

Steel and Stainless Steel Standard Hole Seals to be Sold as Multiples of 10

Please be informed that certain hole seals will be sold as multiples of ten (10), effective April 30, 2018.

Our packaging standard for this product is that each hole seal is packaged individually, and then 10 hole seals are packed in a bag. We believe that allowing an order to be entered in multiples of 10 will help reduce picking errors and increase efficiency. This change should not affect a customer's ordering routine significantly as many of these orders are sold in multiple of 10 currently. Please note that the change will apply to the smaller-sized hole seals only; hole seals for 2 ½-in. conduit and greater will not be affected.

Please find below a list of all standard hole seals which will be required to order in multiples of 10 starting April 30.
