

## Replacement Parts & Accessories

**MAKERGEAR**

<b>MG1006</b>	<b>Thermister</b>
Description	This thermistor (temperature sensor) is suitable for both the V3b and the V4 Hot Ends.
	If Hot End's temperature display seems to be inaccurate, a replacement thermistor would be a good idea.
	Each thermistor includes the proper Molex connector, and can accurately read temperatures up to 300 °C.
