

AIRSCOUT CLOUD[®]

The industry leading Wi-Fi[®] testing solution just got better with the addition of AirScout[®] Cloud.

Generate, store, and send reports directly from the AirScout[®] application to the cloud. All you need to access your reports at any time, from anywhere is a device with a web browser and internet connection.

Upon test completion, AirScout® Residential and Enterprise produce a series of heat maps that visually represent the physical environment and levels of service available at different points throughout the structure. This data is sent and stored in the cloud and can be shared immediately with the customer or a remote support team. You can rest easy knowing that the service and tech support teams have access to the reports and can help the customer whenever they need it most.

The AirScout® Cloud is included in Greenlee Communication's Emerald 360 Service and Maintenance program, and can be added as a standalone option. Users get 3 months of AirScout® Cloud FREE when they purchase the AirScout® Live, Residential, or Enterprise.

Ordering Information

CAT NO.	Description
CLDSA	AirScout® Standalone Cloud
SP12-ASK306 (302 and 304 Available)	EMERALD PLAN, ASK306, 12MTH

AIRSCOUT[®] LIVE

Continuous Real-Time Monitoring of Wi-Fi[®] Networks

Now FREE on Android phones!

Customers' expectations of seamless Wi-Fi[®] connectivity continues to grow. AirScout[®] Live allows you to quickly identify and address the most prominent issues preventing reliable Wi-Fi[®].

Features

- View all in-range access point characteristics from signal strength and security protocol to radio capability.
- Quickly identify common problems such as suboptimal signal coverage or incorrect channel selection.
- Instantly view channel utilization on 2.4Ghz and 5Ghz bands to identify sources of interference.
- Identify and track performance of rogue access points with the live signal strength meter.
- Compare channel parameters and optimize your 802.15.4 configuration to ensure ideal settings.
- FREE on Android Phones! The AirScout[®] App allows you to take snapshots of the Wi-Fi[®] network and upload them to the cloud.
- Compatible with most desktop computers and popular mobile devices.
- The AirScout[®] Live application is easy to use, no training required.
- Upgrade to AirScout[®] Residential or AirScout[®] Enterprise and overcome Wi-Fi[®] challenges in any environment.
