, please refer below Wi-Fi setup via AP.

1. Open the "Wi-Fi" menu from your iPhone settings. Then tap "ET890810500" (PIC#11), Then the "ET890810500" Wi-Fi signal will be selected from your iPhone's Wi-Fi network (PIC#12)
2. Open the "BSTCAM" applications (PIC#13), and one camera ID (PIC#14) will be listed. Tap the camera ID (PIC#14) to start monitoring (PIC#15).

Notice: ET890910500 is just an example for demonstrating only. You can find your own camera ID from Wi-Fi settings of your Smartphone

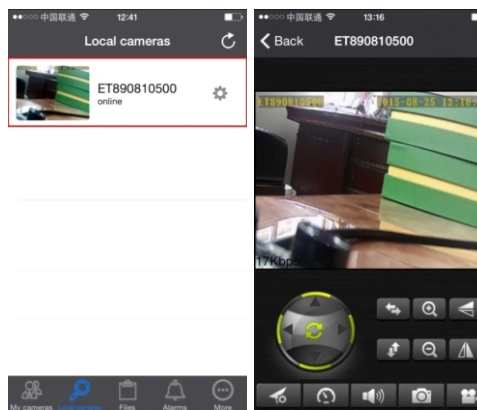

▲ PIC#1

▲ PIC#2

2. Click "More" button (PIC#3), then tap "Quick configured WIFI" (PIC#4)
3. Type the correct password of your Wi-Fi router network, click "OK" (PIC#5) to enter to sonic wave Wi-Fi setup (PIC#6). At this moment, please put your phone close to the microphone of your device to let it setup Wi-Fi, once the device Wi-Fi network was connected to your Wi-Fi router network, the speaker will play a short sound of music. The device will be restarted automatically.

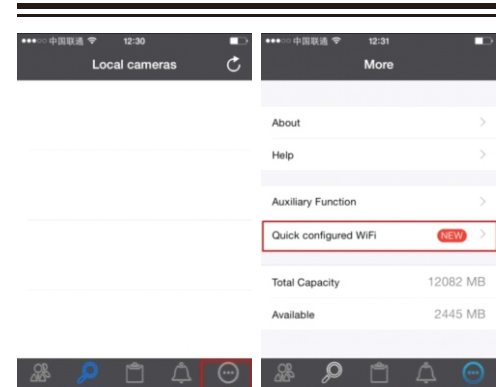

4. Back to "Local Cameras" window (PIC#7), you can click the "refresh icon" (PIC#8) to bring up all available cameras.
5. Tap the camera ID (PIC#9) to start monitoring (PIC#10)

3. Tap the setting icon (PIC#16) to enter into camera settings menu (PIC#17), then choose "Wireless settings" (PIC#17) for Wi-Fi setup.
4. Enable "WiFi", Choose your "SSID" by clicking the icon on the right side. Type the correct "Password" (PIC#18). Click "Done" (PIC#19) to save the Wi-Fi settings, a window will pop up with "Configure Success" (PIC#19). The device will be rebooted to finish the Wi-Fi set up. This will be complete within 2 minutes. During the reboot period, the camera ID will disappear from "Local Cameras" window (PIC#20), you can click the "refresh icon" (PIC#21) to bring up all available cameras.
