ZEMREX KNIT-WRAP is a 2-ply knitted wire mesh suitable for the RFI/EMI shielding of electrical and electronic cable assemblies and harnesses.

KNIT-WRAP is wrapped around cables like a tape and is best applied under tension with a 50% overlap which provides a good 4 layer shield.

Tolerance on thickness ± 0.05 mm

Tolerance on width ± 1.5 mm

Due to its knitted construction each layer of KNIT-WRAP interlocks and conforms easily and tightly to varying cable sizes and surfaces. It does not warp, is unaffected by temperature and provides mechanical support and protection.

Termination can be made by soldering, crimping or conductive adhesive.
