## Benefits:

- Pre-perforated for rapid removal from backing sheet
- Print using ordinary standard office laser printer and the pro-Power software
- Print up to 54 labels in 15 seconds

## Description:

This label sheet offers by far the easiest and fastest way to produce tie-on cable labels. No special equipment needed. Use a standard office laser printer. Print up to 54 labels in just 15 seconds, the time it takes for the sheet to run through your laser printer. And removing the labels is easy too, just fold backwards and forwards along the perforation lines.

The free pro-Power software is downloadable from:

<http://www.silverfox.co.uk/product/farnell-pro-power-software/>

TIP: If you only need a few labels, prior to printing use the variable start position in the pro-Power software and print the labels at the bottom of the sheet to keep the leading edge of the sheet intact for future runs

Recommended printing via straight printer path
