

Part Number: FMTP623S-100PAK

Description: CAT6 Modular Plug for 23-AWG Wire - Shielded, RJ45, 100-Pack

PREVENT INTERFERENCE IN HIGH-SPEED CAT6 NETWORKS.

Details:

Consistent Connectivity

This plug is shielded to prevent interference in high-speed networks. This ensures reliable connectivity and maximum network uptime.

Easy, Fast Termination

This modular plug has insulated wire holes that are 1.2 mm in diameter, which makes termination simple. Other CAT6 shielded plugs have smaller insulated wire holes, which makes it harder to push wire into the plug. Additionally, the plug comes with loading bars that are 1.4 mm in diameter.

Technical Specs:

Physical

Housing Color	Transparent covered with nickel plating
Contacts	2-prong angled (support both solid & stranded wire)
Housing Material	Polycarbonate, UL 94V-2
Shielding Type	Shielded

Product Features:

- Designed for use with CAT6 23 AWG PVC wire
- Insulated wire holes that are 1.2-mm in diameter
- Use in areas with high EMI/RFI
- Meets or exceeds CAT6 specifications
- Includes loading bars for ease of termination
- Reliable connectivity and maximum network uptime
- Guaranteed for life
