

Product Discontinuation and Replacement Notice

Neutrik will be discontinuing and replacing all **powerCON® TRUE1** products with **powerCON TRUE1 TOP** products.

powerCON TRUE1 TOP is 100% backward compatible with all **powerCON TRUE1** connectors. Form, fit, and function remain the same, including the IP 65 rating when mated.

Part number changes:

The new **powerCON TRUE1 TOP** part numbers are identical to the prior **powerCON TRUE1** part numbers but with the addition of a "-TOP" suffix. Thus, for example, NAC3PX is replaced by NAC3PX-TOP. The table at the bottom of this page shows discontinued **powerCON TRUE1** part numbers and replacement **powerCON TRUE1 TOP** part numbers.

Enhancements:

powerCON TRUE1 TOP features new, all-black UV-resistant material rated to UL 50e enclosure Type 4.

powerCON TRUE1 TOP cable connectors feature a new silver-colored latch with a revised geometry that is designed to enhance durability.

Protection covers:

The currently available chassis connector protection covers SCNAC-FPX, SCNAC-MPX, and SCNAC-PX are unaffected: they pair with the new **powerCON TRUE1 TOP** products as they did with **powerCON TRUE1**.

Pre-terminated overmolded cable assemblies not changing:

powerCON TRUE1 pre-terminated overmolded cable assemblies will continue to use **powerCON TRUE1** cable connectors for the time being. They will not switch over to using **powerCON TRUE1 TOP** cable connectors until a later date.

Product Line:	powerCON TRUE1	PDN Date:	November 30, 2018
		PDN-No:	#03-2018.USA

Last time buy date:	Orders for powerCON TRUE1 received after December 31, 2018 will be filled from Neutrik USA on-hand inventory until that inventory is exhausted. After that point, orders must be for the new powerCON TRUE1 TOP products.
