

CND-TPBQC10

Li-Polymer Power Bank With Quick Charge Technology

10000 mAh

This power bank will charge your devices up to 3 times faster than average external charger. The sophisticated Quick Charge 3.0 technology provides the fastest charge and USB Power Delivery makes charging in the most optimized way by letting high levels of current to flow to the battery. No matter what cable you are using – you will get the fastest and safest charge ever possible.

USB Power Delivery

Created with an aim to set up a single USB fast charging standard, this technology communicates with the device and adjusts both power and current making charging faster and safer than ever. In order to use this technology your smartphone should be compatible with it.

Quick Charge 3.0

This technology makes charging speed of a compatible device much faster comparing to average 5V charger. It increases maximum output power up to 18W during the whole process of charging.

Model

CND-TPBQC10RG	rose gold	5291485004453
CND-TPBQC10B	black	5291485004460
CND-TPBQC10S	silver	5291485004477

Features

- Capacity: 10000 mAh
- Quick Charge 3.0 + PD
- Approximate quantity of full charges for an average smartphone: 4
- Micro USB Input: 5V/2A, 9V/2A
- PD Input/Output: 5V/2A, 9V/2A
- Output1: 5V/2A,
- Output2: 18W (QC3.0)
- Approximate time of charging: 7 hours
- LED indication of charge
- QC 3.0 and USB Power Delivery technologies allow to charge devices at optimal power rates
