PURRMETRIX PoE GATEWAY

PMTX020025

Simple installation

Encrypts data with SSL

Powered from ethernet

Collects data from 200 sensors

Authenticates data

Connects to any CAT 5 network

Gateways are radio receivers that listen to kittens, collecting data from up to 200 kittens where they are within range.They timestamp the data and secure it for delivery to the web application via an ethernet connection.

Compact and inconspicuous, Gateways use ubiquitous https transports and network sockets, meaning they are compatible with network translation infrastructures.

This PoE gateway can be powered through any 802.11af ethernet port with no need to find power sockets.

Performance	Update Rate	Every 10 seconds
	Storage	400 measurements
	Status indicators	On/off/fault LED
	Range	40 meters in a typical open plan office environment.
	Security	TLS , X509
Physical	Height	90 mm
	Width	60 mm
	Depth	25 mm
	Power	Supplied through ethernet connection
