

Superior Removal By Design™

4507P - GRABIT MICRO 4 PIECE SET

Use in reverse only when drilling and extracting.

Quickly and easily removes most broken bolts No. 5 and 6 (3mm) to 1.4 inch (6mm) from wood, metal or plastic. Can drill up to grade 8 and class 10.9 fasteners.

Micro Grabit 4 piece extractor kit can quickly remove broken bolts using a 1/8 in. variable speed reversible rotary power tool (slow speed) or quality power screw driver with expandable chuck. Serrated extracting end of tool results in greater torque for hard to remove bolts.

- Flip style drill bit and extractor in one tool; multiple tools not required.
- Self centering drill tip eliminates walking or wandering.
- No grinding, center punching, or pilot hole required.
- Works on jagged, uneven, and rough breaks.
- Tempered twice for extra hardness; results in multiple extractions per tool.
- Made from M2 HSS. Highest quality steel used and made in the USA.
