

## MEAS EMITTER ASSEMBLY ELM-4000 SERIES

SpO<sub>2</sub> optical sensor component

- ◆ Dual Drive
- ◆ Lead Frame Construction
- ◆ Pulse Oximetry Component
- ◆ Clear Epoxy

Low oxygen level can put a strain on cell functioning including the heart and brain. This is critical in acute medical situations like post-op recovery. TE Connectivity (TE) 's SpO<sub>2</sub> optical components provide leading accuracy in oxygen level detection.

With more than 27 years of proven reliability and expertise, TE has designed SpO<sub>2</sub> sensors with best-in-class flexibility to accommodate multiple wavelength options.

Our ability to provide both components and complete sensor packages makes us a leading choice for pulse oximetry applications that require high degrees of precision, durability and performance.

The ELM-4000 series emitter assemblies are specially designed for medical applications where selection of peak wavelength is a key requirement. Emission source material is GaAIAs in conjunction with GaAlP complete with clear epoxy lens.
