

AOC HDMI CABLES

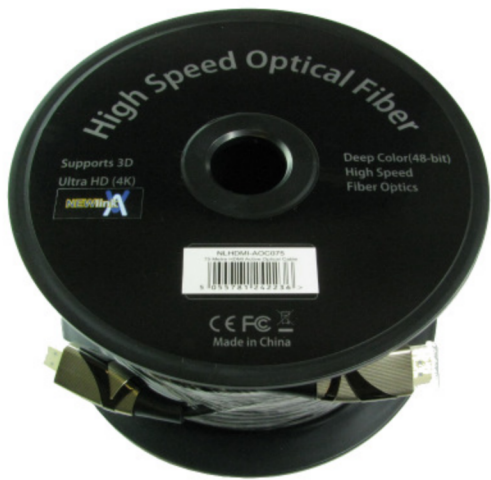

25 ~ 100m Active Optical HDMI Cables

HDMI Active Optical Cable (AOC) use fibre optic cable to carry the HDMI signal. This means that the signal can be carried much further than a traditional copper cable and reduces the risk of interference.

HDMI AOC cables also have copper wires inside which carries the power so no external power adapter is required.

Features

- Extends HDMI up to 100m
- Supports resolutions up to 4k (2160p) at 60Hz
- Compliant with HDMI v2.0 / 1.4
- Supports 4k HDR format
- Supports HDCP, EDID, CEC, DDC
- Plug & Play, no driver required
- Highly resistant to EMI and RFI
- Data Rate: 18 Gbps
- Low power consumption, no external power supply needed
