Digital Pocket Thermometer

FM10 Model

The Digimate series provides **low-cost, accurate food thermometers** for use in **catering and food processing environments.**

The FM10 pocket size digital thermometer is **ideal for checking core temperatures of food before serving**. Its large LCD and quick response time allow temperatures to be viewed quickly and easily.

The FM10 includes a pointed food shaft for easy insertion into food products and data hold for those hard to reach areas. Its handy pocket size and protective sheath allows users to carry around like a pen for quick checks when required.
