# Network Data / Voice Economiser Adapter
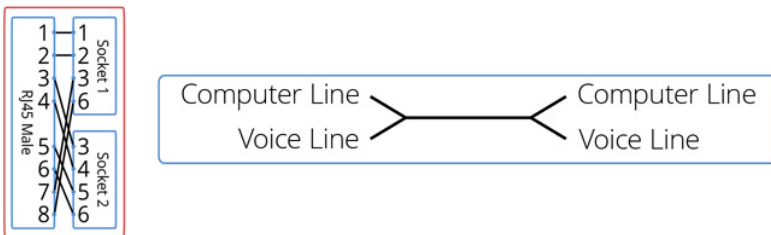

pro-**SIGNAL**

## Description

The 831-2987 economiser is designed to be used where there are insufficient network outlets available. 10/100 Ethernet only uses two of the four pairs in standard Cat5 cabling (usually the orange and green pairs). The economiser allow you to connect two patch cables into one unit, the first cable is sent down the standard orange/green pairs, the second cable is sent down the previously unused blue/brown pairs. Another unit is needed at the end to separate the two signals back to two cables.

## Specifications

| | |
|---|---|
| Cable Length | : 210mm |
| Connector Type A | : RJ45 Plug |
| Connector Type B | : RJ45 Jack × 2 |
| Cable Type | : Cat5 |
| Jacket Colour | : Grey |
