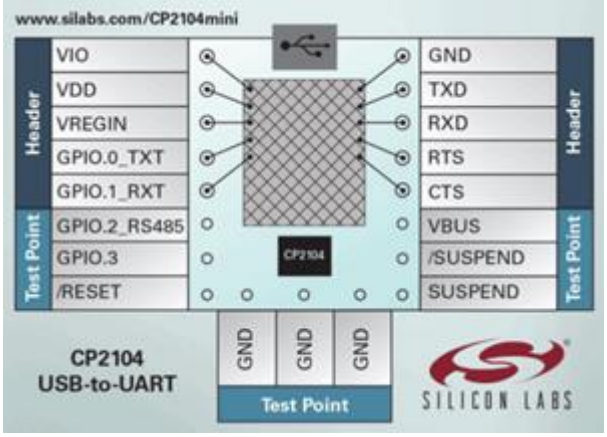
Description: CP2104-MINIEK USB-to-UART Mini Evaluation Kit

Part Number: CP2104-MINIEK

The CP2104 is a highly-integrated USB-to-UART Bridge in a compact 4 mm x 4 mm package. The CP2104 is a USB 2.0 full-speed device with integrated USB clock, voltage regulator and programmable memory reducing BOM costs and simplifying the design.

The CP2104-MINI Evaluation Kit Features

- CP2104 mini evaluation board
- Mini USB extension cable
- CP2104 mini quick start card



1. Download and install the virtual COM port drivers. Silicon Labs' direct access driver package can also be used with the CP2104 Mini EK.

2. Connect the headers or test points on the CP2104 Mini EK board to your system. The included quick-start card provides information on each header and test point.

3. Plug the USB cable into the CP2104 EK Mini board
