Enabling Legacy Data Communications For Your Applications

Looking to enable legacy, modem communications as a backup for Broadband? Need legacy fax or other dial-up data transmissions for your legacy applications?

The classic Dynamode **M56EXT-USB-T** is a tried-and-tested, fully compatible v.92 Modem utilising a standard USB interface port, support Plug n' Play with leading Operating Systems.

Ideal for when conventional Broadband communications is out of reach, fax communications or other applications when dial-up services maybe required. Current computers do not include Modem connectivity, so the M56EXT-USB-T is an ideal, self-powered solution.

Fits in your shirt pocket, powered by the USB bus and supports major data compression standards together with being fully AT command set compatible. Moreover its supports Fax Group 3 and answer machine compatible for extra peace of mind.

 Windows 10
