

Part Number: PS-PL4R

Description: Rechargeable LED Penlight

The PS-PL4R is a unique and innovative penlight. With its integral Li-Polymer battery, it is rechargeable via Micro-USB cable. This provides a cost-effective alternative to disposable battery penlights. Its magnetic body can be connected against a magnetic surface to allow for handsfree use. It has a CREE SMD LED, giving the PS-PL4R a strong working light for any number of situations. Regarding its external construction, it has been made with the end user in mind. Tough ABS housing surrounds the unit and keeps it safe from knocks and falls and a rear pocket clip allows for safe transportation and personal on-body storage when not in use.

At only 30g, the PS-PL4R is an ultra-lightweight penlight that is easy to use for a sustained period of time. This is in addition to the ergonomic non-slip grooves on the units body, helping to keep the unit within the grip of the users hands during operation.

## Additional information

<b>Battery</b>	<i>350 mAh Li-polymer</i>
