

## Overview

The KEMET SC coils are common mode chokes with a wide variety of characteristics. These toroidal coils are designed with our proprietary ferrite cores and are useful in various noise countermeasure fields.

## Applications

- Audio-visual equipment
- Home appliances
- Power supplies

## Benefits

- Proprietary 5H ferrite material and equivalents
- Suitable for  $\geq 150\text{kHz}$  range
- Wide variety of sizes and specifications
- Operating temperature range from  $-25^{\circ}\text{C}$  to  $+105^{\circ}\text{C}$
- UL94 V-2 flame retardant rated cap

## Part Number System

SC-	10-	200
Series	Rated Current AC (A)	Inductance (mH) Minimum
SC-	0x- = x A x0- = x0 A xx- = xx A  Examples: 02 = 2 A 10 = 10 A 15 = 15 A  Note: Code 05 can equal 5 A as well as 4 A	x00 = x mH  Example: 200 = 2 mH  Note: 1 mH can equal code 100 as well as code 101

## Magnetic Permeability of Ferrite Material

In order to achieve most efficient noise reduction, it is important to select the material according to the target frequency band. Depending on its magnetic permeability, a particular ferrite material will be effective in a certain frequency band. A schematic representation of the relationship between the magnetic permeability of each material and the corresponding effective band range is shown in Figure 1. Materials with higher magnetic permeability are effective in the lower frequency range, while those with lower magnetic permeability are effective in the higher frequency range. Thus, Mn-Zn products are mainly used for reducing conduction noise, while Ni-Zn products are commonly used for radiation noise countermeasures.

The effective frequency range varies depending on core shape, size and number of windings. This frequency dependence of the magnetic permeability as shown in the figure serves for reference purposes only and it should be tested on the actual device to determine its effectiveness.

S18H, S15H, 10H, 7H, 5H, 1400L and 700L are KEMET's proprietary ferrite material names. Other materials can also be available on request.

Figure 1 - Relationship between the magnetic permeability of each material and its effective frequency range

## Dimensions – Millimeters

Vertical Type ( $\leq 5$  A)

Horizontal Type ( $\geq 10$  A)

Mounting Pitch

Part Number	Dimensions (mm)		Pin Pitch <sup>1</sup> (Reference)	
	OD (Maximum)	T (Maximum)	a	b
SC-02-101	23	13.0	6	11
SC-02-100	23	18.5	6	17
SC-02-200	23	18.5	6	17
SC-02-300	27	20.0	6	17
SC-02-500	27	20.0	6	17
SC-02-800	34	23.0	7	20
SC-05-100	25	18.5	6	17
SC-05-200	32	22.0	7	21
SC-05-500	34	23.0	7	21
SC-05-800	34	23.0	7	21
SC-10-100	34	24.0	22	21
SC-10-200	47	27.0	30	30
SC-15-100	49	27.0	35	35
SC-15-200	50	28.0	35	35
SC-20-100	60	30.0	40	40
SC-30-100	62	35.0	55	20

## Environmental Compliance

All KEMET AC line filters are RoHS Compliant.

## Performance Characteristics

Item	Performance Characteristics
Rated Voltage	250 VAC/VDC
Withstanding Voltage	2,400 V (2 seconds, between lines)
Insulation Resistance	> 100 MΩ at 500 VDC (between lines)
Rated Current AC Range	2 – 30 A
Rated Inductance Range	1 – 8 mH minimum
Inductance Measurement Condition	100 kHz
Thermal Class	A (105°C)
Operating Temperature Range	-25°C to +105°C (include self temperature rise)

**Table 1 – Ratings & Part Number Reference**

Part Number	Rated Current AC (A)	Inductance (mH) Minimum	DC Resistance/Line (mΩ) Maximum	Temperature Rise (K) Maximum	Wire Diameter (mm)	Weight (g) Approximate
SC-02-101	2	1	110	40	0.6	15
SC-02-100	2	1	100	40	0.6	15
SC-02-200	2	2	110	40	0.6	15
SC-02-300	2	3	100	40	0.6	16
SC-02-500	2	5	100	45	0.6	20
SC-02-800	2	8	150	40	0.6	25
SC-05-100	5	1	50	40	0.8	20
SC-05-200	5	2	70	40	0.8	25
SC-05-500	4	5	80	50	0.8	30
SC-05-800	4	8	85	60	0.8	40
SC-10-100	10	1	20	40	1.3	40
SC-10-200	10	2	28	40	1.3	80
SC-15-100	15	1	12	40	1.8	100
SC-15-200	15	2	12	45	1.8	110
SC-20-100	20	1	8	45	2.3	135
SC-30-100	30	1	6	40	2.6	190

SC-30-100		

## Handling Precautions

### Precautions for product storage

AC Line Filters should be stored in normal working environments. While the chokes themselves are quite robust in other environments, solderability will be degraded by exposure to high temperatures, high humidity, corrosive atmospheres, and long term storage.

KEMET recommends that maximum storage temperature not exceed 40°C and maximum storage humidity not exceed 70% relative humidity. Atmospheres should be free of chlorine and sulfur bearing compounds. Temperature fluctuations should be minimized to avoid condensation on the parts. Avoid storage near strong magnetic fields, as this might magnetize the product.

For optimized solderability, AC line filters stock should be used promptly and preferably within 6 months of receipt.

### Product temperature rise values

The values listed for temperature rise are the result of self-heating in wires when the rated current (commercial frequency) is applied.

When using the product, check and evaluate the value of the core temperature rise under actual operating conditions.

---

## Export Control

### For customers in Japan

For products that are controlled items subject to the “Foreign Exchange and Foreign Trade Law” of Japan, the export license specified by the law is required for export.

### For customers outside Japan

AC line filters should not be used or sold for the use in the development, production, stockpiling, or utilization of any conventional weapons, mass-destruction weapons (nuclear, chemical, biological weapons, or missiles), or any other weapons.

### Disclaimer

All product specifications, statements, information and data (collectively, the "Information") in this datasheet are subject to change. The customer is responsible for checking and verifying the extent to which the Information contained in this publication is applicable to an order at the time the order is placed. All Information given herein is believed to be accurate and reliable, but it is presented without guarantee, warranty, or responsibility of any kind, expressed or implied.

Statements of suitability for certain applications are based on KEMET Electronics Corporation's ("KEMET") knowledge of typical operating conditions for such applications, but are not intended to constitute – and KEMET specifically disclaims – any warranty concerning suitability for a specific customer application or use. The Information is intended for use only by customers who have the requisite experience and capability to determine the correct products for their application. Any technical advice inferred from this Information or otherwise provided by KEMET with reference to the use of KEMET's products is given gratis, and KEMET assumes no obligation or liability for the advice given or results obtained.

Although KEMET designs and manufactures its products to the most stringent quality and safety standards, given the current state of the art, isolated component failures may still occur. Accordingly, customer applications which require a high degree of reliability or safety should employ suitable designs or other safeguards (such as installation of protective circuitry or redundancies) in order to ensure that the failure of an electrical component does not result in a risk of personal injury or property damage.

Although all product-related warnings, cautions and notes must be observed, the customer should not assume that all safety measures are indicated or that other measures may not be required.
