

MAS100-15

MASKING TAPE

MG Chemicals high temperature masking tape is made of 8 mils thick beige crepe paper coated with a rubber adhesive designed for 3D printer heated beds. It is specifically designed to be heat resistant and provide superior print adhesion while allowing easy removal of completed objects. It also provides protection for the bed, while making clean up simple. It works excellent with PLA, Wood, PETG, and many other 3D printing materials. It is available in 4 in. and 8 in. on 49 ft rolls

Catalog Number	Size	Color	Description
MAS100-15	10cm x 15m (4in x 49ft)	Beige	Masking Tape

FEATURES

- Low thickness variation
- Strong heat resistant rubber adhesive
- Superior print adhesion
- Easy object removal
- Protection for 3D printer bed
- 4" or 8" width

APPLICATIONS

- 3D Printing
- Makers / hobbyist projects
- Classroom / Training
