

ISOPROPYL ALCOHOL (IPA)

High-purity electronics cleaning solvent

Features and Benefits:

- **> 99.9% Purity**
- **Meets purity level Grade A standard for MIL Spec TT-I-735A and ASTM D770**
- **Meets reagent ACS and USP/NF Grades**
- **Anhydrous solvent—Removes water and humidity from components leaving them dry**
- **Low toxicity**
- **Suitable for Use in Food Facilities as a Non-Food Chemical**

Applications:

- **Printed circuit boards**
- **Electronic components**
- **Magnetic tape and disk heads**
- **Heat sinks**
- **CPU's**
- **Laser lenses in optical drives**
- **Fiber optics**
- **Cables**
- **Keypads**
- **Stencils**
- **Contacts**
- **Connectors**

Isopropyl alcohol, also known as IPA, isopropanol, and 2-propanol, is a high purity plastic-safe solvent for cleaning electronics. It evaporates quickly, leaves practically no residues, and removes water from surfaces. It cleans grime, oils, greases, uncured epoxy, thermal pastes, alkaloids, gums, natural resins, organic acids, flux residues, and ionic contaminants, resins, organic acids, flux residues, and ionic contaminants.

MG Chemicals offers 99.9% pure isopropyl alcohol packaged in liquid, aerosol, and pre-saturated wipe formats. We also offer wipes pre-saturated with 70/30 isopropyl alcohol, both individually packaged and in tub format.
