

Demineralised Water

**RoHS
Compliant**

Description

MC002233 is demineralised water which enables users the ability to give a final “polish” to circuit boards and assemblies which have been cleaned and rinsed in tap water.

Properties

Appearance : Colourless liquid
Conductivity (mS) : <3

General Properties

Packaging : 5 litre Plastic Can
Shelf Life : 36 months

Directions for Use

MC002233 is an ideal product to be used in conjunction with an empty trigger spray with adjustable nozzle.

It is not advisable to use MC002233 in a container and immerse the assembly or board, as MC002233 may quickly become contaminated with salts from tap water or even un-rinsed residues from the initial cleaning process.

Hold the PCB or assembly at approx. 45°C. Spray MC002233 generously onto the assembly and allow to run down the board.
