Quality Fastening for Networking & Telecommunications Cabinets

For every Cabinet or Enclosure, for every device that needs to be installed in a 19-inch wide frame, LMS Data M6 Captive Nuts, Bolts and Washers are the critical component that is needed.

The LMS Data **NUTSCREWS-50** are a quality, alloy constructed, M6 universal sized fixing set that is ideal for attaching 19-inch devices such as Switches, Servers, UPS, Patch Panels and NAS devices into data cabinets from almost all vendors.

Supplied in a cost saving 50-pack, they feature nylon washer that provides extra grip, especially for heavier rack-mount devices while at the same time adding cushioning and helping to prevent over-tightening.

enclosures - power distribution - cabling
